

SCHEME OF WORK FOR PRIMARY

Teacher's Name:.....

School Name:.....

Academic year:.....

Term: 1

Class: P1....

Subject: MATHEMATICS

No weeks per term: 15

Number of periods per week: 5periods

UNIT 1: NUMBERS FROM 1 TO 5 (25 Periods)

Key unit competence: Pupils will be able to count, read, write, order, compare, add, and subtract whole numbers from 1 to 5.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary.	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 1: 08-12/09/2025	Lesson 1: Introduction of the unit (1period)	Recognize the content of this unit and the importance of counting, reading and writing numbers in real life.	Mathematics , numbers, counting	1. Teacher welcomes learners and introduces the unit 1. 2. Class discussion: -Learners observe the pictures and discuss the questions on introductory activity 1.0 in pupil's book.	Mathematics book, real-life objects with numbers (e.g., calendar, clock), chalk/whiteboard etc	Pupils should be given oral and practical activities on numbers up to 5“number 1” in a range of situations, to be done orally and Practically	Mathematics book for Primary one (Page 1)	

				-Let them also discuss "Where do we see numbers in our daily life?" (e.g., age, house, calendar, clock, prices etc). 3. Teacher explains the importance of learning numbers. <i>Notice: Adapt activities so that pupils with special education needs, can participate.</i>				
	Lesson 2: Counting 1 to 2 objects (1period)	Count objects up to 2 accurately.	Count one, Count two, how many?	1. Teacher uses fingers to show 1 and 2. 2. Pupils count real objects in the classroom (e.g., 1 book, 2 pencils, etc). 3. In small groups, pupils collect and count 1 and 2 of an item (e.g., stones, leaves, cups,	Parts of body (Fingers, legs, eyes, etc), real objects found in the learning environment (in or out of the class, home, market, church, etc), Books, Drawings,	Pupils should be given oral and practical activities on counting 1 to 2 object.	Mathematics book for Primary one (Page1 -2)	

				oranges, cars, balls, animals, etc). <i>Notice: Adapt activities so that pupils with special education needs, can participate.</i>				
	Lesson 3: Reading and writing the number 1 (1period)	Read, and write the number 1.	Read One, Write “1”	1. Teacher shows flashcard with the number '1'. 2. Pupils practice writing '1' in the air, on their desks, and in their exercise books. 3. Activity: Draw one object (e.g., one sun, one tree, one cow, one pineapple, etc). <i>Notice: Adapt activities so that pupils with special education needs, can participate.</i>	Number flashcard (1), chalkboard, exercise books, pencils, Etc,	Pupils should be given written sheet and practical activities on Reading and writing the number 1.	Mathematics book for Primary one (Page 2)	

	Lesson 4: Reading and writing the numbers 1 and 2 (1period)	Read, and write the numbers 1 and 2.	Read One, Read two, write 1, write 2	1. Revise number 1. Introduce flashcard for number 2. 2. Pupils practice writing numbers 1 and 2. 3. Matching game: Match cards with '1' to a picture of one apple; '2' to two bananas. <i>Notice: Adapt activities so that pupils with special education needs, can participate.</i>	Number flashcards (1 & 2), picture cards with 1 and 2 objects, exercise books, pencils, pens, etc.	Pupils should be given written sheet and practical activities on Reading and writing the numbers 1 and 2.	Mathematics book for Primary one (Page 3)	
	Lesson 5: Counting 1 to 3 objects (1period)	Count objects up to 3 accurately.	count One, Count two, count three,	1. Sing a counting song up to 3 (e.g., "One, Two, Buckle My Shoe", etc). 2. Teacher uses bottle tops/beans to demonstrate counting to 3. 3. Pupils work in pairs: one pupil places a number of objects for instance three avocados,	Fingers, real objects found in the learning environment (in or out of the class, home, market, church, etc), Books, Drawings,	Pupils should be given oral questions and practical demonstration activities on Counting 1 to 3 objects	Mathematics book for Primary one (Page 3-4)	

				kettles etc (1-3), then the other counts them.				
Week 2: 15-19/09/2025	Lesson 6: Reading and writing the numbers 1, 2, and 3 (2periods)	Read, and write the numbers 1, 2, and 3.	Read One, Read two, Read three, write 1, write 2, write 3	1. In pair, pupils write numbers 1 and 2. 2. Introduce number 3 with a flashcard. 3. Tracing activity: Pupils trace numbers 1, 2, and 3 in their books. 4. Game: "Show me..." Teacher says a number, pupils hold up the correct number of fingers.	Number flashcards (1,2,3), tracing worksheets, pencils	Pupils should be given a Worksheet completion and practical activities on Reading and writing the numbers 1, 2, and 3	Mathematic s book for Primary one (Page 4)	
	Lesson 7: Counting 1 to 4 objects (1period)	Count objects up to 4 accurately.	count One, Count two, Count three, Count four	1. Count pupils in a row (up to 4). 2. Use a number line to point and count from 1 to 4. 3. Activity: Count and Say the number of fishes, carrots	Number line, drawings on board/ manila paper, exercise books, , books, pens, chalks, etc	Pupils should be given oral questions and practical demonstratio n activities on Counting 1 to 4 objects.	Mathematic s book for Primary one (Page 4-5)	

				drawn in the pupil's book.				
	Lesson 8: Reading and writing the numbers 1, 2, 3, and 4 (2periods)	Read, and write the numbers 1, 2, 3, and 4.	Read One, Read two, Read three, Read Four, write 1, write 2, write 3, write 4,	1. Sing a song incorporating numbers up to 4. 2. Pupils write numbers up to 4. repeatedly with guidance. 3. Give pupils cards with 1 up to 4. , they must arrange themselves in order.	Number cards up to 4, chalkboard, song chart	Pupils should be given a Writing practice on Reading and writing the numbers 1, 2, 3, and 4.	Mathematics book for Primary one (Page 5)	
Week 3: 22-26/09/2025	Lesson 9: Counting 1 to 5 objects (1period)	Count objects up to 5 accurately.	Count One up to five.	1. Use a familiar song (e.g "Five Little Monkeys") to count to 5. 2. Count body parts: 1 nose, 2 eyes, 5 fingers on one hand. 3. Practical task: Count out 5 beans into a cup then	Song, body parts, real objects.	Pupils should be given oral questions and practical demonstration activities on Counting 1 to 5 objects.	Mathematics book for Primary one (Page 5)	

				count bicycles and bottles drawn in pupils 'book.				
	Lesson 10: Reading and writing the numbers 1, 2, 3, 4, and 5 (2periods)	Read, and write all numbers from 1 to 5.	Count numbers up to five. Write numbers 1 to 5.	1. Quick flashcard drill for numbers up to 5. 2. Guided writing practice for number 5. 3. Worksheet: Assign pupils in groups to match the numeral (1-5) to a group of pictures.	Flashcards, worksheets, pencils	Pupils should be given guided writing practice and Worksheet activities on Reading and writing the numbers 1, 2, 3, 4, and 5	Mathematics book for Primary one (Page 6-9)	
	Lesson 11: Comparing numbers of 5 or fewer than 5 objects (2periods)	Compare two groups of objects and use the terms "more than", "less than", and "equal to".	Use More, less, same number, is greater than ($>$), is less than ($<$), is equal to ($=$).	1. Use two groups of bottles tops. Ask: "Which group has more?" 2. Introduce vocabulary: " more than, less than ". 3. Pair work: Pupils create two groups with counters and compare them.	Counters, bottles tops, objects of different quantities	Pupils should be given oral questions, and practical activities on Comparing numbers of 5 or fewer than 5 objects	Mathematics book for Primary one (Page 9-12)	

Week 4: 29/09- 03/10/2025	Lesson 12: Ascending order of numbers from 1 to 5 (2periods)	Arrange numbers from the smallest to the biggest (1 to 5).	Ascending order, smaller, bigger, biggest, first, next, last.	1. Use a number line to show the order from 1 to 5. 2. Pupils line up in order based on number cards they are holding. 3. Worksheet: Write numbers 1-5 in ascending order.	Number line, number cards, worksheet, etc	Pupils should be given oral presentations, written and practical activities on arranging numbers up to 5 from the smallest to the biggest.	Mathematic s book for Primary one (Page 13)	
	Lesson 13: Descending order of	Arrange numbers from the biggest to the	Descending order, big, smaller, smallest	1. Use the number line to count backwards: 5, 4, 3, 2, 1.	Number line, number cards, worksheet,	Pupils should be given oral presentations, written and	Mathematic s book for Primary one (Page 13)	

	numbers from 1 to 5 (2periods)	smallest (5 to 1).		2. Game: "Number Jump" - Place number cards on the floor. Pupils jump from 5 to 1. 3. Worksheet: Write numbers 5-1 in descending order.	real objects.	practical activities on arranging numbers up to 5 from the biggest to the smallest.		
	Lesson 14: Addition of numbers whose sum is less than or equal to 5 (1period)	Combine two groups of objects and find the total (sum) up to 5.	Add numbers. Sign plus (+), Equals (=), total	1. Use real objects: "I have 2 apples. You give me 1 more. How many do I have now?" 2. Introduce the '+' and '=' signs using flashcards. 3. Solve simple problems like $2 + 1 = ?$ using counters.	Counters, objects, addition sign flashcard, equals sign flashcard, Number cards	Pupils should be given Practical demonstration that Combine two groups of objects and find the total (sum) up to 5.	Mathematics book for Primary one (Page 13-16)	
Week 5: 06-10/10/2025	Lesson 15: Word problems on the addition of numbers whose sum does not exceed 5.	Solve simple real-life word problems involving addition (sum ≤ 5).	Add, altogether, total	1. Teacher tells a simple story: "Nadia had 2 sweets. Her mother gave her 2 more. How many does she have altogether?" 2. Use drawings on	Drawings on board, pupils themselves	Pupils should be told model word problems stories on the addition of numbers whose sum	Mathematics book for Primary one (Page 17)	

	(1period)			the board to represent the story. 3. Pupils act out word problems using classmates. (e.g., 2 boys and 3 girls come to the board. How many children?)		does not exceed 5.		
	Lesson 16: Subtraction of numbers less than 5 (1period)	Find the difference between two groups of objects (up to 5) by taking away.	Subtract, take away, minus (-), left, remain	1. Practical demonstration: "I have 4 books. I give 1 to Sarah. How many are left?" 2. Introduce the '-' sign using a flashcard.	Counters, books, subtraction sign flashcard	Pupils should be given practical activities Subtraction of numbers less than 5.	Mathematics book for Primary one (Page 18-20)	
	Lesson 17: Word problem on subtraction of numbers less than 5 (1period)	Solve simple real-life word problems involving subtraction (within 5).	Solving problems Take away, left, remain	1. Teacher tells a story: "David had 5 marbles. He lost 2. How many does he have left?" 2. Pupils use counters to represent the starting amount and "take away" the subtracted amount.	Counters, drawings on board	Pupils should be given verbal subtraction problems on solving simple real-life word problems.	Mathematics book for Primary one (Page 20-21)	

				3. Draw the problem and write the number sentence.				
	End unit assessment (2periods)	Assess the understanding of all concepts covered in the unit (Numbers 1-5).	All key points from the unit	1. Teacher administers a written and practical assessment. 2. Assessment includes: counting objects, reading/writing numbers, comparing, ordering, and simple addition/subtraction.	Assessment papers, practical assessment materials (counters, etc.)	Pupils should be given written assessment. Observation of practical assessment.	Mathematics book for Primary one (Page 22-23)	

UNIT 2: NUMBERS FROM 1 TO 9 (25 Periods)

Key unit competence: Pupils will be able to count, read, write, order, compare, add, and subtract whole numbers from 1 to 9.

REB RWANDA BASIC
EDUCATION BOARD

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 6: 13-17/10/2025	Lesson 1: Introduction of the unit (1period)	Recognize the content of this unit and the importance of counting, reading and writing numbers in real life.	Numbers, counting, addition, subtraction, larger numbers	1. Teacher reviews numbers 1-5. 2. Teacher introduces the new unit and assigns pupils to observe the pictures given in the introductory activity 2.0 , ask them to answer related questions. 3. Brainstorm: "What can we do with bigger numbers?"	Drawing from pupil's book, number chart (1-9), chalk/whiteboard.	Pupils should be given pre-tests through oral questions on numbers up to 9.	Mathematics book for Primary one (Page 24)	
	Lesson 2: Counting 1 to 6 objects (1period)	Count objects up to 6 accurately	count up to six (1-6).	1. Count to 6 using pictures on page 25 2. Group activity: Pupils count out 6 beans into a cup. 3. Sing a counting song that includes the number 6.	Beans, cups, counting sticks, song chart, Fingers, pencils, books, stones, bottles, Pineapples, flowers, desks, pens, chalks, etc	Pupils should be given oral questions and guided practical activities on count objects up to 6.	Mathematics book for Primary one (Page 25)	

	Lesson3: Reading and writing the numbers from 1 to 6 (2periods)	Read, and write the numbers 1 through 6.	Numerals 1, 2, 3, 4, 5, 6	1. Use flashcards to drill numbers 1-6. 2. Focus on the formation of number 6. Practice writing in the air and on exercise books. 3. Matching game: Match groups of 1-6 dots to the correct numeral card.	Number flashcards (1-6), chalks, dot cards, exercise books, etc	Pupils should be given practical demonstration activities and written sheet on reading and writing the numbers from 1 to 6.	Mathematics book for Primary one (Page 26)	
	Lesson4: Counting 1 to 7 objects (1period)	Count objects up to 7 accurately.	Seven	1. Use a story: "The Seven cars and seven oranges". Count the the cars and oranges" in the picture on page 26. 2. Practical task: Pupils draw 7 circles in their books and count them. 3. Count around the class: pupils stand and count to 7 together.	Story book picture, exercise books, pencils, Fingers, Real objects	Pupils should be given oral and practical demonstration activities on Counting 1 to 7 objects.	Mathematics book for Primary one (Page26-27)	

Week 7: 20-24/10/2025	Lesson 5: Reading and writing the numbers from 1 to 7 (2periods)	Read, and write the numerals 1 through 7.	Numerals 1-7	1. Sing a number song for 1-7. 2. Writing practice: Trace and write numbers 1-7 with emphasis on number 7. 3. Activity: "Number Hunt" - Find and circle numbers 1-7 hidden in a puzzle.	Song chart, tracing worksheets, number puzzle worksheet, etc.	Pupils should be given writing practice and practical demonstration activities on Reading and writing the numbers from 1 to 7	Mathematics book for Primary one (Page 26-27)	
	Lesson 6: Counting 1 to 8 objects (1period)	Count objects up to 8 accurately.	Eight	1. Count the legs on a spider (picture or drawing). 2. Use a tens frame to place and count 8 counters. 3. Pupils work in pairs: one shows a number card (1-8), the other places that many counters.	Picture of a spider, counters, tens frames, number cards (1-8), Fingers, pencils, books, stones, bottles, Pineapples, flowers, desks, pens, chalks, etc	Pupils should be assessed through oral questions and practical activities on counting groups of objects up to 8	Mathematics book for Primary one (Page 27-28)	
	Lesson 7: Reading and writing the numbers from 1 to 8	Read, and write the numerals 1 through 8.	Numerals 1-8	1. Quick flashcard drill for numbers 1-8. 2. Practice writing number 8. Use the	Flashcards, exercise books, ordering worksheet	Pupils should be assessed through Writing practice and	Mathematics book for Primary one (Page 28)	

	(2periods)			phrase "Make an 'S' and close the gate" to help formation. 3. Worksheet: Order numbers 1-8 in a sequence.		practical activities on reading and writing the numbers from 1 to 8.		
Week 8: 27-31/10/2025	Lesson 8: Counting 1 to 9 objects (1period)	Count objects up to 9 accurately.	Nine	1. Count the number of children in a small group (up to 9). 2. Count the number of dots on a domino for 9. 3. Action song: "Number Rock" - do an action (e.g., jump) 9 times.	counters, song, Fingers, pencils, books, stones, bottles, Pineapples, flowers, desks, pens, chalks, etc	Pupils should be assessed Orally and practically on Counting 1 to 9 objects.	Mathematics book for Primary one (Page 28-29)	
	Lesson 9: Reading and writing the numbers from 1 to 9 /2periods	Read, and write all numerals from 1 to 9.	Numerals 1-9	1. Full number drill with flashcards 1-9. 2. Writing practice: Write numbers 1-9 in sequence. 3. Game: "Bingo" using numbers 1-9.	Flashcards, bingo cards and counters, exercise books	Pupils should be assessed through Writing practice and practical activities on reading and writing the numbers from 1 to 8.	Mathematics book for Primary one (Page 29-31)	

	Lesson 10: Comparing numbers of 9 or fewer than 9 objects (1period)	Compare two groups of objects (up to 9) and identify which has more or less.	More than, less than, fewer, greater	1. Use two piles of counters. Ask: "Which pile has more? How do you know?" (Guide to counting to compare). 2. Introduce the language "greater than" and "fewer than". 3. Worksheet: Circle the group that has more objects.	Counters, comparing worksheets	Pupils should be given Writing practice and practical activities on Comparing numbers of 9 or fewer than 9 objects.	Mathematics book for Primary one (Page 32-34)	
	Lesson 11: Comparing numbers from 1 to 9 (1period)	Compare two numerals between 1 and 9 using the symbols =, < and >.	Greater than (>), Less than (<), Equal to (=).	1. Introduce the "greater than" and "less than" symbols as a crocodile's mouth that always eats the bigger number. 2. Use number cards and a printed symbol to make simple statements (e.g., $5 > 3$). 3. Pupils practice writing the symbols	Large printed =, < and > symbols, number cards, whiteboards	Pupils should be given Writing practice and practical activities on comparing numbers from 1 to 9.	Mathematics book for Primary one (Page 32-34)	

				and creating their own number comparisons.				
Week 9: 03-07/11/2025	Lesson 12: Ascending order of numbers from 1 to 9 (2periods)	Arrange a set of numbers from 1 to 9 in ascending order (smallest to greatest).	Ascending order, smallest, greatest, order	1. Use a number line to reinforce the order of numbers. 2. Give pupils number cards (1-9) and have them physically arrange themselves in order. 3. Worksheet: Write given numbers in ascending order.	Number line, number cards, worksheet	Pupils should be given activities involving ascending order of numbers from 1 to 9 (smallest to greatest).	Mathematics book for Primary one (Page 34)	
	Lesson 13: Descending order of numbers from 9 to 1 (2periods)	Arrange a set of numbers from 9 to 1 in descending order (greatest to smallest).	Descending order, greatest, smallest	1. Count backwards from 9 to 1 as a class. 2. Game: " Number Line Jump Back " - jump from 9 to 1 on a number line on the floor. 3. Worksheet: Write given numbers in descending order.	Floor number line, worksheet	Pupils should be given worksheet To complete the Descending order of numbers from 9 to 1	Mathematics book for Primary one (Page 34)	
	Lesson 14: Addition of numbers	To solve addition problems	Add, plus, sum, total, equals	1. Revise addition using counters for problems like 4+3,	Counters, number line, whiteboards	Pupils should be given written and	Mathematics book for Primary one	

	whose sum does not exceed 9 (1period)	with two addends where the sum is 9 or less.		5+2, etc. 2. Practice writing the number sentences for the problems they solve. 3. Use a number line to show how to "jump" forward to add.		practical activities on addition of numbers whose sum does not exceed 9.	(Page 35-36)	
Week 10: 10-14/11/2025	Lesson 15: Word problems on the addition of numbers whose sum does not exceed 9 (1period)	Solve simple word problems involving addition within 9.	Altogether, in all, total, sum	1. Teacher presents word problems involving red and blue pens on page 37. 2. Pupils use counters or drawings to represent the problem. 3. Pupils write the corresponding number sentence.	Counters, drawing materials	Pupils should be given word problems on the addition of numbers whose sum does not exceed 9	Mathematics book for Primary one (Page37)	
	Lesson 16: Subtraction of numbers whose difference is less than 9	Solve subtraction problems within 9 using the "take	Subtract, take away, minus, difference, left	1. Use stories involving taking away: "I have 8 sweets. I eat 2. How many are left?" 2. Practice using	Counters, objects, subtraction flashcard	Pupils should be given written and practical activities on Subtraction of	Mathematics book for Primary one (Page 38 - 39)	

	(2periods)	away" model.		counters to physically remove items and find what remains. 3. Practice writing subtraction number sentences (e.g., $8 - 2 = 6$).		numbers whose difference is less than 9.		
	Lesson 17: Word problems on subtraction of numbers less than 9 (1period)	Solve simple word problems involving subtraction within 9.	How many left? How many remain? Take away	1. Teacher presents word problems on page 39 in the pupils 'book. 2. Pupils act out the problems or draw them. 3. Pupils write the number sentence for each problem.	Dramatization, drawing paper	Pupils should be given activities that involve solving simple subtraction. real-world problem less than 9.	Mathematics book for Primary one (Page 39 & 40)	
	End unit assessment (1period)	Assess mastery of numbers 1-9, including counting, reading, writing, comparing,	All concepts from the unit	1. Teacher administers a written test covering all learning objectives from the unit. 2. The test includes counting objects, reading/writing	Assessment papers	Pupils should be given Standardized tests through written test to identify areas needing reinforcement.	Mathematics book for Primary one (Page 40 & 41)	

		ordering, adding, and subtracting.		numbers, comparing, ordering, and simple addition/subtraction.				
--	--	--	--	---	--	--	--	--

UNIT 3: NUMBERS FROM 0 TO 10 (5 Periods)

Key unit competence: Pupils will be able to count, read, write, order, compare, add, and subtract whole numbers from 0 to 10.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 11: 17- 21/11/2025	Lesson 1: Introduction of the unit and the concept of zero (1period)	Recognise the content of the unit and the importance of whole numbers from 0 to 10 numbers in real life.	Zero, 0, nothing, none, empty	1. Teacher introduces the new unit on numbers 0-10. 2. Demonstrate 'zero': Show an empty container. "How many sweets are inside? Zero."	Empty box, cup, pictures showing 'none' (e.g., an empty plate)	Pupils should be given oral questions and practical activities on numbers from 0 to 10.	Mathematics book for Primary one (Page 42)	

REB RWANDA BASIC
EDUCATION BOARD

				3. Pupils find examples of 'zero' in the classroom (e.g., zero people in a corner, zero books on a specific desk).				
	Lesson 2: Counting, reading, and writing the numbers from 0 to 10 (1period)	Count, identify, read, and write numerals from 0 to 10.	Numbers 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10	1. Count from 0 to 10 as a class using a P1 pupil 's book pictures from the pages indicated. 2. Focus on reading and writing the number up to 10. 3. Activity: Match numeral cards (0-10) to cards with corresponding	Number line (0-10), number cards, dot cards, exercise books, Real objects around the classroom.	Pupils should be given oral and practical tasks on counting, reading and writing the numbers from 0 to 10.	Mathematics book for Primary one (Page 42-45)	

				number of dots.				
	Lesson 3: Comparing numbers from 1 to 10 (1period)	Compare any two numbers between 0 and 10 using the terms 'greater than', 'less than', and 'equal to'.	Greater than (>), Less than (<), Equal to (=)	1. Revise the crocodile mouth symbols (<, >) for comparing numbers. 2. Use number cards : pupils choose two cards and place the correct symbol between them. 3. Worksheet: Circle the greater number in pairs (e.g., 8 or 10).	Number cards (0-10), printed <, >, = symbols, worksheet	Pupils should be given practical demonstration and written activities on Comparing numbers from 1 to 10	Mathematics book for Primary one (Page 46&47)	
	Lesson 4: Addition and subtraction of	Solve mixed addition and subtraction	Add, subtract, plus,	1. Use real-world examples:	Counters, marbles,	Pupils should be given oral, written and practical demonstration	Mathematics book for Primary one	

	numbers less than or equal to 10 (1period)	problems within 10.	minus, equals	"You have 10 marbles. You give 4 to a friend. How many are left? Then, you find 2 more. How many do you have now?" 2. Practice writing both addition and subtraction number sentences. 3. Quick-fire quiz: Teacher gives simple + and - problems, pupils solve on whiteboards.	whiteboards, markers	activities on addition and subtraction of numbers less than or equal to 10	(Page 48-55)	
	End unit assessment (1period)	Assess understanding of all concepts in Unit 3 (0-10).	All key points from the unit	1. Teacher administers a short written assessment covering counting,	Assessment papers	Pupils should be given Standardized tests through written test to identify areas needing reinforcement in Unit3 (0-10).	Mathematics book for Primary one (Page 56)	

				reading, writing, comparing, adding and subtracting numbers 0- 10.				
--	--	--	--	--	--	--	--	--

UNIT 4: NUMBERS FROM 0 TO 20 (10/15 Periods)

Key unit competence: Pupils will be able to count, read, write, order, compare, add, and subtract whole numbers from 0 up to 20.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 12: 24- 28/11/2025	Lesson 1: Introduction of the unit (1period)	Recognize the content of the unit and the importance of counting, reading and writing	Numbers, twenty, counting, tens	1. Teacher introduces the unit on numbers up to 20. 2. Count to 20 as a class using actions	Number chart (1-20), chalk/whiteboard	Pupils should be given oral recap and discussions about prior experiences on numbers up to 20.	Mathematics book for Primary one (Page 58)	

REB RWANDA BASIC
EDUCATION BOARD

		numbers up to 20 in real life.		(clapping, stomping). 3. Discuss why knowing numbers beyond 10 is useful (e.g., counting all classmates, your age).				
	Lesson 2: Counting 1 to 20 objects (1period)	Count objects up to 20 accurately using grouping strategies.	Count, group, twenty	1. Ask pupils to make a group of 10 similar objects and add 1 more object until they have 20 objects. 2. Count objects in groups of 5 or 10 to make it easier (e.g., 2 groups of 5 counters is 10). 3. Sing a counting song	Counters, pencils, beans, song chart	Pupils should be given oral and practical tasks on counting to 20 objects.	Mathematics book for Primary one (Page 59-70)	

				that goes up to 20. 4. Ask pupils to put together all objects and count them 5. In small groups, pupils look at the pictures in the pupil's book and count the objects drawn in it.				
	Lesson3: Reading and writing the numbers from 0 to 20 (1period)	Read, and write numerals from 0 to 20.	Numerals 11-20, eleven, twelve, thirteen... twenty	1. Focus on the 'teen' numbers and twenty. Practice pronunciation. 2. Highlight patterns in the words (e.g., seven-teen, eigh-teen). 3. Tracing and writing practice for	Number flashcards with numbers 1 to 20, tracing worksheets, exercise books, different pictures in the pupil's book, wall charts containing objects and numbers from 0 to 20, chalkboard, chalks, books,	Pupils should be given written and practical tasks on reading and writing the numbers from 0 to 20.	Mathematics book for Primary one (Page 59-71)	

				numbers 11-20.	notebooks, pens and any other counters or real objects for counting available in the school environment.			
	Lesson 4: Decomposition of numbers from 10 to 20 into ones and tens (1period)	Break down numbers from 10 to 20 into tens and ones to understand place value.	Tens, ones, place value	1. Use bundles of sticks: 10 sticks tied together is a 'ten', loose sticks are 'ones'. Show 14 as 1 ten and 4 ones. 2. Pupils use pre-made tens and ones blocks to build numbers like 13, 16, 19. 3. Practice writing numbers as "1 ten and 5 ones = 15".	Bundles of sticks/straws (tens), loose sticks (ones), place value charts	Pupils should be given written and practical activities on decomposition of numbers from 10 to 20 into ones and tens.	Mathematics book for Primary one (Page 72-74)	

REB RWANDA BASIC
EDUCATION BOARD

	Lesson 5: Comparing numbers from 0 to 20 (1period)	Compare any two numbers between 0 and 20 using <, >, and =. , ask them to write and compare the numbers of objects using symbols (refer to pupil's book).	Greater than, less than, equal to, compare	1. Use the tens and one's concept: "17 is 1 ten and 7 ones, 12 is 1 ten and 2 ones. So 17 is greater than 12." 2. Using different prompting questions, help pupils to understand and discover how to compare numbers from 0 to 20. 3. Request pupils to count, write and compare the numbers of objects in different groups by showing a group with	Number cards (0-20), place value materials, 5. Worksheets on comparing numbers.	Pupils should be given written and practical activities comparing numbers from 0 to 20.	Mathematics book for Primary one (Page 74- 75)	
--	--	--	--	--	--	--	--	--

				many, less or equal objects. 4. In small groups, ask pupils to observe pictures in the pupil's book. Then, make 2 groups of similar objects but with different number of objects: one group with many objects and another group with few objects.				
Week 13: 01- 05/12/2025	Lesson 6: Ascending and descending order of numbers from 0 to 20 (2periods)	Order a set of numbers from 0 to 20 in both ascending and descending order.	Ascending order, descending order, smallest, largest	1. Use a number line to visualize the order of numbers from 0 to 20. 2. Activity: Give 5 pupils	Large number line, number cards, worksheet	Through Practical demonstrations Pupil should be able to order a set of numbers from 0 to 20 in both	Mathematics book for Primary one (Page 76)	

				number cards (e.g., 11, 14, 18, 12, 20). Class directs them to arrange themselves in ascending, then descending order. 3. Worksheet: Order sets of 4-5 numbers.		ascending and descending order.		
	Lesson 7: Addition of numbers whose sum does not exceed 20 (1period)	Solve addition problems within 20, using knowledge of tens and ones.	Add, plus, sum, total	1. Use tens and ones blocks to add: $13 + 4 = 1$ ten and $(3+4)$ ones = 1 ten and 7 ones = 17. 2. Practice adding a two-digit number and a one-digit number without regrouping. 3. Practice	Tens and ones blocks, place value charts, whiteboards	Through Question-and-answer sessions, Pupils should be able to add numbers whose sum does not exceed 20	Mathematics book for Primary one (Page 76)	

REB RWANDA BASIC
EDUCATION BOARD

				writing the number sentences.				
	Lesson 8: Word problems on the addition of numbers whose sum does not exceed 20 (1period)	Solve simple word problems involving addition within 20.	Altogether, in all, total, sum	1. Read a word problem: "There are 10 boys and 8 girls in the class. How many pupils are there altogether?" 2. Pupils use blocks or drawings to represent the problem (1 ten + 8 ones). 3. Pupils write the number sentence (10 + 8 = 18).	Drawing materials, tens and ones blocks	Pupils should be given written real-world stories on Solving simple word problems on the addition of numbers whose sum does not exceed 20.	Mathematics book for Primary one (Page 77)	
	Lesson 9: Subtraction of numbers less than 20 (1period)	Solve subtraction problems within 20, using knowledge of	Subtract, take away, minus, difference	1. Use tens and ones blocks to subtract: 16 - 4 = 1 ten and 6 ones, take	Tens and ones blocks, place value charts	Pupils should be given written real-world stories and Practical demonstrations	Mathematics book for Primary one (Page 77-78)	

		tens and ones.		away 4 ones = 1 ten and 2 ones = 12. 2. Practice subtracting a one-digit number from a two-digit number without regrouping. 3. Practice writing the subtraction number sentences.		on subtraction of numbers less than 20.		
Week 14: 08-12/12/2025	Exams of term 1							
Week 15: 15-19								

Teacher's Name:.....
School Name:.....
Class: P 1....
Subject: MATHEMATICS

Academic year:.....
Term: 2
No weeks per term: 13
Number of periods per week: 5periods

UNIT 4: NUMBERS FROM 0 TO 20 (5/15 Periods)

Key unit competence: Pupils will be able to count, read, write, order, compare, add, and subtract whole numbers from 0 up to 20.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches.	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 1: 05-09/01/2026	Lesson 10: Word problem on subtraction of numbers less than 20 (2periods)	Solve simple word problems involving subtraction within 20.	How many left? How many remain? Take away, difference	1. Read problems: "There are 18 birds. 5 fly away. How many are left?" 2. Pupils use tens and ones blocks to act out the problem. 3. Pupils write the corresponding number sentence ($18 - 5 = 13$).	Tens and ones blocks, word problem cards	Pupils should be given written real-world stories and practical demonstrations on solving simple word problems on subtraction of numbers less than 20.	Mathematics book for Primary one (Page 79)	
	Lesson 11: Addition and subtraction of 2 numbers less than 20	Solve mixed addition and subtraction problems within 20.	Add, subtract, plus, minus, equals	1. Use number stories: "Olive gets 16 sweets from her mother and her brother add 2 more sweets. How many	Number line, counters, dice	Pupils should be given written real-world stories and practical demonstrations	Mathematics book for Primary one (Page 76-79)	

	(2periods)			sweets does Olive have altogether? 2. Practice: Using real objects (e.g chalks), ask pupils to make a group of 19 and then take away 7. Ask them to count, say and write the number of the remaining. 3. Roll play: Use number stories: "You have 15 Frw. You spend 4 Frw. Then you earn 3 Frw. How much do you have now?" (15-4+3=14). 4. Practice solving mixed problems using number lines or counters.		on mixed operations problem.		
	End unit assessment (1period)	Assess the understanding of all concepts covered in the	All key points from the unit	1. Teacher administers a written and practical assessment. 2. Assessment	Assessment papers, practical assessment materials	Pupils should be assessed through written and practical	Mathematics book for Primary one (Page 79-81)	

		unit (Numbers 1-20).		includes: counting objects, reading/writing numbers, comparing, ordering, and simple addition/subtraction.	(counters, etc.)	activities to assess the understanding of all concepts covered in the unit.		
--	--	-------------------------	--	--	------------------	---	--	--

UNIT 5: NUMBERS FROM 0 TO 50 (20 periods)

Key unit Competence: Pupils will be able to count, read, write, order, compare, add, and subtract whole numbers from 0 up to 50.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 2: 12-16/01/2026	Lesson 1: Introduction of the unit (1period)	Recognize the content of this unit and the importance of counting, reading and writing numbers in real life.	Numbers, fifty, counting	1. Teacher introduces the unit. Count to 50 as a class with teacher leading. 2. Look at a 100-chart and point out numbers 1-50. 3. Discuss where we see numbers this big (e.g., number of children in a few classes).	100-chart, chalk/whiteboard, Chalkboard, chalk, notebooks, pens, sticks, dices, charts containing pictures of groups of objects, number cards containing numbers from 1 to 20.	Pupils should be given oral questions and practical activities on numbers from 0 to 50.	Mathematics book for Primary one (Page 89)	

REB RWANDA BASIC
EDUCATION BOARD

Lesson 2: Counting 1 to 30 objects (1period)	Count objects up to 30 accurately, grouping in tens.	Thirty, group, tens, ones	1. Count objects in groups of ten. e.g., 3 groups of 10 counters is 30. 2. Class activity: Count all the books on a shelf (if around 30). 3. Sing counting songs up to 30.	Counters, bundles of 10 sticks, Chalkboard, chalk, notebooks, pens, sticks, dices, pupil's book, charts containing pictures of groups of objects, number cards containing numbers from 1 to 20.	Pupils should be given oral questions and guided practical activities on counting 1 to 30 objects.	Mathematics book for Primary one (Page 90-92)	
Lesson 3: Reading and writing numbers from 0 to 30 (1period)	Correctly read and write numerals from 0 to 30.	Twenty, thirty, numerals	1. Practice writing the 'ty' numbers (twenty, thirty). 2. Focus on the pattern: twenty-one, twenty-two... twenty-nine. 3. Worksheet: Fill in the missing numbers on a number line from 20-30.	Flashcards (20-30), number line (0-30), worksheet	Pupils should be given written and practical tasks on reading and writing the numbers from 0 to 30.	Mathematics book for Primary one (Page 91-92)	

	Lesson 4: Counting 1 to 40 objects (1period)	Count objects up to 40 accurately.	Forty	1. Count to 40 using the 100-chart, pointing to each number. 2. Practical task: Count out 40 seeds into a cup, making groups of 10. 3. Marching game: March on the spot and count to 40.	100-chart, seeds, cups	Pupils should be given oral and practical activities on Counting 1 to 40 objects.	Mathematics book for Primary one (Page 92-93)	
	Lesson 5: Reading and writing numbers from 0 to 40 (1period)	Correctly read and write numerals from 0 to 40.	Forty, numerals	1. Drill numbers 30-40. Highlight the spelling of 'forty'. 2. Writing practice: Write numbers 31 to 40 in sequence. 3. Matching: Match number words (e.g., "thirty-five") to the numeral (35).	Number word cards, numeral cards, exercise books	Pupils should be given written and practical tasks on reading and writing the numbers from 0 to 40.	Mathematics book for Primary one (Page 93-94)	
Week 3: 19-23/01/2026	Lesson 6: Counting 1 to 50 objects (1period)	Count objects up to 50 accurately.	Fifty	1. Count to 50 as a class. Use a song or a chant. 2. Count objects in the classroom estimated to be around 50 (e.g.,	100-chart, objects in the room	Pupils should be given oral and practical activities on Counting 1 to 50 objects.	Mathematics book for Primary one (Page 94-95)	

				floor tiles). 3. Pupils draw 50 simple shapes (e.g., stars) in their books and count them.				
	Lesson 7: Reading and writing the numbers from 0 to 50 (1period)	Correctly read and write all numerals from 0 to 50.	Numerals 0-50	1. Quick flashcard drill for numbers 40-50. 2. Writing practice: Write numbers 1-50 in a list with guidance. 3. Game: "Number Bingo" for numbers 1-50.	Flashcards, bingo cards, exercise books	Pupils should be given written and practical tasks on reading and writing the numbers from 0 to 50.	Mathematics book for Primary one (Page 95 - 96)	
	Lesson 8: Decomposition of numbers from 10 to 50 into ones and tens (1period)	Break down numbers from 10 to 50 into tens and ones.	Tens, ones, place value	1. Use bundles of sticks: 4 bundles of ten and 5 loose sticks is 45. 2. Use a place value chart and place value blocks (Dienes blocks). 3. Practice stating numbers as "___ tens and ___ ones".	Bundles of sticks, Dienes blocks, place value charts	Pupils should be given written and practical activities on decomposition of numbers from 10 to 50 into ones and tens	Mathematics book for Primary one (Page 96-99)	
	Lesson 9: Comparing numbers from	Compare and order numbers up to	Greater than, less than,	1. Compare numbers by looking at tens first: 3 tens	Large floor number line,	Pupils should be given written and	Mathematics book for Primary one	

	0 to 50 and arranging them in ascending and descending order (2periods)	50 using place value understanding .	order, smallest, largest	is always more than 2 tens. 2. Game: "Number Line Race" - place number cards (0-50) in the correct order on a large floor line. 3. Worksheet on comparing and ordering sets of numbers.	number cards, worksheet	practical activities on comparing numbers from 0 to 50 and arranging them in ascending and descending order.	(Page 100-101)	
Week 4&5: 26-30/01/2026 & 02-06/02/2026	Lesson 10: Addition of numbers whose sum does not exceed 50 (2periods)	Add numbers within 50, using concrete materials and place value.	Add, plus, sum, total	1. Add using tens and ones: $20+15 = 2 \text{ tens} + (1 \text{ ten} + 5 \text{ ones}) = 3 \text{ tens} + 5 \text{ ones} = 35$. 2. Practice vertical addition with and without regrouping (carrying over) at a basic level. 3. Use number lines for addition.	Dienes blocks, place value charts, number lines	Pupils should be given written and practical activities on addition of numbers whose sum does not exceed 50	Mathematics book for Primary one (Page 101-102)	
	Lesson 11: Word problems involving the addition of	Solve word problems involving addition within 50.	Altogether, in all, total, sum	1. Read problems: "A farmer has 20 cows and 15 goats. How many animals does he have	Word problem cards, drawing materials	Pupils should be given written and practical activities on	Mathematics book for Primary one (Page102)	

	numbers whose sum does not exceed 50 (2periods)			altogether?" 2. Pupils underline key words and use blocks or drawings to solve. 3. Pupils write the number sentence and answer.		Word problems involving the addition of numbers whose sum does not exceed 50		
	Lesson 12: Subtraction of numbers less than 50 (2periods)	Subtract numbers within 50, using concrete materials and place value.	Subtract, take away, minus, difference	1. Subtract using tens and ones: $45 - 12 = 4 \text{ tens \& } 5 \text{ ones}$, take away 1 ten & 2 ones = 3 tens & 3 ones = 33. 2. Practice vertical subtraction without regrouping. 3. Use number lines for subtraction.	Dienes blocks, place value charts, number lines	Practical demonstration with blocks for a given subtraction problem.	Mathematics book for Primary one (Page103)	
	Lesson 13: Word problem involving subtraction of numbers less than 50 (2periods)	Solve word problems involving subtraction within 50.	How many left? How many remain? Difference	1. Read problems: "There are 48 students. 10 are absent. How many are present?" 2. Pupils act out problems or represent them with	Word problem cards, Dienes blocks	Pupils should be given written real-world stories and practical demonstrations on solving simple word	Mathematics book for Primary one (Page106)	

				blocks. 3. Pupils write the number sentence and answer.		problems on subtraction of numbers less than 20.		
	End unit assessment (2periods)	Assess the understanding of all concepts covered in the unit (Numbers 1-50).	All key points from the unit	1. Administers a written and practical assessment. 2. Assessment includes: counting objects, reading/writing numbers, comparing, ordering, and simple problems involving addition/subtraction .	Assessment papers, practical assessment materials (counters, etc.)	Pupils should be assessed through written and practical to assess the understanding of all concepts covered in the unit (Numbers 1-50).	Mathematics book for Primary one (Page 104-106)	

UNIT 6: NUMBERS FROM 0 TO 100 (20 Periods)

Key unit competence: Pupils will be able to count, read, write, order, compare, add and subtract whole numbers from 0 up to 99.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 6: 09-13/02/2026	Lesson1: Introduction of the unit (1period)	Recognize the content of this unit and the importance of counting, reading and writing numbers in real life.	One hundred, counting, numbers	1. Introduces the unit. Count to 100 as a class using a song or a chart. 2. Discuss the importance of numbers up to 100 (e.g., age of grandparents, large groups). 3. Explore a 100-chart and identify patterns.	100-chart, number song audio/video	Pupils should be given oral questions and practical activities on numbers from 0 to 100.	Mathematics book for Primary one (Page107)	
	Lesson2: Counting 1 to 60 objects (1period)	Count objects up to 60 accurately by grouping in tens.	Sixty, groups of ten, count	1. Count objects by making groups of ten. 6 groups of 10 is 60. 2. Class activity: Count a large number of small items (e.g., beans)	Beans, cups, counting sticks	Pupils should be given oral questions and guided practical activities on counting 1 to 60 objects.	Mathematics book for Primary one (Page 107)	

				together, grouping as they go. 3. Practice counting by 10s up to 60.				
	Lesson 3: Reading and writing the numbers from 0 to 60 (1period)	Read and write numerals from 0 to 60.	Sixty, numerals	1. Focus on writing numbers 50-60. Practice the pattern: fifty-one, fifty-two... fifty-nine, sixty. 2. Dictation exercise: Teacher says numbers, pupils write them. 3. Worksheet: Complete number sequences within 60.	Flashcards (50-60), exercise books, worksheet	Pupils should be given written and practical tasks on reading and writing the numbers from 0 to 60.	Mathematics book for Primary one (Page 108)	
	Lesson 4: Counting 1 to 70 objects (1period)	Count objects up to 70 accurately.	Seventy	1. Use the 100-chart to count from 60 to 70 together. 2. Practical task: In pairs, pupils count 70 counters, making 7 groups of 10. 3. Sing a counting song that includes numbers to 70.	100-chart, counters	Pupils should be given oral questions and guided practical activities on counting 1 to 70 objects.	Mathematics book for Primary one (Page 108)	

	Lesson5: Reading and writing the numbers from 0 to 70 (1period)	Read and write numerals from 0 to 70.	Seventy, numerals	1. Drill numbers 60-70. Practice spelling 'sixty' and 'seventy'. 2. Writing practice: Write numbers 61 to 70 in words and numerals. 3. Game: "Number Snap" with cards from 50-70.	Number cards (50-70), whiteboards	Pupils should be given written and practical tasks on reading and writing the numbers from 0 to 70.	Mathematics book for Primary one (Page 108 - 109)	
Week 7: 16-20/02/2026	Lesson6: Counting 1 to 80 objects (1period)	Count objects up to 80 accurately.	Eighty	1. Count to 80 by ones as a class, using the 100-chart for support. 2. Activity: "Estimate and Count" - pupils estimate a group of items (e.g., 80 seeds), then count to check. 3. Count by 10s to 80.	100-chart, seeds, small containers	Pupils should be given oral questions and guided practical activities on counting 1 to 80 objects.	Mathematics book for Primary one (Page109)	
	Lesson7: Reading and writing numbers from 0 to 80 /1period	Read and write numerals from 0 to 80.	Eighty, numerals	1. Focus on numbers 70-80. Practice writing them. 2. Activity: Match number words (e.g.,	100-chart, matching cards	Pupils should be given written and practical tasks on reading and writing the	Mathematics book for Primary one (Page109)	

				"seventy-eight") to their numerals (78). 3. Fill in missing numbers on a 100-chart from 70-80.		numbers from 0 to 80.		
	Lesson 8: Counting 1 to 90 objects (1period)	Count objects up to 90 accurately.	Ninety	1. Count to 90 as a class. Use a movement game (e.g., jump 90 times). 2. Use base-ten blocks to show 90 as 9 tens. 3. Count objects around the school (e.g., windows, chairs) in large groups.	Base-ten blocks (Dienes blocks)	Pupils should be given oral questions and guided practical activities on counting 1 to 90 objects.	Mathematics book for Primary one (Page 110)	
	Lesson 9: Reading and writing the numbers from 0 to 90 (1period)	Read and write numerals from 0 to 90.	Ninety, numerals	1. Practice the number names for 80-90. Highlight the pattern. 2. Writing practice: Write numbers 81 to 90 in sequence. 3. Game: "Number Bingo" for numbers 70-90.	Bingo cards, exercise books	Pupils should be given written and practical tasks on reading and writing the numbers from 0 to 90.	Mathematics book for Primary one (Page 110)	

	Lesson10: Counting 1 to 100 objects and reading and writing numbers from 0 to 99 (1period)	Count objects up to 100 and read/write all numerals from 0 to 99.	One hundred, ninety-nine, numerals	1. Celebrate reaching 100! Count to 100 as a class with great excitement. 2. Use a 100-chart to practice reading all numbers. 3. Activity: Write the numbers from 90 to 99. Discuss what comes after 99.	100-chart, celebration items (e.g., sticker)	Pupils should be given oral questions and guided practical activities on counting 1 to 99 objects.	Mathematics book for Primary one (Page110)	
Weeks 8 & 9: 23-27/02 & 02-06/03/2026	Lesson11: Decomposition of 2-digit numbers from 10 to 99 into ones and tens (2periods)	Break down any 2-digit number into its tens and ones.	Tens, ones, place value, digit	1. Use base-ten blocks to represent numbers like 67 (6 tens and 7 ones). 2. Practice with a place value mat: pupils build numbers and write the breakdown. 3. Game: "Guess My Number" - teacher describes tens and ones, pupils guess the number.	Base-ten blocks, place value mats	Pupils should be given written and practical activities on Decomposition of 2-digit numbers from 10 to 99 into ones and tens	Mathematics book for Primary one (Page110&113)	

	Lesson12: Comparing and arranging in ascending and descending orders numbers from 1 to 99 (2periods)	Compare and order any numbers up to 99 using place value.	Greater than, less than, order, compare	1. Compare numbers by looking at the tens digit first, then the ones. 2. Activity: Pupils line up in order based on large number cards (0-99). 3. Worksheet: Order sets of numbers from smallest to largest and vice versa.	Large number cards, worksheet	Pupils should be given written and practical activities on Comparing and arranging in ascending and descending orders numbers from 1 to 99	Mathematics book for Primary one (Page113-114)	
	Lesson13: Addition and Word problems on addition of numbers whose sum does not exceed 99 (2periods)	Add numbers within 99 and solve related word problems.	Add, sum, total, altogether	1. Add numbers using base-ten blocks, combining tens and ones. 2. Introduce vertical addition with regrouping (carrying) using concrete materials. 3. Solve word problems involving addition up to 99.	Base-ten blocks, word problem cards	Through guided and written activities, Pupils should be able to solve the word problem involving addition of numbers whose sum does not exceed 99 .	Mathematics book for Primary one (Page115-116)	

	Lesson14: Subtraction of numbers less than 99 and word problems (2periods)	Subtract numbers within 99 and solve related word problems.	Subtract, difference, take away, left	1. Subtract using base-ten blocks, exchanging a ten for ten ones if needed. 2. Practice vertical subtraction with regrouping (borrowing) concretely. 3. Solve word problems involving subtraction up to 99.	Base-ten blocks, word problem cards	Pupils should be given written and practical activities on Subtraction of numbers less than 99 and word problems	Mathematics book for Primary one (Page117-118)	
	End unit assessment /2periods	Assess the understanding of all concepts covered in the unit (Numbers 1-100).	All key points from the unit	1. Teacher administers a written and practical assessment. 2. Assessment includes: counting objects, reading/writing numbers, comparing, ordering, and simple addition/subtraction.	Assessment papers, practical assessment materials (counters, etc.)	Pupils should be assessed through written and practical to assess the understanding of all concepts covered in the unit (Numbers 1-100).	Mathematics book for Primary one (Page119-120)	

UNIT 7: NUMBER PATTERNS (10 Periods)

Key unit competence: Pupils will be able to find the missing number in a number pattern of 1-digit numbers or 2-digits numbers.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches.	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 10: 09- 13/03/2026	Lesson 1: Introductory activity (1period)	Recognize the content of the unit and the importance of counting, reading and writing numbers in real life.	Pattern, repeat, order, sequence	1. Teacher shows patterns using shapes, colors, and sounds (e.g., clap-clap-stomp). 2. Pupils identify and extend simple physical and visual patterns. 3. Introduce the idea that numbers can also be arranged in patterns.	Pattern blocks, beads, sound instruments	Through oral and practical activities pupils should be aware the content of the unit.	Mathematics book for Primary one (Page128)	
	Lesson 2: Ordinal numbers (1period)	Use ordinal numbers (1st to 10th) to describe position.	First, second, third, fourth, fifth, sixth, seventh,	1. Line up 10 pupils at the front. Assign and discuss their ordinal positions (Who is first? fifth?). 2. Use pictures of races or queues to identify	Pupils, pictures of sequences, worksheet	During Observation of practical activities, pupils should be able to use ordinal	Mathematics book for Primary one (Page128-129)	

			eighth, ninth, tenth, position	ordinal positions. 3. Worksheet: Colour the 3rd object, circle the 1st object, etc.		numbers (1st to 10th) to describe position.		
	Lesson 3: Meaning of a number pattern and common difference in a number pattern involving addition (2periods)	Identify a number pattern and Determine the rule of adding a fixed number.	Number pattern, rule, sequence, add, increase, common difference	1. Show a simple pattern on a number line: 2, 4, 6, 8, ____. Ask what rule is being used (add 2). 2. Teacher defines "common difference" as the number we add each time. 3. Pupils practice identifying the common difference in given patterns (e.g., 5, 10, 15, 20 → +5).	Number line, number cards, whiteboards	Through practical activities, pupils should be able to identify the rule and state the common difference.	Mathematics book for Primary one (Page130)	
	Lesson 4: Completing a missing number in a number pattern (repeated addition) (1period)	Find a missing term in a number pattern based on addition.	Missing number, pattern, extend	1. Use patterns with a missing number in the middle or at the end: 3, 6, __, 12, 15. 2. Pupils use the common difference to calculate the missing number. 3. Worksheet: Complete multiple	Worksheets with number patterns, counters (to help count)	Pupils should be given Completion and accuracy of the worksheet to Find a missing term in a number pattern based on addition.	Mathematics book for Primary one (Page130- 131)	

				number patterns that use addition.				
Week 11: 16- 20/03/2026	Lesson 5: Meaning of a number pattern and common difference in a number pattern involving subtraction (2periods)	Identify a number pattern and determine the rule of subtracting a fixed number.	Number pattern, rule, sequence, subtract, decrease, common difference	1. Show a pattern: 20, 18, 16, 14, _____. Ask what rule is being used (subtract 2). 2. Explain that the common difference can also be found by subtraction. 3. Pupils practice identifying the common difference in descending patterns.	Number line (showing backwards), number cards	Pupils should be given a descending pattern to identify a number pattern and determine the rule of subtracting a fixed number.	Mathematics book for Primary one (Page131)	
	Lesson 6: Completing a missing number in a pattern (repeated subtraction) (2periods)	Find a missing term in a number pattern based on subtraction.	Missing number, pattern, extend	1. Use patterns with a missing number: 25, 22, ____, 16, 13. 2. Pupils use the common difference to calculate the missing number. 3. Mixed practice: Worksheets include both ascending (addition) and descending (subtraction) patterns.	Pupils should be given Completion and accuracy of the worksheet to Find a missing term in a number pattern based on subtraction.	Pupils should be given a descending pattern to find a missing term in a number pattern based on subtraction.	Mathematics book for Primary one (Page132-134)	

	End unit assessment (1period)	Assess the understanding of all concepts covered in the unit.	All key points from the unit	1. Teacher administers a written and practical assessment includes: the common difference, patterns with a missing number 2. Pupils use the common difference to calculate the missing number. 3. Mixed practice: Worksheets include both ascending (addition) and descending(subtraction) with common difference.	Assessment papers, practical assessment materials (counters, etc.)	Pupils should be assessed through written and practical to assess the understanding of all concepts covered in the unit.	Mathematics book for Primary one (Page 134)	
Week 12: 23- 27/03/2026	Exams for term 2							
Week 13: 30/03- 03/04/2026								

Teacher's Name:.....
School Name:.....
Class: P1....
Subject: MATHEMATICS

Academic year:.....
Term: 3
No weeks per term: 11
Number of periods per week: 5periods

UNIT 8: MEASURING THE LENGTH LESS THAN OR EQUAL TO 10 m (15 Periods)

Key unit competence: Pupils will be able to measure and compare length of various objects having the length not exceeding 10 m, add and subtract length measurements less than or equal to 10m.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 1: 20-24/04/2026	Lesson 1: Introduction of the unit (1period)	Recognize the content and importance of measuring the length less than or equal to 10 m in real life.	Length, long, short, tall, height, measure	1. Teacher introduces the unit on measurement. 2. Class discussion: Use prompt questions to help pupils to get their predictions about the questions related to the pictures in pupil's book. "What is length? What things can we measure?" (e.g., table, book, pencil,	Objects of different lengths (pencil, book, stick, etc)	Through oral and practical activities pupils should be aware the content of the unit.	Mathematics book for Primary one (Page 135)	

				classroom). 3. Compare two objects: "Which is longer? Which is shorter?"				
	Lesson 2: Concept of lengths (2periods)	To compare and order objects based on their length directly and indirectly.	Long, longer, longest, short, shorter, shortest, compare, order	1. Direct comparison: Pupils work in groups to order sticks/strings from shortest to longest. 2. Indirect comparison: Use a string to measure the length of a desk and a chair to see which is longer. 3. Game: "Find something longer than your pencil but shorter than your desk."	Sticks, strings, ribbons, pencils, desks, chairs, Chalkboard, chalks, sticks of different lengths, long ropes, notebooks, pens, pupil's book, and charts containing pictures of lengths of objects	Through Observation and guided practice, pupils should be able to compare and order objects based on their length directly and indirectly.	Mathematics book for Primary one (Page 136 - 137)	
	Lesson 3: Instruments of measuring the length of objects (2periods)	Identify different tools used to measure length.	Measure, ruler, meter ruler, tape measure, tool	1. Show and name different measuring tools: ruler, meter stick, measuring tape, string. 2. Discuss what each tool is best for	Ruler, meter stick, measuring tape, string, chalks, sticks of different lengths, long	Through Observation and guided practice, pupils should be able to Identify	Mathematics book for Primary one (Page 137- 138)	

				(ruler for books, meter stick for desks, tape for walls). 3. Demonstrate how to use the starting point (0) on a ruler.	ropes, notebooks, pens, pupil's book, and charts containing pictures of lengths of objects	different tools used to measure length.		
Week 2: 27/04-01/05/2026	Lesson 4: Reading and writing meter "m" (1period)	Introduce to the standard unit (meter) and its symbol.	Meter, m, unit, measure	1. Introduce the meter (m) as a standard unit for measuring longer lengths. 2. Show the symbol 'm' for meter. 3. Practice writing "m" and saying "meter".	Chart showing the symbol 'm', meter stick, meter ruler.	Through Observation and guided practice, pupils should be able to read and write meter "m"	Mathematics book for Primary one (Page138-139)	
	Lesson 5: Measuring lengths of 10 m using a meter ruler (2periods)	Measure the length of objects using a meter stick, understanding the concept of meters.	Measure, meter stick, length, meters	1. Demonstrate how to measure the length of the classroom using a meter stick, counting the number of meters. 2. In groups, pupils measure large objects (e.g., table,	Meter stick, objects to measure (table, door, etc.)	Through guided practice, pupils should be able to measure the length of objects using a meter stick, understanding	Mathematics book for Primary one (Page137-138)	

				cupboard, corridor) and state the length in meters. 3. Record measurements as, e.g., "The table is 2 m long."		the concept of meters.		
	Lesson 6: Comparing lengths less than 10 m (2periods)	Compare two lengths measured in meters using the terms longer, shorter and equal (the symbols $>$, $<$.and $=$)	Longer than, shorter than, greater than ($>$), less than ($<$)	1. Compare measured lengths: "The window is 1 m. The door is 2 m. The door is longer than the window." 2. Introduce the symbols $>$, $<$ or $=$, to compare lengths (e.g., 2 m $>$ 1 m). 3. Worksheet: Compare pairs of lengths using symbols $>$, $<$ or $=$.	Previously recorded measurements, comparison symbols chart, worksheet	Through Observation and guided practice, pupils should be able to compare two lengths measured in meters using the terms longer, shorter and equal (the symbols $>$, $<$.and $=$)	Mathematics book for Primary one (Page 140)	
Week 3: 04-08/05/2026	Lesson 7: Addition of lengths whose sum does not exceed 10 m	Add lengths given in meters and solve simple word problems.	Add, plus, total length, sum	1. Practical problem: "If I have a 3m rope and tie it to a 4m rope, what is the total length?" 2. Use number	Ropes/strings of different lengths, word problem cards	Pupils should be given oral written and practical activities on addition of	Mathematics book for Primary one (Page 140-141)	

	and word problems (2periods)			sentences: $3\text{ m} + 4\text{ m} = 7\text{ m}$. 3. Solve word problems: "A path is 5m long. Another path is 3m long. What is the total length?"		lengths whose sum does not exceed 10 m.		
	Lesson 8: Subtraction of lengths whose difference does not exceed 10 m and word problems (2periods)	Subtract lengths given in meters and solve simple word problems.	Subtract, minus, difference, left	1. Practical problem: "I have a 10m string. I cut off 3m. How much is left?" 2. Use number sentences: $10\text{ m} - 3\text{ m} = 7\text{ m}$. 3. Solve word problems: "A pole is 8m tall. 2m is buried in the ground. What length is above the ground?"	Strings, scissors, word problem cards	Pupils should be given oral written and practical activities on Subtraction of lengths whose difference does not exceed 10 m and word problems	Mathematics book for Primary one (Page141-142)	
	End unit assessment (1period)	Assess the understanding of all concepts covered in the unit.	All key points from the unit	Practice: Teacher administers a practical assessment includes:	Assessment papers, practical assessment materials (counters, etc.)	Pupils should be given oral written and practical assessment.	Mathematics book for Primary one (Page142)	

				-activities to be done by pupils at school or at home (to observe and compare pictures by telling which is shorter or taller).				
--	--	--	--	--	--	--	--	--

UNIT 9: RWANDAN CURRENCY FROM 1Frw TO 100Frw (10 Periods)

Key unit competence: Pupils will be able to differentiate Rwandan currency from 1Frw up to 100Frw and solve word problems involving addition and subtraction of Rwandan currency.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches.	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 4: 11-15/05/2026	Lesson 1: Introduction of the unit /1period	Recognize the content of this unit and the importance Rwandan money.	Money, currency, Rwandan Franc (Frw), buy, sell	1. Teacher introduces the unit on money. Show real Rwandan currency. 2. Discussion: "What do we use money for?" (buy	Real or realistic toy Rwandan coins and notes, pictures of items to buy.	Through Oral questions and practical activities, pupils should be able to recognize Rwandan currency from 1frw to 100frw.	Mathematics book for Primary one (Page 149)	

				food, books, clothes etc).				
				3. Sing a song about saving money.				
	Lesson 2: Rwandan Coins and their values and features (1period)	Identify Rwandan coins (1Frw, 5Frw, 10Frw, 20Frw, 50Frw, 100Frw) and state their values.	Coin, value, one franc, five francs, ten francs, twenty francs, fifty francs, one hundred francs	1. Show each coin. Pupils practice naming them and stating their value. 2. Discuss the colour, size, and images on each coin. 3. Sorting activity: In groups, sort a mixed pile of coins by value.	Real or realistic toy coins, sorting trays	Through Observation and guided practice, pupils should be able to Identify Rwandan coins (1Frw, 5Frw, 10Frw, 20Frw, 50Frw, 100Frw) and state their values.	Mathematics book for Primary one (Page150-151)	
	Lesson 3: Exchange of Rwandan currency from 1Frw up to 100Frw. (1period)	Understand that coins can be combined to make larger amounts (e.g., five 20Frw coins equal 100Frw).	Exchange, same value, combine	1. Demonstrate: "How can I make 50Frw using smaller coins?" (e.g., five 10Frw coins, two	Play money (multiple copies of each coin)	Through Observation and guided practice, pupils should be able to understand that coins can be combined	Mathematics book for Primary one (Page151-153)	

				20Frw and one 10Frw). 2. Pupils work in pairs with play money to show different ways to make 20Frw, 50Frw, and 100Frw. 3. Game: "Coin Exchange" - teacher asks for an amount, pupils hold up the correct combination.		to make larger amounts (e.g., five 20Frw coins equal 100Frw).		
	Lesson 4: Addition of Rwandan currency from 1Frw up to 100Frw (1period)	Add different amounts of money to find a total sum.	Add, total, sum, plus, altogether	1. Use real-life scenarios: "If I buy a pencil for 20Frw and a sweet for 10Frw, how much do I spend altogether?" 2. Use coins to physically add amounts together.	Play money, items with price tags	Through guided practice and written activities, pupils should be able to add different amounts of money to find a total sum. coins equal 100Frw).	Mathematics book for Primary one (Page 153-154)	

				3. Practice writing number sentences: 20Frw + 10Frw = 30Frw.				
	Lesson 5: Word problems involving addition of Rwandan currency from 1Frw up to 100Frw. (1period)	Solve simple word problems involving the addition of money.	Word problem, spend, cost, altogether, total cost	1. Read problems: "Marie has 50Frw. Her mother gives her 30Frw. How much money does she have now?" 2. Pupils use play money to act out the problem. 3. Pupils write the number sentence and answer with the Frw symbol.	Word problem cards, play money	Pupils should be given written real-world stories and practical demonstrations to solve simple word problems involving the addition of money.	Mathematics book for Primary one (Page 154)	
Week 5: 18-22/05/2026	Lesson 6: Subtraction of Rwandan currency	Subtract amounts of money to find	Subtract, change, left,	1. Use real-life scenarios: "I have 100Frw. I	Play money, items	Through Practical demonstration	Mathematics book for	

	from 1Frw up to 100Frw (1period)	how much is left.	remain, minus	buy a book for 60Frw. How much change do I get?" 2. Use coins to physically take away the cost and count the remaining money. 3. Practice writing number sentences: 100Frw - 60Frw = 40Frw.	with price tags	activities, Pupil should be able to subtract amounts of money to find how much is left.	Primary one (Page154)	
	Lesson 7: Word problems involving subtraction of Rwandan currency from 1Frw up to 100Frw. (2periods)	Solve simple word problems involving the subtraction of money.	Word problem, change, left, how much more?	1. Read problems: "A pen costs 80Frw. Peter has 50Frw. How much more money does he need to buy the pen?" (80Frw - 50Frw = 30Frw needed). 2. Pupils use	Word problem cards, play money	Through Practical demonstration activities, Pupil should be able to solve a subtraction problem with money.	Mathematics book for Primary one (Page155)	

				play money to solve different types of subtraction problems. 3. Focus on understanding keywords like "change", "left", and "how much more".				
	Lesson 8: Selecting items to buy from the given table (1period)	Make simple choices based on prices and a given amount of money.	Price, buy, afford, choose	1. Provide a table with items and prices (e.g., Banana: 20Frw, Juice: 50Frw, Biscuit: 30Frw). 2. Give pupils a budget (e.g., 100Frw). Ask: "What can you buy with this money?" 3. Pupils select combinations of items that	Price list poster, play money, pretend shop items	Through Practical demonstration activities, Pupil should be able to make simple choices based on prices and a given amount of money.	Mathematics book for Primary one (Page 155-156)	

				stay within their budget.				
	Unit assessment (1period)	Assess understanding of identifying, adding, and subtracting Rwandan currency.				Pupils should be given oral written and practical assessment.	Mathematics book for Primary one (Page156-157)	

UNIT 10: LOCATION OF OBJECTS, AND LINES (5 PERIODS)

Key unit competence: Pupils will be able to locate objects on or out of the line and define types of lines.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 6: 25-29/05/2026	Lesson 1: Introduction of the unit (1period)	Recognize the use of position and types of lines.	Position, location, line, straight, curved	1. Teacher introduces the unit on location and lines. 2. Play a game: "Put the ball <i>on</i> the table, <i>under</i> the chair."	Ball, table, chair, drawings of lines on board	Through Oral questions and practical activities, pupils should be able to recognize the use of position and types of lines.	Mathematics book for Primary one (Page158)	

				3. Show different types of lines drawn on the board.				
	Lesson 2: Location of a point: Left side, right side of the line (1period)	Describe the position of an object relative to a line using 'left' and 'right'.	Left, right, side, position, line	1. Use a rope or string as a line on the floor. Place an object on the left and right sides. 2. Pupils stand on the left/right side of the line as instructed. 3. Worksheet: Draw a line and mark an X on the left/right side.	Rope/string, small objects (e.g., box), worksheet	Through clear instructions and guided practical activities, Pupils should be able to describe the position of an object relative to a line using 'left' and 'right'	Mathematics book for Primary one (Page160)	
	Lesson 3: Types of lines: Horizontal, vertical, and oblique straight lines (1period)	Identify and name horizontal, vertical, and oblique (slanted) straight lines.	Horizontal, vertical, oblique, straight line, slanted	1. Show examples: Horizon (horizontal), flagpole (vertical), slide (oblique). 2. Pupils use their arms to	Pictures of horizon, flagpole, slide; objects in the classroom	Through observation and guided practical activities, Pupils should be able to identify and name	Mathematics book for Primary one (Page162-163)	

				make horizontal, vertical, and oblique lines. 3. Hunt for examples of each type of line in the classroom.		horizontal, vertical, and oblique (slanted) straight lines.		
	Lesson 4: Types of lines: Closed, open, zigzag and curved lines (1period)	Identify and name closed, open, zigzag, and curved lines.	Closed line, open line, zigzag, curved line	1. Demonstrate: A closed line makes a shape (e.g., circle). An open line does not (e.g., a curved mouth). 2. Draw examples of each type of line on the board. 3. Activity: Pupils use string to create each type of line on their desks.	String, drawings on board	Through observation and guided practical activities, Pupils should be able to identify and name closed, open, zigzag, and curved lines.	Mathematics book for Primary one (Page163-164)	

	End unit assessment (1period)	Assess understanding of location and types of lines.	Left, right, horizontal, vertical, oblique, closed, open, curved, zigzag	1. Practical and written assessment: Identifying line types and placing objects left/right of a line.	Assessment papers, practical props	Pupils should be given oral written and practical assessment to assess understanding of location and types of lines	Mathematics book for Primary one (Page165)	
--	--	--	--	---	------------------------------------	---	---	--

UNIT 11: RIGHT ANGLE, SQUARE AND RECTANGLE (15 Periods)

Key unit competence: Pupils will be able to identify the right angle, square and rectangle from other shapes and accurately draw them.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 7: 01-05/06/2026	Lesson 1: Introductory activity (1period)	Recognize the right angle, square and rectangle.	Shape, angle, corner, square, rectangle	1. Teacher introduces the unit on shapes. 2. Look at pictures of different shapes in the environment (windows,	Pictures of objects with shapes, real objects (book, door, etc)	Through observation and guided practical activities pupils should be able to recognize the right angle,	Mathematics book for Primary one (Page166)	

				doors, books). 3. Feel the corners of different objects.		square and rectangle.		
	Lesson 2: Right angle and its characteristics (2periods)	Identify a right angle as a square corner.	Right angle, square corner, L-shape	1. Show that a right angle looks like the corner of a book or a window. 2. Make right angles with your arms, fingers, or strips of paper. 3. Hunt for right angles in the classroom (e.g., tables, windows, doors).	Books, paper strips, right angle template	Through observation and guided practical activities, Pupils should be able to identify a right angle as a square corner.	Mathematics book for Primary one (Page166-167)	
	Lesson 3: Drawing the Right angle (2periods)	Draw a right angle using a ruler.	Draw, right angle, ruler, corner	1. Demonstrate how to use a ruler to draw two straight lines that meet to form a right angle (L-	Rulers, pencils, paper, right angle templates	Through observation and guided practical activities, Pupils should be able to	Mathematics book for Primary one (Page167-168)	

				shape). 2. Pupils practice drawing right angles of different sizes. 3. Use a right angle template to check their drawings.		draw a right angle using a ruler.		
Week 8: 08-12/06/2026	Lesson 4: A square and its characteristics (2periods)	Identify a square and describe its properties.	Square, side, equal, corner, right angle	1. Examine a square object (e.g., tile). Count its sides (4) and corners (4). 2. Measure the sides: all four sides are of equal length. 3. Check the corners: all four corners are right angles.	Square tiles, paper squares, rulers	Through observation and practical activities, Pupils should be able to Identify a square and describe its properties.	Mathematics book for Primary one (Page168-169)	
	Lesson 5: Drawing a square	Draw a square using a ruler.	Draw, square, equal sides,	1. Demonstrate how to draw a square: four straight, equal	Rulers, pencils, paper,	Through observation and practical activities,	Mathematics book for Primary one (Page169)	

	(1period)		right angles	lines with right angles between them. 2. Pupils practice drawing squares of different sizes using a ruler. 3. Measure the sides to check they are equal.	squared paper	Pupils should be able to Draw a square using a ruler. .		
	Lesson 6: A rectangle and its characteristics (2periods)	Identify a rectangle and describe its properties.	Rectangle, side, opposite, equal, corner, right angle	1. Examine a rectangle (e.g., book, door). Count its sides (4) and corners (4). 2. Measure the sides: opposite sides are equal. 3. Check the corners: all four corners are right angles.	Books, doors, paper rectangles, rulers	Through Oral and practical activities, Pupils should be able to Identify a rectangle and describe its properties.	Mathematics book for Primary one (Page170)	
Week 9: 15-19/06/2026	Lesson 7: Drawing a rectangle	Draw a rectangle using a ruler.	Draw, rectangle, opposite	1. Demonstrate how to draw a rectangle: two	Rulers, pencils, paper,	Pupils should be given oral written and	Mathematics book for	

	(2periods)		sides equal, right angles	long equal sides and two short equal sides, with right angles. 2. Pupils practice drawing rectangles using a ruler. 3. Measure opposite sides to check they are equal.	squared paper	practical assessment.	Primary one (Page171)	
	Lesson 8: Identifying square and rectangle from other shapes and describing them (2periods)	Distinguish squares and rectangles from other shapes and describe their properties.	Square, rectangle, properties, sides, angles	1. Sorting activity: Sort a collection of shapes into squares, rectangles, and other shapes. 2. Game: "Guess My Shape" - a pupil describes a shape's properties, others guess it. 3. Worksheet: Circle all the	Assorted shape cut-outs (squares, rectangles, circles, triangles), worksheet	Observation when sorting shapes Worksheet review.	Mathematics book for Primary one (Page133)	

				squares and rectangles in a mixed group of shapes.				
	End unit Assessment (1period)	Assess the ability to identify, describe, and draw right angles, squares, and rectangles.					Mathematics book for Primary one (Page 172-174)	
Week 10 : 22-26/06/2026	3rd Term Exams							
Week 11: 29/06-03/07/2026
