

MATHEMATICS PRIMARY THREE SCHEME OF WORK

Teacher's Name:.....	Academic year:.....
School's Name:.....	Term:
Class:3.....	Number of weeks per term:
Subject:.....	Number of periods per week:.....

UNIT 1: Numbers from 0 to 2000.

Periods: 25

Key unit competence: Pupils will be able to count, read, write, order, compare, add, multiply, and divide numbers for 0 to 2000.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 1: 8-13 /9/2025	Lesson 1: Introduction of the unit (1 Period)	Recognize the content of Unit One	Count, and reading	Inviting pupils to read the story. Ask them to discuss the story. Suggest what is required for everyone to be able to count the quantity of objects.	Number cards, A chart with different numbers to count	Pupils should be given questions that help them to recognize the meaning of numbers.	Mathematics Primary Learner's Book P3 version edited Page: 1	
	Lesson 2: Place value of digits of	Write and say the place value of a 4-digit number	ones, tens, hundreds,	Form groups of pupils and assign them to write the	Using an abacus kit	Pupil should be given the application activities of	Mathematics Primary learner's	

	a number up to 2000 (1 Period)		thousands, Place value, digit Identifying	numbers shown on the abacus. filling the numbers in the table of place value.	Drawing the table of place value	writing and saying the place value of a 4-digit number less or equal than 2000.	Book P3 version edited Page: 4,5, and 6	
	Lesson 3: Forming and writing numbers in figures up to 2000 (1 Period)	Form and write numbers less than or equal to 2000	Digits, numbers, and arranging numbers	In small groups, using number cards of digits 0, 1,2, 3, 4, 5, 6, 7, 8, and 9, to form 4- digit numbers. Individually, guided practice on the chalkboard to form different 4-digit numbers less than 2000.	Using number cards, different digit cards.	Pupil should be guided to form and write numbers using the given digits.	Mathemat ics Primary learner's Book P3 version edited Page: 2 and 3	
	Lesson 4: Reading and writing numbers up	Read and write the numbers less than 2000.	Digits, numbers, place value	Provide cards made by different numbers less than 2000, (or write on the chalkboard)	Using number cards,	Put number cards with numbers between less than 2000 in a	Mathemat ics Primary learner's Book P3	

	to 2000 in words (1 Period)			numbers less than 2000, and use different questions to guide pupils on how to read numbers	table of place values	basket and ask each pupil to pick randomly one card and read it aloud.	version edited	
	Lesson 5: Expanded form of a number between 100 and 2000 (1 Period)	Expand the numbers between 100 and 2000	Numbers , expand.	By model question, teacher explain to the pupils how to expand a number. (Addition of the value of each digit or writing places horizontally form). Guided practice on the chalkboard resolved by learner	Chart, table of place value Abacus	Pupil should be given application activities of expanding numbers or complete the digits of highlighted place value (Activity: 1.4)	Mathematics Primary learner's Book P3 version edited Page: 6-9	
Week 2: 16-20/9/2025	Lesson 6: Writing numbers in words up to 2000 (1 Period)	Write numbers in words up to 2000	Place value, table of place value, expand,	From expanded number, ask pupils to write related number to each place, and read aloud.	Chart ' table of place value Abacus	Pupil should be given the application activities of writing numerical	Mathematics Primary learner's Book P3 version	

			digit	Then read the whole numbers after adding the value of each place. The teacher explain the rules of writing numbers.		numbers in words.	edited 2025 Page: 9- 10	
	Lesson 7: Comparing numbers less than or equal to 2000 (1 Period)	Compare numbers less than or equal to 2000	Place value, greatest, smallest, highest, greater than, less than and more than	In small group, pupils draw a table of place values. Ask them to represent 2 numbers in the table. Then they compare numbers, considering the number of digits to each number or the digits of the same place. A number with more digits is bigger.	Tables of place value Abacus Different counters	Pupil should be given exercises to do focused on comparing numbers using the symbols ($>$, $<$ or $=$) or using comparing expression. (Activity: 1.6)	Mathematics Primary learner's Book P3 version edited. Page :10-12	
	Lesson 8: Arranging numbers less than or	Order numbers in ascending and	Arranging numbers in ascending or descending	Teacher draw a table of place values.	The table of place value, digit cards	Pupil should be given exercises of arranging	Mathematics Primary learner's	

	equal to 2,000 in ascending order and in descending order. (1 Period)	descending order	order or increasing and decreasing order, sequence	Complete numbers in the table, and arrange them from the smallest to the largest. Give another example where numbers differ at the others place values, invite the pupil to work it from the biggest on chalkboard.	Others types of counters	number in descending or ascending order. Choosing the correct arranged sequence. (Activity: 1.7)	Book P3 version edited Page: 12 - 13	
	Lesson 9: Addition without carrying of numbers whose sum does not exceed 2,000. (2 Periods)	Add without carrying the numbers whose sum does not exceed 2,000.	Digit, place value, arrange, vertically, left, right	Using the table of place value, teacher invite the pupil to explore and add vertically numbers. He invites other pupil and guide him/her to add vertically, starting by the ones, tens, hundreds and end by thousands.	Abacus, Base ten block, different counter, table of lace values	Pupil should be assigned the application activities of adding numbers vertically. (Activit:1.18.1)	Mathematics Primary learner's Book P3 version edited Page: 14-16	

Week 3: 23-27/9/2025	Lesson 10: Addition with carrying of numbers whose sum does not exceed 2000 (1 Period)	Add numbers with carrying, whose sum does not exceed 2000	Digit, place value, arrange vertically, left, right	Add with carrying vertically, starting by the ones, then tens, hundreds, and thousands. (from the left to the right). Use table of place value to show that 10 ones are exchanged for 1 tens and 0 ones.	Abacus, Base ten block, different counter' table of place values	Pupils should be given exercises of adding vertically with carrying. (Activity: 1.8.2)	Mathematics Primary learner's Book P3 version edited Page: 16 - 18
	Lesson 11: Word problems involving the addition of numbers whose sum does not exceed 2000 (1 Period)	Solve word problems involving the addition of numbers whose sum does not exceed 2000	Sum, total, altogether, increase. Addends	Teacher help pupils to solve problem by guiding them to interpret the words problem, using key words as total, altogether. They identify the facts (given and requested), solve the problem using the addition	Manilla paper, chalkboard illustration different types of counters	Pupil should be given involving the addition of numbers whose sum does not exceed 2000 (Activity:1.9)	Mathematics Primary learner's Book P3 version edited Page: 18 - 20
	Lesson 12: Subtraction without	Subtract numbers within 2000 without borrowing	Digit, place value, arrange	Invite pupils to subtract using	Abacus, Base ten block,	Pupils should be given the exercises	Mathematics

	borrowing of numbers less than or equal to 2,000 (1 Period)		vertically, left and right	abacus or bas ten blocks. Subtraction of a number with four digits vertically by using a table of place value or others counters.	different counter and table of place values	subtracting numbers within 2000 without borrowing.	Primary learner's Book P3 version edited Page: 20 - 21	
	Lesson 13: Subtraction with borrowing of numbers less than or equal to 2000 (2 Periods)	Subtract numbers within 2000 with borrowing	Digit, place value, arrange vertically.	In small groups, pupils subtract numbers using table of place values. By the examples written on chalk board, teacher shows to the pupils why is necessary to borrow and what to borrow using the table of place values.	Abacus, Base ten block, different counter, table of place values	The pupil should be given the application activities of subtracting numbers within 2000 with borrowing vertically. (Activity:1.10), then verify their answers	Mathematics Primary learner's Book P3 version edited Page: 22 - 23	
Week4:	Lesson 14: Word problems	Solve word problems involving	Subtrahend, minuend, difference,	The teacher helps pupils to solve problem.	The table of place values;	Pupils should be given problems in	Mathematics	

30/9-4/10/2025	involving subtraction of numbers less than or equal to 2000 (1 Period)	subtraction of numbers less than or equal to 2000	subtract, minus, remained, left, balance, decrease, difference Less, more	Guide them to interpret the words problem, using key words as left, remained, balance, and identify the facts (given and requested), solve the problem using subtraction.	Different types of counter, A chart showing word problems	groups/individually involving subtraction of numbers less than or equal to 2000 (Activity: 1.11)	Primary learner's Book P3 version edited Page: 24 - 24	
	Lesson 15: Multiples of 7 up to 70 (1 Period)	Explore multiples of 7 that do not exceed 70	Times, product, a multiple, Carrying, multiplicand, multiplier	The teacher forms at least 10 groups of 7 counters, draw a multiplication table of 7. Ask 1 group to combine with 2 group, 3 groups 4 groups, 9 groups and 10. Make the total for each new combination formed (e.g: 7, 14, 21... combinations). Complete combined numbers in the	Chart of multiplication table Different types of counter	Pupil should be given provide exercises of filling with correct number and complete the multiplication table. (Activity: 1.12).	Mathematics Primary learner's Book P3 version edited Page: 25 - 27	

				multiplication table.				
	Lesson 16: Multiples of 8 up to 80 (1 Period)	Explore multiples of 8 that do not exceed 80	Times, product, a multiple and Carrying, multiplicand, multiplier	Teacher form at least 10 groups of 8 counters, draw a multiplication table of 8. Ask 1 group to combine with 2 group, 3 groups 4 groups, 9 groups and 10. Make the total for each new combination formed (e.g: 8, 16,24... combinations). Complete combined numbers in the multiplication table.	Chart of multiplication table Different types of counter	Pupil should be given provide the application activities of filling with correct number and complete the table for Multiples of 8 up to 80. (Activity 1.13).	Mathematics Primary learner's Book P3 version edited Page: 28 - 30	
	Lesson 17: Multiples of 9 up to 90 (1 Period)	Explore multiples of 9 that do not exceed 90	Times, product, a multiple and Carrying, multiplicand, multiplier	Teacher form at least 10 groups of 9 counters, draw a multiplication table of 9.	Chart of multiplication table Different types of counters	Pupil should be given the application activities of filling with correct number	Mathematics Primary learner's Book P3	

				Ask 1 group to combine with 2 group, 3 groups 4 groups, 9 groups and 10. Make the total for each new combination of groups formed (e.g: 9, 18, 28... combinations). Complete combined numbers in the multiplication table.		and complete the table. (Activity 1.14).	version edited Page: 31 - 34	
	Lesson 18: Multiplication of a number by a single-digit number (7, 8 or 9) where the product does not exceed 2000 (1 Period)	Multiply a number by a single digit number (7, 8 or 9) where the product does not exceed 2000	Times, product, a multiple and Carrying, multiplicand, multiplier	Teacher invite pupils to observe the worked example on the chalkboard. Ask some guiding questions that help pupils to understand the process of how they can do it using the table of place value.	Chart of multiplication table Different types of counters Table of place value	Pupil should be given application activities of multiplying a number by 7, 8 and 9 and check their answers (Activity 1.15)	Mathematics Primary learner's Book P3 version edited Page: 35 – 36	

				Teacher provide the explanations. in small group and assign them to do practice.				
Week 5: 6- 10/9/202 5	Lesson 19: Multiplicati on of a 3- digit number by a 2 digit number where the product does not exceed 2 000 (1 Period)	Multiply a 3 digit number by a 2 digit number where the product does not exceed 2000	Times, product, a multiple and Carrying, multiplicand, multiplayer	Teacher invite pupils to observe the worked example on the chalkboard. Ask some guiding questions that help pupils to understand the process of how they can do it using the table of place value. Teacher provide explanations in small group, assign them to do the practices	Chart of the multiplication table Different types of counters Table of place value	Pupil should be application activities of multiplying a 3-digit numbers by 2- digit numbers and check their answers (Activity 1.16.2)	Mathemat ics Primary learner's Book P3 version edited Page: 36 - 37	
	Lesson 20: Word problems involving the multiplicati	Solve word problems involving multiplication of a 3-digit number by a 2-digit	Times, product, a multiple and Carrying, multiplicand, multiplayer	Teacher helps pupils to solve problem: guide them to interpret the words problem, using key	Different types of counters Table of place value	Pupil should be guided how to solve problems involving multiplication	Mathemat ics Primary learner's Book P3	

	on of a 3-digit number by a 2-digit number. (1 Period)	number		words as product, total and identify the facts (given and requested), and solve the problem using subtraction.	Manila paper	of a 3-digit number by a 2-digit number. (Activity 1.17).	version edited Page: 37-39	
	Lesson 21: Multiplication by 100 or 1000 where the product does not exceed 2000 (1 Period)	Multiply whole numbers by 100 and 1000 correctly.	Place value, Appending zeros, Product, Digits shift left	Use base ten blocks of 100, and let pupils find that when they have, for example, 3 flats, the number represented is 3 times 100, which is 300 (3 with two zeros). Use a place value chart to show that multiplying by 100 moves each digit two places left (appending two	Place value chart (whiteboard /chalkboard or posters), Base ten blocks and markers	Pupils should be given exercises involving multiplying whole numbers by 100 and 1000 correctly. (Activity 1.18.3). Independent activity of filling the correct number: 100 or 1000.	Mathematics Primary learner's Book P3 version edited Page: 39-41	

				zeros), and by 1000 moves digits three places left. Guide Practice like 4 x 100, 15 x 100, 2 x 1000 in groups.		(Activity,1.18)		
	Lesson 22: Division without a remainder of a 4-digit number less than 2000 by a one-digit number (1 Period)	Divide a 4-digit number less than 2000 by a one-digit number without a remainder	Divide, Dividend, Divisor, Quotient,	Rapid recall of basic division facts using multiplication table (e.g., $28 \div 4$, $63 \div 7$). Use a drawing to illustrate the situation and ask pupils to suggest how they can get the answer. Teacher Demonstrate the	Whiteboard/ chalkboard for demonstration, number cards for desk mats work	Pupils should be given the application activities to be done by pupils individually (activity:1.19) and check their answers; Assign homework for every pupils (activity:	Mathematics Primary learner's Book P3 version edited Page: 41-43	

				short division method by-step with a problem like $1864 \div 4$. Emphasize working from left to right. with the desk mats, Learners solve problems of division.				
	Lesson 23: End unit assessment (1 Period)	To assess the learner's understanding and apply the concepts of Unit 1	Assessment, Apply, Solve	The teacher distributes the assessment paper. Learners work individually and silently to complete the assessment.	papers, Whiteboard/ chalkboard pens and paper for working out (if allowed)	The completed test paper will include a variety of question types (e.g., direct calculation, word problems) to evaluate knowledge,		

						comprehension , and application.		
--	--	--	--	--	--	--	--	--

Unit 2: Numbers from 0 to 5000
Periods: 25

Key unit competence: Pupils will be able to count, read, write, expand, decompose, order, compare, add, subtract, multiply, and divide whole numbers less than or equal to 5000.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 6: 13-17/10/2025	Lesson 1: Introduction of the unit (1 Period)	Arouse the curiosity of learners on the importance of counting, reading and writing numbers.	Unit, Numbers, 5000, Preview, Prior Knowledge	Teacher introduces the unit title and lessons. Class brainstorms: in selling and buying "Where do we see big numbers in real life?". teacher tell them the story of selling	Textbook, Whiteboard illustration, Chart, outline, Real-life examples of large numbers	Using of oral questions, group discussion, pupils should discuss on the importance of counting, reading and writing numbers.	Mathematics Primary learner's Book P3 version edited Page: 47	

	Lesson 2: Place values of the digits of a number up to 5000 (1 Period)	To state identify the place value of each digit in a number up to 5000	Place Value, Thousands, Hundreds, Tens, Ones,	Review place values up to hundreds. Introduce the thousands place. Use place value charts to write in numbers like 3,485.	Place value charts, , Number cards, Whiteboard	Pupils should be given application activities to pupils, asking them to write numbers in a table of place values, identifying place value of any digit,	Mathematics Primary learner's Book P3 version edited Page: 49-50	
	Lesson 3: Reading and Writing in figures the numbers up to 5000 (1 Period)	Read and Write numbers up to 5000 in numerical form when given the number in words	Figures, Numeral Form, Comma	Practice writing numbers orally, Matching cards with words and numerical numbers. Individually, Learners write numbers given in words in figure ,	whiteboards/c halk board , markers, number card, table of place values	Pupils should be given exercises of reading and writing numbers up to 5000 in numerical form when given the	Mathematics Primary learner's Book P3 version edited Page: 48 and 49	

				and emphasis on using a comma after the thousands place.		number in words		
	Lesson 4: Expanding numbers up to 5000 (1 Period)	To write numbers up to 5000 in words.	Place value, Table of place value, Expand	Explain to the pupils how to expand a number. Add the value of each digit or the place value.	Chart table of place value Abacus	Pupils should do the application activities to write numbers up to 5000 in words.	Mathematics Primary learner's Book P3 version edited Page: 51-53	
	Lesson 5: Writing numbers up to 5,000 in words (1 Period)	Write the number names for any given numeral up to 5000.	Number Names, Hyphen, Spelling	Review spelling of number in words (e.g., forty, not forty). Guided practice on the board, learners expand number ex: $3546=3000+500+40+6$ ask pupils to read related number to each	Number cards, Table of place value	Put number cards with numbers between 1000 and 5000 in a basket and ask each pupil to pick randomly one card, and read aloud number. Or write numbers on chalk board and ask to the	Mathematics Primary learner's Book P3 version edited Page: 54 and 55	

				place, and read aloud the whole number and write it.		learners to read them.		
Week 7: 20- 24/10/20 25	Lesson 6: Comparing numbers less than or equal to 5,000 (2 Periods)	compare two numbers up to 5000. Using $>$, $<$, and $=$ to	Greater Than ($>$), Less Than ($<$), Equal To ($=$), Compare, Digit	In small group, pupils draw a table of place values. Compare numbers with different digits (3-digit vs 4-digit). Compare numbers with the same number of digits. Step-by-step compare thousands, then hundreds, etc. Worksheet practice with mixed problems.	Table of lace value, Number cards, Interactive games different counters	Pupils should be given exercises of comparing two numbers up to 5000. Using $>$, $<$, and $=$ to	Mathematics Primary learner's Book P3 version edited Page: 55, 56 and 57	

	Lesson 7: Arranging numbers less than or equal to 5,000 in ascending and descending order (2 Periods)	Arrange numbers less than or equal to 5000 in ascending or descending order	Ascending Order, Descending Order, Sequence, Largest, Smallest	Focus on ascending and descending order, as well as mixed practice. Use a number line to visualize order. Write numbers on cards and have groups physically arrange them in order on their desks.	Number cards, Chalkboard illustration	Pupils should be given exercises of arranging numbers less than or equal to 5000 in ascending or descending order	Mathematics Primary learner's Book P3 version edited Page: 58, 59 and 60	
	Lesson 8: Addition of numbers whose sum does not exceed 5,000 without carrying (1 Period)	Add numbers without carrying who's the sum does not exceed 5000.	Addition, Addends, Sum, Place Value, Vertical Form, Align	Add without carrying vertically, starting by the ones, then tens, hundreds, and thousands. Means from the left to the right. by using different counters an tables.	Abacus, Base ten block, different counter and table	Pupils should be given exercises that involve adding numbers without carrying who's the sum	Mathematics Primary learner's Book P3 version edited Page: 60, 61 and 62	

						does not exceed 500		
Week 8: 27- 31/10/20 25	Lesson 9: Addition of numbers whose sum does not exceed 5,000 with carrying (1 Period)	Add numbers with carrying, whose sum does not exceed 5000.	Addition, Addends, Sum, Place Value, Vertical Form	Add with carrying vertically, starting by the ones, then tens, hundreds, and thousands. Means from the left to the right. by using different counters an tables.	Abacus, Base ten block, different counter and table	Pupils should be given exercises of adding numbers with carrying, whose sum does not exceed 5000.	Mathematics Primary learner's Book P3 version edited Page: 62 and 63	
	Lesson 10: Word problems involving addition of numbers whose sum does not exceed 5,000 (1 Period)	Solve word problems involving addition of numbers whose sum does not exceed 5000	Sum, total, altogether, increase. Addends, combine	Teacher helps pupils to solve problem: guide them to interpret the words problem, using key words as total, altogether, and identify the facts (given and requested), draw visual representations and solve the problem using the addition	Manilla paper, chalk board illustration different types of counters	Pupils should be given exercises to solve word problems involving addition of numbers whose sum does not exceed 5000.	Mathematics Primary learner's Book P3 version edited Page: 63 and 64	

	Lesson 11: Subtraction of numbers within 5000 without borrowing (1 Period)	Solve word problems involving addition of numbers whose sum does not exceed 5000	Subtract, minus, decrease, difference, balance	Teacher help pupils to solve problem: guide them to interpret the words problem, using key words as total, altogether, and identify the facts (given and requested), draw visual representations and solve the problem using the addition	Manilla paper, chalk board illustration different types of counters	Pupils should be given problems that involve addition of numbers whose sum does not exceed 5000	Mathematics Primary learner's Book P3 version edited Page: 64,65 and 66	
	Lesson 12: Subtraction of numbers within 5,000 with borrowing (1 Period)	Subtract numbers within 5000 with borrowing	Digit, place value, arrange vertically. Cross out,	In small group of pupils, pupils subtract numbers using abacus or base ten blocks. Teacher guide them how to take away some blocks and ask the number that was represented, the number taken away and the remaining number.	Abacus, Base ten block, different counter and table of place values	Pupils work in pair the application exercises of subtracting numbers vertically, and the application activity 1.10.2 then verify their answers	Mathematics Primary learner's Book P3 version edited Page: 66 and 67	

				By the examples written on chalk board, teacher shows to the pupils why is necessary to borrow using table of place values.				
	Lesson 13: Word problems involving subtraction of numbers within 5,000 (1 Period)	to solve real-world word problems that require subtraction within 5000.	Difference, How many more than, How many left, Less than, Remain, balance	Teacher help pupils to solve problem. Identify key words that signal subtraction (e.g., difference, left, remain, how many more. and identify the facts (given and requested), draw visual representations and solve the problem using the	The table of place values; Different types of counters A chart showing word problems	Pupils should be given problems that involve real-world word problems that require subtraction within 5000.	Mathematics Primary learner's Book P3 version edited Page: 67 and 67	

				subtraction				
Week 9: 3- 7/11/202 5	Lesson 14: Multiplicatio n of a 3-digit number by a 2 digit number where the product does not exceed 5 000 (2 Periods)	To multiply a 3- digit number by a 2-digit number ensuring the product is ≤ 5000 .	Multiplicatio n, Product, Partial Product, Placeholder, Algorithm	In small group of learners, multiply by the ones digit, then by the tens digit, then adding the partial products. guide and check if the product will be less than 5000 before solving.	Graph paper, Multiplicatio n charts (for support), Anchor chart showing steps	Pupils should be given the application activities of multiplying a 3-digit numbers by 2- digit numbers and check their answers Assign homework to all pupils.	Mathemat ics Primary learner's Book P3 version edited Page: 68 and 69	
	Lesson 15: Multiply numbers by 100 and 1,000 where the product does not exceed 5000 (1 Period)	To multiply whole numbers by 100 and 1000, recognizing the pattern of adding zeros.	Place value, Appending zeros, Product, Digits shift left	Use 3 base ten blocks of 100. The total is 300 (3 with two zeros). Use a place value chart to show that multiplying by 100 moves each digit two places left	Place value chart (whiteboard /chalkboard or posters), Base ten blocks and markers	Pupils should be given the application exercises (Activity 1.18.3). Independent activity of filling the	Mathemat ics Primary learner's Book P3 version edited Page: 92	

				(appending two zeros), and by 1000 moves digits three places left mean, to multiply by 100 append two zeros and multiply by 1000, append 3 zeros. Guided Practice like 4×100 , 15×100 , 2×1000 in groups.		correct number: 100 or 1000. (Activity, 1.18)		
	Lesson 16: Word problems involving multiplication of a 3 digit number by a 2 digit number where the product does	To solve word problems involving multiplication of 3-digit by 2-digit numbers.	Multiplication, Operations, Plan, Solve, Check Product, multiple	Introduce multiplication problems. Teacher helps pupils interpret the words problem, using key words . In small groups: act out or draw the problem to understand it and groups solve	Problem-solving graphic organizers, Manipulatives for acting out problems	Pupils should be given exercise to solve problems in groups. Use (activity 2.13), t	Mathematics Primary learner's Book P3 version edited Page: 70 and 71	

	not exceed 5 000 (2 Period)			different problems and teach the class.				
Week 10: 10-14/11/2025	Lesson 17: Division without a remainder of a 4 digit number less than 5 000 by a one digit number (1 Period)	To divide a 4-digit number (less than 5000) by a 1-digit number using long division.	Division, Dividend, Divisor, Quotient,	Rapid recall of basic division facts using the multiplication table (e.g., $28 \div 4$, $63 \div 7$). Use a drawing to illustrate the situation and ask pupils to suggest how they can get the answer. Teacher Demonstrate the short division method by-step with a problem like $1864 \div 4$. Emphasize	Whiteboards/ chalkboard illustration , manila paper showing the steps	Pupils should be given application activities to be done by pupils in groups. (activity:2.15.2) and check their answers.	Mathematics Primary learner's Book P3 version edited Page: 72,73 and 74	

				working from left to right.				
	Lesson 18: Word problems involving the division of a number less than 5 000 by a one-digit number. (1 Period)	To solve word problems that require dividing a number less than 5000 by a 1-digit number.	Share, Equal Groups, Divide, Each, Per, quotient	Identify key words that signal division (e.g., share equally, equal groups, each, per). Differentiate between problems that ask for the number in each group vs the number of groups. Guided by teacher, they Solve problems created in groups	Anchor chart of division key words, Problem writing template	Pupils should be given exercises to solve word problems that require dividing a number less than 5000 by a 1-digit number.	Mathematics Primary learner's Book P3 version edited Page: 74 and 75	
	End unit assessment (1 Period)	To evaluate student mastery of all unit objectives.	Comprehensive, Assessment, Review	Students complete a written test covering all topics: The test should include a mix of	Unit assessment paper,	Summative written unit test. Results are used to gauge overall	Mathematics Primary learner's Book P3

UNIT 3: Numbers from 0 to 10000

Periods :15 of 25

Key unit competence: Pupils will be able to count, read, write, order, decompose, expand, compare, add, subtract and divide whole numbers up to 10,000.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 11: 17-21/11/2025	Lesson 1: Introduction of the unit (1 Period)	Arouse the curiosity of learners on the importance of counting, reading and writing numbers. about numbers up to 10,000.	Numbers, digits, place value, thousands, unit	Teacher introduces the unit titles and asks learners what they think they will learn. Class brainstorms where we see and use large numbers Quick questions to review prior	Poster showing the unit title and key topics, real-life, images	Pupils should be given oral questions to arouse the curiosity of learners on the importance of counting,	Mathematics Primary learner's Book P3 version edited Page: 77	

				knowledge of numbers up to 1,0000.		reading and writing numbers. about numbers up to 10,000.		
	Lesson 2: Place value and expanded form of numbers (1 Period)	To write and expand a numbers between 0 and 10 000 into ones, tens, hundreds and thousands.	Thousands, Hundreds, Tens, Ones, Place Value, Expanded Form	Use place value charts and abacus to review place values up to thousands. Introduce the ten thousands place, demonstrate value of digits. He groups form numbers and identify each digit's value and write given numbers in expanded form	Place value charts, abacus, number cards,	Pupils should be given exercises to write and expand a numbers between 0 and 10 000 into ones, tens, hundreds and thousands.	Mathematics Primary learner's Book P3 version edited Page: 80 - 83	

Week 12 24-28/11/2025				(e.g. $8328 = 8000 + 300 + 20 + 8$).				
	Lesson 3: Writing numbers up to 10000 in figures (1 Period)	To write numbers up to 10,000 in figures when the number is presented in words or expanded form.	Numerals, Figure, Digit, Comma (or space) for thousands	Teacher demonstrates writing numbers from words on the board with table. One student says a number in words, the partner writes it in figures. Worksheet practice converting from words and expanded form to figures.	Whiteboard/ chalkboard illustration, Table of place value and abacus	Pupils should be given application exercises to write numbers up to 10,000 in figures when the number is presented in words or expanded form	Mathematics Primary learner's Book P3 version edited Page: 79 and 78	
	Lesson 4: Reading numbers up to 10000 in figures (1 Period)	To correctly read and pronounce numbers up to 10,000 presented in figures.	"And" Comma	Teacher models reading numbers, emphasizing the comma, e.g. 7,501.	Number cards, digit cards (0-9),	Pupils should be given oral/written to correctly read and pronounce numbers up to	Mathematics Primary learner's Book P3 version edited	

				One Students hold the digit cards and form number; the class reads it aloud. Use number cards with numbers for quick reading drills.		10,000 presented in figures..	Page: 77 and 78	
	Lesson 5: Writing numbers up to 10000 in words (1 Period)	Write the number in words for given numerals up to 10,000.	Number, Spelling	Using table of place value, learners review spelling of number up to 5000 in words, Guided practice on the board, learners expand number ex: $3546=3000+500+40+6$ ask pupils to read related number to each	Poster paper/marker s, Table of place value,	The exercises should be provided to pupils to write umbers given in figure will be provided and check their answers.	Mathemat ics Primary learner's Book P3 version edited Page: 83 and 84	

				place, and read aloud the whole number and write it.				
	Lesson 6: Comparing numbers less than or equal to 10,000 (1 Period)	To compare numbers, using the symbols $>$, $<$, and $=$ to numbers up to 10,000.	Greater than ($>$), Less than ($<$), Equal to ($=$), Compare	In small group, pupils draw a table of place values. Compare numbers with different digits (3-digit vs 4-digit). Compare numbers with the same number of digits. Step-by-step Worksheet practice with mixed problems.	Table of lace value, Number cards, Interactive games different counters, Symbols cards	Provide the application exercises to do by the pupils focused on comparing numbers using the symbols or expressions of comparing.	Mathematics Primary learner's Book P3 version edited Page: 84,85,86 and 87	

	Lesson 7: Arranging numbers less than or equal to 10 000 (2 Periods)	To arrange a set of numbers up to 10,000 in ascending and descending order.	Ascending Order, Descending Order, Sequence	Teacher demonstrates how to finding the smallest number in a list and crossing it out using table of place. Each group is given a set of number cards to physically arrange in ascending order. Repeat process for descending order. The invited learner order the give set.	Number cards, Table of place value	In group, pupils should be given different sequences number for arrangements, and excesses of choosing the correct arrangement	Mathematics Primary learner's Book P3 version edited Page: 87,88,89, 90 and 91	
	Lesson 8: Addition of numbers whose sum does not	To add two numbers vertically whose the sum don't exceed	Add, Plus (+), Sum, Vertical	Use table of place values, to model addition of ones, tens, hundreds,	Base-ten blocks, table of place value, abacus	Pupils should be given activities that involve add	Mathematics Primary learner's Book P3	

	exceed 10 000 without carrying (2 Periods)	10000 without regrouping/carrying.	Addition, Addends	thousands separately. Show how this translates to writing the sum directly in vertical algorithm.		two numbers vertically whose the sum don't exceed 10000 without regrouping/carrying.	version edited Page: 91 and 92	
Week 13: 1-5/12/2025	Lesson 9: Addition of numbers whose sum does not exceed 10 000 with carrying (2 Periods)	To add two numbers vertically whose the sum don't exceed 10000 with regrouping/carrying.	Regroup, Carry Over, Exchange	Use table of place value to show that 10 ones are exchanged for 1 ten and 0 ones etc. Demonstrate the "carry" digit. Guided practice on the board with step-by-step instructions. focusing on carrying in different place	Base-ten blocks, table of place values,	Pupils should be given exercises to add two numbers vertically who's the sum don't exceed 10000 with regrouping/carrying.	Mathematics Primary learner's Book P3 version edited Page: 92 and 93	

				values.				
	Lesson 10: Word problems involving addition of numbers whose sum does not exceed 10000 (1 Period)	To solve real-life word problems involving addition of numbers don't exceed 10,000.	Word problem, Sum, Total, Altogether, Combine	Identify key words that signal the addition fact. Work through examples as a class. Small groups solve different word problems and present their solutions to the class.	The table of place values; Different types of counters A chart showing word problems	Pupils should solve problems involving addition of numbers don't exceed 10,000	Mathematics Primary learner's Book P3 version edited Page: 93 and 94	
	Lesson 11: Subtraction of numbers within 10 000 without borrowing (1 Period)	To subtract two numbers vertically whose the sum don't exceed 10000 without regrouping/borrowing.	Subtract, Minus (-), Difference, Vertical Subtraction	Use the blocks to model question of subtraction. Demonstrate the vertical algorithm, aligning place values. one pupil practices	Base-ten blocks, Different counters	Pupils should work in pair the application exercises of subtracting numbers vertically, and the application activity 1.10.2 then verify	Mathematics Primary learner's Book P3 version edited Page: 95 and 96	

				with problems where each digit in the top number is larger than the one below it.		their answers		
	Lesson 12: Subtraction of numbers within 10 000 with borrowing (1 Period)	To subtract two numbers vertically whose the sum don't exceed 10000 with regrouping/borrow ing.	Regroup, Borrow, Exchange	Use table of place value to demonstrate the need of "borrowing" (e.g., exchange 1 thousand for 10 hundreds). When top number is smaller. Teacher guides practice on the chalkboard, focusing on the step-by-step process across multiple place	Base-ten blocks, Table of place value	Pupils should be given questions requiring borrowing from tens, hundreds, or thousands	Mathemat ics Primary learner's Book P3 version edited Page: 96, 97 and 98	

				values.				
Weeks 14-15: 8-19/ 12/2025 EXAMS OF FIRST TERM								

Teacher's Name:.....
School's Name:.....
Class:.....
Subject:.....

Academic year:
Term: Two
Number of weeks per term:
Number of periods per week:.....

UNIT 3: Number from 0 to 10000

Periods: 10 of 25

Key unit competence: Pupils will be able to count, read, write, order, decompose, expand, compare, add, subtract, and divide whole numbers up to 10,000.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 1: 5-9 Jan 2026	Lesson 13: Word problems involving subtraction of numbers within 10000 (1 Period)	Solve the word problems involving subtraction of numbers up to 10,000.	Subtract, Difference, Minus, Word Problem, Regroup	Teacher models for word problems. Guided Practice Solve problems as a group, focusing on identifying the operation (key words which tell subtraction). Independent Practice on chalkboard	Whiteboard, markers, worksheets, posters of word problems	Pupils should be given the exercise composed by problems involving subtraction of numbers up to 10,000.	Mathematics Primary Learner's Book P3 (Ed.) p.98-99	

	Lesson 14: Multiplication of a 3-digit number by a 2-digit number where the product does not exceed 10,000 (2 periods)	Multiply a 3-digit number by a 2-digit numbers using long multiplication, Where the product does not exceed 10000.	Multiply, Product, Place Value, Ones, Tens	Use a place value chart to demonstrate the long multiplication method. Work through several examples together on white/chalkboard. In a small group, learners solve problems and check each other's work. then individual worksheet focusing on the procedure.	Place value charts, White/chalkboards illustration, ...	Pupils should be given the task that involve use of the long multiplication algorithm on practice problems. (activity: 3.12)	Mathematics Primary Learner's Book P3 (Ed.) p.99-101	
	Lesson 15: Word problems involving multiplication of a 3-digit number by a 2-digit number (2 Periods)	Solve word problems involving multiplication of 3-digits number and 2-digits number with product does	Operation, Solve, Product, each, total.	Help pupils to solve problem, guide them to understand and interpret the problem by the key words, identify facts	Word problem cards, group work templates,	Pupils should be given the exercise, to find the product of known number is within ≤ 10000 . (activity: 3.13).	Mathematics Primary Learner's Book P3 (Ed.) p.101-102	

		not exceed 10000		(given and requested). Solve the problem using the subtraction in small groups. Groups present their solutions and strategies to the class. Solve problems individually.				
Week 2: 12-16/1/ 2026	Lesson 16: Multiply numbers by 100 and 1,000 where the product does not exceed 10,000 (1 Period)	Multiply whole numbers by 100 and 1,000 mentally.	Place Value, Mental, quick multiplications, Zeros	Use a place value chart to show that multiplying by 10, 100, 1000 "moves" digits to the left 2 or 3 places. To multiply by 100, 1000; append two or three zeros after a multiplicand. Practice mental calculations: 24	Place value charts, number cards	The oral questions provided, to speed and accuracy in mental activities during the game. Filling the correct number 100 or 1000. (Activity:3.14)	Mathematics Primary Learner's Book P3 (Ed.) p.102-103	

				x 100; 5 x 1,000, etc. Quick multiplication application practice.				
	Lesson 17: Division without a remainder of a 4-digit number ($<10,000$) by a one-digit number (2 Periods)	Divide numbers up to 10,000 by a one-digit number.	Divide, Division, Short Division, Dividend, Divisor, Quotient	Work through examples together, emphasizing place value and subtracting. Teacher Demonstrate the short division method by-step with a problem like $6864 \div 4$. Emphasize working from left to right.	White/chalkboa rd illustration, Multiplication table, Table of place value	Pupils should be given application activities to be done in groups/individua lly. (activity:2.15)	Mathemati cs Primary Learner's Book P3 (Ed.) p.103-105	
	Lesson 18: Word problems involving division of a number $<10,000$ by a	Solve word problems that require division by a 1-digit number.	Interpret, Quotient, Share, Group, Equal	Applying of brainstorm and list words that signal division (e.g., share equally, each, per, divide into	White/chalkboa rd illustration, Multiplication table,	In small group, Pupil should be given the exercise of division, where answers are	Mathemati cs Primary Learner's Book P3 (Ed.) p.105-106	

	one-digit number (1 Period)	Interpret the quotient in the context of the problem.		groups). Solve a problem together, highlighting how to interpret the answer (e.g., "3456 sweets shared between 8 jars means 432 sweets per jar"). Worksheet with a mix of division word problems.	Table of place value, Chart of problems	≤ 10000 . (activity:3.16).		
	End of Unit Assessment (1 Period)	Assess mastery of all operations (+, -, x, ÷) with numbers up to 10,000 in calculations and word problems.	Assessment, Apply, Calculate, Solve	A comprehensive test including: Straight calculations for all operations. A variety of word problems.	Test papers, pencils, scrap paper	Assessment score based on a detailed marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.106-107	

				A problem requiring multiple. Students complete the test silently.

UNIT 4: Fractions having a numerator less than or equal to 10

Periods:10

Key unit competence: Pupils will be able to read, write, draw, add, and subtract fractions with the same denominator less than or equal to 10, and multiply fractions by a whole number.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week3: 19-23/1/2026	Lesson 1: Introduction of unity (1 Period)	explain the concept of a fraction as a part of a whole.	Whole, Part, Equal Parts, Fraction, Half, Quarter	Use an object or paper shapes (circle, square) and fold them to show halves and quarters. Brainstorm: "What does it mean to share equally?". Students fold	Paper shape, scissors, objects (oranges, sugar can)	Pupils should observe of correct folding and ability to describe the parts.	Mathematics Primary Learner's Book P3 (Ed.) p.108	

				paper or objects to create different equal parts and label them.				
	Lesson 2: Reading and writing the fractions (1 Period)	-Identify the numerator and denominator -Read and write fractions correctly.	Numerator, Denominator, Fraction Bar, Read, Write	Define numerator denominator. Use a diagram. Show fraction flashcards. Students say and write the fraction. Give the instructions of reading the fractions (use ordinal numbers)	Fraction cards, shaded shape diagrams,	Through to the shaded diagram, pupils should write and reading fractions shown and read aloud. Matching fraction, with the correct diagrams. (Activity: 4.1)	Mathematics Primary Learner's Book P3 (Ed.) p.108-112	
	Lesson 3: Comparing and ordering fractions	Compare two fractions with the same denominator,	Greater Than (>), Less Than (<), Equal To (=),	Use fraction circles or bars to show that with the same	Fraction cards, shaded shape diagrams, symbol cards, Pie chart	Pupils should be given the exercises of comparing two fractions	Mathematics Primary Learner's Book P3	

	(1 Period)	less than or equal to 10.	Order, Same Denominator	denominator, the larger numerator means a larger fraction. Compare fractions like $\frac{3}{5}$, $\frac{2}{5}$, and $\frac{4}{5}$ using symbols. Then the learners arrange them in the given order		with the same denominator, less than or equal to 10.	(Ed.) p.115-120	
	Lesson 4: Addition of the fractions of the same denominators (≤ 10) (2 Periods)	Add two fractions with the same denominator..	Add, Sum, Fractions, Whole	Use visual models (pie charts) to show that $\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$. Emphasize that denominators stay the same. Solve addition	Fraction pie charts, white/chalkboard, worksheets	Pupils should be given exercises of solving addition problems individually on the worksheet. (Activity: 4.5)	Mathematics Primary Learner's Book P3 (Ed.) p.120-123	

				exercises as a group, using visuals and numerically fractions. Learners solve exercises of adding fractions.				
Week 4: 26- 30/1/2026	Lesson 5: Subtraction of fractions with denominator s less than 10 (1 Period)	Subtract fractions with the same denominator.	Subtract, Difference, Fractions, take away	Quick practice with addition of fractions. Use a number line or fraction bars to show subtraction. individual problems of subtracting fractions.	Charts of fractions, fraction bars,	Pupils should be given the practice of solving subtraction problems in group. (Activity:4.5)	Mathematics Primary Learner's Book P3 (Ed.) p.123-126	
	Lesson 6: Complement of a fraction to form a unit (1 Period)	Find the complement of a fraction to make 1 whole.	Complement, Whole, One, Total	Use a fraction wall to show that $\frac{1}{4} + \frac{3}{4} = 1$, $\frac{3}{5} + \frac{2}{5} = 1$.	Scissors, knife, fraction cards, Drawings illustrating parties	Pupils should be given the exercises of finding complement fraction.	Mathematics Primary Learner's Book P3 (Ed.) p.126-127	

				Pose problems: "What can i add to $\frac{7}{8}$ to make one whole?" The teacher demonstrates that the denominator represents the whole ($\frac{8}{8}$). complement is $\frac{8}{8} - \frac{7}{8} = \frac{1}{8}$ is complement of $\frac{7}{8}$.		(activity:4.7)		
	Lesson 7: Fraction of a number of real objects (1 Period)	Find a fraction of a number for real objects and a fraction of a number	Fraction of a Set, Share, Group, Divide	Give students 12 oranges. Ask them to find $\frac{1}{3}$ of 12 oranges, by dividing into 3 equal groups. To find $\frac{1}{3}$ of 12	Different Counters (oranges, beans,	Pupils should be given exercise of using the counters, teacher provide the counters to find the	Mathematics Primary Learner's Book P3 (Ed.) p.127-130	

				oranges, divide 12 oranges by 3. The $\frac{1}{3}$ of 12 oranges is 4 oranges. Teacher provide different objects, Solve problems of finding fractions of small sets of objects.		fraction of a set in group. Learners solve related problem individually (activity: 4.8)		
	Lesson 8: Word problems involving a fraction of a whole number (1 Period)	Solve word problems that involve finding a fraction of a whole number.	Word Problem, Solve, Share, Groups	Review problem-solving steps (Read and Understand). Solve a problem together: "If $\frac{1}{5}$ of 20 children are boys, how many boys are there?"	Word problem worksheets, White/chalkboard illustration	Pupils should be given the word problems to be solved in group. Teacher assign the word problems for the homework. activity: 4.9	Mathematics Primary Learner's Book P3 (Ed.) p.130-132	

				learners solve word problem.				
	End of Unit Assessment (1 Period)	Assess understanding of reading, writing, comparing, adding, subtracting fractions, and finding a fraction of a set.	Assessment, Fractions, Apply	Short test covering: Shading fractions, Comparing, fractions, Adding & subtracting, fractions, Finding a fraction of a number. and word problem.	Test papers, pencils	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.133-134	

UNIT 5: Relationship between length measurements

Periods :10

Key unit competence: Pupils will be able to measure, convert, compare, add, and subtract length measurements and multiply/ divide length measurements by a whole number.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
WEEK 5:2-6 Feb 2026	Lesson 1: Introduction of the unit (1 Period)	Identify different tools used to measure length.	Length, Measure, Standard Units, Meter (m), Centimeter (cm), Ruler, Tape Measure	How tall are we or how long is our desk?" Brainstorm ways to measure. Show a ruler, meter stick, and tape measure. Discuss what we use each for. Students estimate the length of objects.	Rulers, meter sticks, tape measures, classroom objects.	Pupils should be given the oral questions asked to arouse the curiosity, that help them to understand the unit.	Mathematics Primary Learner's Book P3 (Ed.) p.135	
	Lesson 2: Measuring the length of objects (1 Period)	Measure and determine the distance between	Measure, Centimeter (cm), Ruler, Zero Mark, Accurate	Invite pupils to observe materials of measuring and explain	Rulers, various objects, (pencils, books, etc.), recording sheets,	Teacher provide the practice of measuring different	Mathematics Primary Learner's Book P3	

		different places(objects) Using a meter or a decameter.		instructions to be done. Teacher models how to use a ruler other measurement s tools. In group, students measure 5 different objects and record their lengths.	meter or centimeter, folding meter, measuring tape,	objects, and recording lengths during the hunt.	(Ed.) p.138-140	
	Lesson 3: Relationship between length measurement s and their conversion (2 Periods)	Convert the units of length measurements .	Meter (m), Centimeter (cm), Convert, Relationship .	Show a meter stick and point out that it is 100 cm long. Count the centimeters. Practice of converting m to cm (multiply by 100) and cm to m (divide by 100)	Meter sticks, rulers, conversion chart,	Assign the application practices of completing conversion problems individually Activity:5.7	Mathematics Primary Learner's Book P3 (Ed.) p.135-138	

				Use the conversion table				
	Lesson 4: Comparing lengths and arranging objects (1 Period)	Compare lengths measurements using comparison symbols. Arrange objects from shortest to longest and vice versa.	Compare, Longer than, Shorter than, Order, Sequence	Teacher invite 1 pupils to measure the group of sticks of different length. Students order them from shortest to longest. Introduce and use <, >, and = to compare the lengths of two objects.	Sticks of different lengths, comparison symbol cards, meter	Pupils should apply the activities of ordering objects and correct use of comparison symbols. Activity: 5.3 and 5.4	Mathematics Primary Learner's Book P3 (Ed.) p.140-144	
Week6: 9-13/2/2026	Lesson 5: Addition of length measurements (1 Period)	. Add lengths measurements . convert the answer in the correct unit.	Add, Sum, Total, Plus, Unit, convert	Solve addition problems with and without conversion before learners, (e.g., 30cm +	White/chalkboard illustration, rulers for visual aid, table of conversion	In group, learners solve addition problems on the worksheet. Activity: 5.5	Mathematics Primary Learner's Book P3 (Ed.) p.144-146	

				45cm; 2m + 3cm) Worksheet with length addition problems focusing on convert answer in the same unit.				
	Lesson 6: Subtraction of length measurements (1 Period)	Subtract length measurements .	Subtract, Difference, Minus, How much longer, How much shorter	The distance of a rope from A to C is 200 cm. They cut the part of 50 cm from B to C. What is the length of the? remaining rope? Solve subtraction problems with and without conversion.	White/chalkboard illustration, objects of different lengths, table of conversion chart	Provide the activities to solve by the learners, including subtraction, with or without conversion. Activity: 5.6	Mathematics Primary Learner's Book P3 (Ed.) p.146-148	

				Take care of converting in the same unit				
	Lesson 7: Multiplying length measurement s by a number (1 Period)	Multiply a length by a whole number.	Multiply, Product, Whole, repeated addition	Show that multiplying length is like repeated addition. $3 \times 10\text{cm} = 10\text{cm} + 10\text{cm} + 10\text{cm} = 30\text{cm}$. Solve other problems like $4 \times 5\text{m}$, $6 \times 10\text{cm}$. learners works with multiplication problems.	White/chalkboard , stick of 10cm	Pupils should be given tasks of solving of multiplication problems in group. Activity: 5.7	Mathematics Primary Learner's Book P3 (Ed.) p.148-150	
	Lesson 8: Dividing length measurement by a number (1 period)	Divide a length by a whole number.	Divide, Share, Equal Parts, Quotient	I have a 10m string. I need to cut it into 5 equal pieces. How long is each piece?" Teacher Solve divide string into 5	String, scissors (for demo), Others objects to be divided	Solving division problems on the worksheet. And the problems involving division	Mathematics Primary Learner's Book P3 (Ed.) p.150-152	

				parts using scissor and ask the parties he get. Like $30\text{cm} \div 5$, $12\text{m} \div 3$.		assigned as homework.		
	End of Unit Assessment (1 Period)	Assess the ability to measure, convert, compare, and perform operations on lengths.	Assessment, Measure, Convert, Calculate	Short test with: - Measuring an object. - A conversion problem. - Addition and subtraction problems. - Multiplicatio n and division problems.	Test paper, ruler, pencil Worksheets	Summative assessment score based on a marking scheme.	Mathematic s Primary Learner's Book P3 (Ed.) p.152- 153	

UNIT 6: Mass measurements from kilogram to gram

Periods :10

Key unit competence: Pupils will be able to measure and compare the weight of different objects not exceeding 10kg, add, subtract, multiply, and divide mass measurements from kg up to g.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 7: 16- 20/2/2026	Lesson 1: Introduction of the unit (1 Period)	- Understand that mass is how heavy or light an object is. - Identify tools used to measure mass.	Mass, Weight, Heavy, Light, Scale, Balance, Kilogram (kg), Gram (g)	What does it mean for something to be heavy or light?" Show different objects (a feather, a book). Show a kitchen scale and a balance scale. Discuss how they are used. Students hold objects and estimate if they are heavier or lighter than 1kg.	Objects(Rock, feather, book, pencil), kitchen scale, balance scale	Pupils should Participate in discussion and reasonable estimations of weight	Mathematics Primary Learner's Book P3 (Ed.) p.154	

	Lesson 2: Measuring, reading and writing the mass of objects (1 Period)	Measure, read and write the mass of objects	Measure, Read, Scale, Kilogram (kg), Gram (g), Record	Show how to read a scale: identify the unit (kg or g), and see where the needle points. Measure different objects using scales. Students read and record the mass. In groups, use a scale to measure the mass of provided objects (e.g., a bag of rice, a pencil case).	Kitchen scale, balance scale, objects to weigh, image of scales on board	Pupils should do application activities of measuring, reading and writing mass measurements during the hands-on activity.	Mathematics Primary Learner's Book P3 (Ed.) p.154- 156	
	Lesson 3: Relationship between mass measurements and their conversion (1 Period)	Show relationship between mass measurements Conversion of mass	Convert, Relationship , Multiply, Divide	Using a conversion table, show a 1kg weight. Explain it is equal to 1000g.	Balance, scale, conversion table,	Pupils should do activities of completing, converting and matching mass	Mathematics Primary Learner's Book P3 (Ed.) p.156- 159	

		measurements		Use also the balance graduated in kg other in g to justify. Worksheet with conversion problems.		measurements provided to be solved. Activity:6.2		
	Lesson 4: Comparing mass measurements (1 Period)	Compare masses measurements using comparison symbols (<, >, =).	Compare, Heavier than, Lighter than, Equal to, Symbol	Use a balance scale to compare the mass of two objects. Student lift up different objects to test their weight. Use <, >, and = to compare the masses of two objects based on measurements or the scale. Compare masses using symbols.	Balance scale, objects of different masses, comparison symbol cards, worksheets	In group, pupils should be given the activities of comparing units of mass, and using comparison symbols. Activity : 6.3	Mathematics Primary Learner's Book P3 (Ed.) p.159-161	

	Lesson 5: Arranging objects according to their mass (1 Period)	Order objects from lightest to heaviest and vice versa.	Order, Sequence, Lightest, Heaviest	Grouping 3-4 objects. Using a balance scale they try to order them from lightest to heaviest. Given a list of masses, order them from heaviest. Given different units, convert them in the same unit.	Balance scale, sets of objects for groups, table of conversion	Pupils should do both ordering of objects physically and units (numerically) · Activity: 6.4	Mathematics Primary Learner's Book P3 (Ed.) p.161-163	
Week 8: 23-27/2/2026	Lesson 6: Addition of mass measurements (1 Period)	Add masses with or without converting	Add, Sum, Total, Plus	In the bag, there is 2kg of flour and 1kg of sugar. What is the total mass of a bag?" Solve addition problems, ensuring units are different before adding.	White/chalkboard, bags of flour/sugar, table of conversion	In a small group of pupils, they should solve addition problems with or without conversion. Activity: 6.5	Mathematics Primary Learner's Book P3 (Ed.) p.164-165	

				Learners Works with mass addition problems.				
	Lesson 7: Subtraction of mass measurements (1 Period)	Subtract mass measurements with or without converting	Subtract, Difference, How much more, How much less	The chicken weighs 3kg. The fish weighs 1kg. How much heavier is the chicken? Solve subtraction problems with different unit.	Whiteboard, balance, Different object weight.	Pupils should be given the subtraction problems with or without converting. Act; 6,6	Mathematics Primary Learner's Book P3 (Ed.) p.165-166	
	Lesson 8: Multiplying mass measurements by a number (1 Period)	Multiply a mass by a whole number.	Multiply, Product, Repeated Addition	Show that multiplying mass is like repeated addition with the given times. E.g. $4 \times 500\text{g} = 500\text{g} + 500\text{g} + 500\text{g} + 500\text{g} = 2000\text{g}$ (2kg).2. Solve problems like	Whiteboard, worksheets	Pupils should do the application activities of solving multiplication problems of mass measurement. Act: 6.7	Mathematics Primary Learner's Book P3 (Ed.) p.166-167	

				3 x 2kg, 5 x 200g.3.				
	Lesson 9: Dividing mass measurement by a number (1 Period)	Divide a mass measurement by a whole number.	Divide, Share, Equal Parts, Quotient	We need to share 4kg of beans equally into 2 bags. How many kg in each bag?" Solve division problems like $6\text{kg} \div 3$, $800\text{g} \div 4.3..$	Chalkboard illustration, different counters, worksheets	In small group, the learners solve division problems. Act: 6.8	Mathematics Primary Learner's Book P3 (Ed.) p.168-169	
	End of Unit Assessment (1 Period)	Assess the ability to measure, convert, compare, and perform operations on mass.	Assessment, Measure, Convert, Calculate	Written Test: Short test with: - Reading a scale. - A conversion problem. - Comparison using symbols. - Addition, subtraction, multiplication, and division problems.	Test paper, pencil Chalkboard.	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.170	

Unit 7: Capacity Measurements

Periods :5

Key unit competence: Measure and compare the capacity of different objects in liters. Addition, subtraction, multiplication, and division of capacity measurements from liter (l) to millilitre (ml).

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 9: 2-6/3/2026	Lesson 1: Introduction of the unit (1 Period)	Understand that capacity is the amount a container can hold.- Identify tools and units for measuring capacity.	Capacity, Volume, Hold, Liter (l), Milliliter (ml), Measuring Jug, Cylinder	“Which holds more water, a cup or a bucket?” Discuss what capacity means. Show a measuring jug and a graduated cylinder. Point out the scales in liters (l) and milliliters (ml). estimate the capacity of different containers (bottle, cup, spoon).	Various containers (bottle, cup, spoon), measuring jug, graduated cylinder	Pupils should be given/asked question that help to understand that capacity is the amount a container can hold.- Identify tools and units for measuring capacity.	Mathematics Primary Learner's Book P3 (Ed.) p.171	
	Lesson 2: Measuring, reading, writing	Measure, read and write the capacity of objects.	Measure Read, Scale, Liter (L),	Show a 1L bottle. Explain it is equal to 1000mL. Pour it into a jug with	1L bottle, measuring jugs, water/rice,	The application exercises of reading	Mathematics Primary Learner's Book P3	

	capacity, and conversion (2 Periods)		Milliliter Convert	mL markings to show this Practice reading the capacity of different liquids in measuring jugs from images and real tools. Practice converting L to ml and mL to L using conversion table	images of scales, conversion table.	scales and completing conversion problems. Act: 7.1-7.2	(Ed.) p.171-175	
	Lesson 3: Comparing and ordering capacity measurements (1 Period)	Compare capacities measurements. Order containers from least to greatest capacity.	Compare, Holds more, Holds less, Equal to, Order, Sequence	Pour water from different containers into a measuring jug to compare their capacities. Use <, >, and = to compare numerical capacities measurement .	Measuring jug, various containers, water, comparison symbol cards, conversion table.	Pupils should be given exercise involving use of comparison symbols and accurate ordering numerical units.	Mathematics Primary Learner's Book P3 (Ed.) p.175-177	
	Lesson 4: Addition and subtraction of	Add and subtract capacity measurements.	Add, Subtract, Sum, Difference,	“A recipe needs 500mL of milk and 200mL of water. What is the	Chalkboard illustrating, measuring jug for	Pupils should be given problem that	Mathematics Primary Learner's Book P3	

	capacity measurements (1 Period)		Total, How much more	total liquid?" "You have 1L of juice. You drink 200mL. How much is left?". Solve addition and subtraction problems, ensuring different or the same units.	visual aid, conversion table.	help the valuating activity concern, solving addition and subtraction problems in group.	(Ed.) p.179-181	
	End of Unit Assessment (1 Period)	Assess the ability to measure, convert, compare, add, and subtract capacities.	Assessment, Measure, Convert, Calculate, Compare	Short test with: - Reading a scale on a measuring jug. -A conversion problem. - An addition and a subtraction word problem.	Test paper, pencil, images of measuring jugs for questions	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.187	

UNIT 8: Rwandan Currency from 1 Frw to 5000 Frw

Periods :10

Key unit competence: Pupils will be able to use up to 5000Frw appropriately for buying and selling.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 10: 9-13/3/2026	Lesson 1: Introduction of the unit (1 Period)	Identify Rwandan currency (coins and notes). Understand that money is used to buy goods and services.	Money, Currency, Rwandan Franc (Frw), Buy, Sell, Goods, Services	Discussion: "What do we use money for?" Discuss buying things like food, books, and toys. Currency Show: Show real or pictures of Rwandan coins and notes (1Frw to 5000Frw). Discuss their colors, images, and values.3. Sorting: In groups, sort pictures of	Real/picture cards of Rwandan currency, items for "sale" (e.g., pencil, book)	Pupils should be asked questions that help the to identify Rwandan currency (coins and notes), and understand that money is used to buy goods and services.	Mathematics Primary Learner's Book P3 (Ed.) p.188	

				currency from smallest to largest value.				
	Lesson 2: Characteristics and values of the Rwandan currency (1 Period)	Recognize and state the value of each coin and note from 1Frw to 5000Frw.	Coin, Note, Value, Recognize, Identify	Flashcard Drill: Use flashcards of currency. Hold one up, students say its value. Matching Game: Match pictures of currency to their value written in numbers and words. Worksheet: Label pictures of coins/notes with their correct value.	Currency flashcards, matching cards, worksheets	Pupils should be given questions that help them to recognize and state the value of each coin and note from 1Frw to 5000Frw.	Mathematics Primary Learner's Book P3 (Ed.) p.188-189	
	Lesson 3:	Make equivalent amounts	Change, Equivalent,	Demo: Show that 500Frw can be one	Play money (coins and	Pupils should be given exercises that	Mathematics Primary Learner's	

	Changing Rwandan currency (1 Period)	using different combinations of coins and notes (e.g., 1000Frw can be one 1000Frw note or ten 100Frw coins).	Combine, Exchange	500Frw note or five 100Frw coins using real/picture money. Group Activity: "Can you make 1000Frw in three different ways?" Groups use play money to find combinations. Practice: Worksheet on making equivalent amounts.	notes), worksheets	help them to make equivalent amounts using different combinations of coins and notes (e.g., 1000Frw can be one 1000Frw note or ten 100Frw coins).	Book P3 (Ed.) p.189-191	
	Lesson 4: Word problems: Addition of currency (1 Period)	Solve simple word problems involving the addition of prices up to 5000Frw.	Add, Total Cost, Sum, Price	Real-life Context: Create a simple "menu" with prices (e.g., banana 50Frw, juice 200Frw). "If I buy both, how	Class "menu" on board, play money, worksheets	Pupils should be given problems to solve simple word problems involving the addition of	Mathematics Primary Learner's Book P3 (Ed.) p.192	

				much do I pay?" Guided Practice: Solve addition problems as a class. Practice: Worksheet with addition word problems.		prices up to 5000Frw.		
	Lesson 5: Word problems: Subtraction of currency (1 Period)	Solve simple word problems involving subtraction to find change up to 5000Frw.	Subtract, Change, How much left, Cost, Paid	Role-play: Set up a shop. A student buys an item for 250Frw and pays with 500Frw. "How much change do they get?" Guided Practice: Solve subtraction	Classroom shop setup, play money, worksheets	Pupils should solve simple word problems involving subtraction to find change up to 5000Frw.	Mathematics Primary Learner's Book P3 (Ed.) p.193	

				problems as a class. Practice: Worksheet with subtraction (change) word problems.				
Week11: 16-20/3/2026	Lesson 6: Word problems: Multiplication of currency (1 Period)	Solve problems involving multiplying a price by several items (e.g., cost of 3 sweets at 100Frw each).	Multiply, Each, Total, Cost	Real-life Context: "If one pencil costs 100Frw, how much do 5 pencils cost?" Use repeated addition or multiplication. Guided Practice: Solve multiplication problems as a class. Practice: Worksheet	Real objects with price tags, worksheets	Pupils should solve problems involving multiplying a price by several items (e.g., cost of 3 sweets at 100Frw each).	Mathematics Primary Learner's Book P3 (Ed.) p.194	

				with multiplication word problems.				
	Lesson 7: Word problems: Division of currency (1 Period)	Solve problems involving sharing money equally or finding the cost of one item.	Divide, Share, Equal, Each, Cost per item	Real-life Context: "600Frw is shared equally between 3 children. How much does each get?" "4 apples cost 800Frw. How much is one apple?" Guided Practice: Solve division problems as a class. Practice: Worksheet with division word problems.	Play money for sharing, worksheets	Pupils should be given tasks to solve problems involving sharing money equally or finding the cost of one item.	Mathematics Primary Learner's Book P3 (Ed.) p.195	

	Lesson 8: Buying and selling (1 Period)	Simulate simple buying and selling transactions using appropriate language and calculating change.	Buy, Sell, Shopkeeper, Customer, Transaction, Change	Role-play: Set up a classroom market. Students use play money to buy and sell items, calculating totals and change. Focus: Use polite language ("How much is this?", "Thank you"). Discussion: Discuss the roles of buyer and seller.	Classroom market with items priced, play money	Pupils should be given exercises to simulate simple buying and selling transactions using appropriate language and calculating change.	Mathematics Primary Learner's Book P3 (Ed.) p.196- 197	
	Lesson 9: Saving and small projects (1 Period)	Understand the concepts of saving money and how small projects can	Save, Saving, Income, Project, Profit	Discussion: "Why is it important to save money?" Discuss goals like buying a larger item.	Story/case study about saving, picture of a piggy bank	Pupils should be given exercises that help to understand the concepts of saving money and	Mathematics Primary Learner's Book P3 (Ed.) p.197- 198	

		generate income.		Story: Read a short story or case study about a child who saved money from a small project (e.g., selling fruits). Plan: As a class, brainstorm a small imaginary project and how much money it could make.		how small projects can generate income.		
	End of Unit Assessment (1 Period)	Assess the ability to identify currency, make change, and solve money word problems.	Assessment, Identify, Calculate, Solve	Practical & Written: Short test with: - Identifying coins/notes. - Making an equivalent amount.	Test paper, pictures of currency	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.199	

				- Solving word problems (add, subtract, multiply, divide). - A simple change calculation.				
Weeks 27-28:		EXAMS OF THE SECOND TERM						

Teacher's Name:.....
School Name:.....
Class:.....
Subject:.....

Academic year:
Term: Three
Number of weeks per term:
Number of periods per week:.....

Unit 9: Time measurements.

Periods:15

Key unit competence: Pupils will be able to read and write the time shown clock faces or digital watches, use a calendar to show months of the year, days of each month and make a list of daily, weekly and monthly activities.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 1: 20-24/4/2026	Lesson 1: Introduction of the unit (1 Period)	Understand that time can be measured in hours, minutes, days, etc.- Identify tools we use to measure time.	Time, Clock, Watch, Calendar, Hour, Minute	Discussion: "What do we use to tell the time?" (clock, watch, phone). "What do we use to know the date?" (calendar). Tool Show: Show an analog clock, a digital	Analog clock, digital clock, calendar, pictures of daily activities	Pupils should be given/asked problems that help them to participate in discussions that help them to understand that time can be measured in hours, minutes, days, etc.- Identify tools	Mathematics Primary Learner's Book P3 (Ed.) p.200	

				clock, and a calendar. Brainstorm: List activities we do at different times of the day (morning, afternoon, evening).		we use to measure time.		
	Lesson 2: Reading & telling time: O'clock (2 Periods)	Read and tell time to the hour on an analog clock. Write the time in words and digital form (e.g., 3 o'clock, 3:00).	O'clock, Hour Hand, Minute Hand, Analog, Digital	Demo: Use a large teaching clock. Show how the minute hand points to 12 for o'clock times. Guided Practice: Teacher sets the clock to different hours, students say and write the time.	Large teaching clock, individual student clocks, matching cards, worksheets	Pupils should be given the task of reading and tell time to the hour on an analog clock, and write the time in words and digital form (e.g., 3 o'clock, 3:00).	Mathematics Primary Learner's Book P3 (Ed.) p.200-201	

				Matching: Match analog clock pictures to digital times and time words. Practice: Worksheet on o'clock times.				
	Lesson 3: Reading & telling time: Half Past (1 Period)	Read and tell time to the half hour on an analog clock. Understand that 'half past' means 30 minutes past the hour.	Half Past, Minute Hand, Hour Hand, 30 Minutes	Demo: Use the teaching clock. Show how the minute hand points to 6 and the hour hand is halfway between two numbers for 'half past'. Guided Practice: Teacher sets the clock to different half-	Large teaching clock, individual student clocks, worksheets	Pupils should be given exercises involving reading and telling time to the half hour on an analog clock, and understand that 'half past' means 30 minutes past the hour.	Mathematics Primary Learner's Book P3 (Ed.) p.201-202	

				past times, students say and write the time. Practice: Worksheet on half-past times.				
Week 2: 27/4-1/5/2026	Lesson 4: Reading & telling time: Quarter Past (1 Period)	Read and tell time 'quarter past' the hour (15 minutes past).	Quarter Past, 15 Minutes Past	Demo: Use the teaching clock. Show how the minute hand points to 3 for 'quarter past'. Relate a quarter to 15 minutes. Guided Practice: Teacher sets the clock to different quarter-past times, students say	Large teaching clock, individual student clocks, worksheets	Pupils should be given exercises of reading and tell time 'quarter past' the hour (15 minutes past).	Mathematics Primary Learner's Book P3 (Ed.) p.202-203	

				and write the time. Practice: Worksheet on quarter-past times.				
	Lesson 5: Reading & telling time: Quarter To (1 Period)	Read and tell time 'quarter to' the hour (15 minutes to the next hour).	Quarter To, 15 Minutes To	Demo: Use the teaching clock. Show how the minute hand points to 9 for 'quarter to'. Explain that we look at the <i>next</i> hour. Guided Practice: Teacher sets the clock to different quarter-to times, students say and write the time.	Large teaching clock, individual student clocks, worksheets	Pupils should be given exercises of reading and tell time 'quarter to' the hour (15 minutes to the next hour).	Mathematics Primary Learner's Book P3 (Ed.) p.203-204	

				Practice: Worksheet on quarter-to times.				
	Lesson 6: Use of a calendar (2 Periods)	Identify the days of the week and months of the year.- Find a specific date on a calendar.	Calendar, Day, Week, Month, Year, Date	Explore: Give each student or group a calendar. Find today's date, their birthday, etc. Sing Songs: Sing songs for days of the week and months of the year. Questions: "What day comes after Tuesday?" "What month is before April?" Practice: Worksheet	Monthly calendars (one per student/group), days & months songs/charts, worksheets	Pupil should have the ability to locate dates and answer questions using a calendar.	Mathematics Primary Learner's Book P3 (Ed.) p.207- 208	

				answering questions using a calendar.				
	Lesson 7: Converting days into hours (1 Period)	Understand that 1 day = 24 hours. Convert a number of days into hours.	Convert, Day, Hour, 1 day = 24 hours	Discussion: "How many hours are in one day and one night?" Guided Practice: Solve problems like "2 days = ? hours" (2 x 24 = 48 hours). Practice: Worksheet on converting days to hours.	Whiteboard, chart showing 1 day = 24 hours, worksheets	Pupils should be given the activities to understand that 1 day = 24 hours, and convert a number of days into hours.	Mathematics Primary Learner's Book P3 (Ed.) p.208	
Week 3: 4-8/5/2026	Lesson 8: Converting weeks into days (1 Period)	Understand that 1 week = 7 days.- Convert a number of	Week, Day, 1 week = 7 days, Convert	Review: Sing the days of the week song. How many days are in one week?	Days of the week chart, whiteboard, worksheets	Pupils should be given problems of understanding that 1 week = 7 days.-	Mathematics Primary Learner's Book P3 (Ed.) p.209	

		weeks into days.		Guided Practice: Solve problems like "3 weeks = ? days" ($3 \times 7 = 21$ days). Practice: Worksheet on converting weeks to days.		Convert a number of weeks into days.		
	Lesson 9: Converting years into months (1 Period)	Understand that 1 year = 12 months. Convert a number of years into months.	Year, Month, 1 year = 12 months, Convert	Review: Sing the months of the year song. How many months are in one year? Guided Practice: Solve problems like "2 years = ? months" ($2 \times 12 = 24$ months).	Months of the year chart, whiteboard, worksheets	Pupils should be given exercises that help them to understand that 1 year = 12 months, and convert a number of years into months.	Mathematics Primary Learner's Book P3 (Ed.) p.209-210	

				Practice: Worksheet on converting years to months.				
	Lesson 10: Ordinary year and leap year (1 Period)	Know that most years have 365 days and a leap year has 366 days. Know that February has 28 or 29 days.	Ordinary Year, Leap Year, February, 365 days, 366 days	Demo: Show calendars for February in an ordinary year (28 days) and a leap year (29 days). Discussion: "Why do we have leap years?" (Simple explanation: to match the calendar with the Earth's orbit). Activity: Find the current year on a calendar.	Calendars showing February, list of recent/upcoming leap years	Participation in discussion and identifying February on a calendar.	Mathematics Primary Learner's Book P3 (Ed.) p.210- 211	

				Is it a leap year?				
	Lesson 11: Planning daily, weekly, and monthly activities (1 Period)	Create simple schedules for daily, weekly, and monthly activities.	Plan, Schedule, Daily, Weekly, Monthly, Routine	Group Work: In groups, create a poster listing 3 daily, 2 weekly, and 1 monthly activity (e.g., daily: brush teeth, weekly: football practice, monthly: visit grandma). Presentation: Groups present their posters to the class.3. Individual Task: Students create a simple personal schedule for	Poster paper, markers, example schedule	Pupil should be given exercises to create simple schedules for daily, weekly, and monthly activities.	Mathematics Primary Learner's Book P3 (Ed.) p.211-214	

				their tomorrow.				
	End of Unit Assessment (1 Period)	Assess the ability to read time, use a calendar, and understand basic time conversions.	Assessment, Read Time, Calendar, Convert	Written Test: Short test with: Reading analog clocks (o'clock, half past, quarter past/to). Answering questions using a calendar. Simple conversions (days to hours, weeks to days). Listing one daily and one weekly activity.	Test paper, pictures of a calendar for reference	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.215	

UNIT 10: Types of lines and angles

Periods: 5

Key unit competence: Pupils will be able to identify and draw parallel, perpendicular and intersecting lines, draw and compare right, acute and obtuse angles.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 4: 11-15/5/2026	Lesson 1: Introduction of the unit (1 Period)	- Identify different types of lines in the environment. - Understand that this unit is about lines and angles.	Line, Straight, Curved, Geometry, Angle	Line Hunt: Students find and point out examples of straight and curved lines in the classroom (e.g., edge of door, wire, clock hands). Discussion: "What is a line? What is a corner?" Introduce the term 'angle'. Overview: Briefly	Objects in the classroom with clear lines, pictures	Pupils should be given question that help them to participate in the line hunt and discussion.	Mathematics Primary Learner's Book P3 (Ed.) p.216	

				explain that we will learn about special types of lines and angles.				
	Lesson 2: Straight, Parallel, and Perpendicular lines (1 Period)	Identify and draw straight, parallel, and perpendicular lines.	Straight Line, Parallel Lines, Perpendicular Lines, Intersect, Right Angle	Demo: Use rulers, books, and tiles to demonstrate parallel (never meet) and perpendicular (form a square corner) lines. Body Demo: Students use their arms to make parallel and perpendicular lines. Drawing: Students use rulers to practice drawing pairs of parallel	Rulers, notebooks, pencils, examples of parallel/perpendicular lines (railroad tracks, window panes)	Pupil should be given task involving identifying and draw straight, parallel, and perpendicular lines.	Mathematics Primary Learner's Book P3 (Ed.) p.216-218	

				and perpendicular lines in their notebooks.				
	Lesson 3: Right, Obtuse, and Acute angles (1 Period)	Identify right, acute, and obtuse angles. Compare angles based on their openness.	Right Angle, Acute Angle, Obtuse Angle, Corner, Open, Closed	Angle Maker: Students use two pencils or straws fastened with a paper clip to create different angles. Comparison: Compare the angles to a right angle (e.g., a book corner). Acute is smaller, obtuse is larger. Sorting: Sort pictures of angles into	Two straws/pencils per student, paper fasteners, right angle templates (from paper), angle pictures	Pupil should be given exercises that help them to identify right, acute, and obtuse angles, and compare angles based on their openness.	Mathematics Primary Learner's Book P3 (Ed.) p.219-221	

				right, acute, and obtuse groups.				
	Lesson 4: Drawing, measuring, and comparing angles (1 Period)	Use a right-angle template to check if an angle is right, acute, or obtuse. Compare two angles and decide which is larger.	Compare, Larger, Smaller, Right Angle Checker, Estimate	Make a Tool: Students create a right-angle checker by folding a paper square diagonally. Investigation : Use the checker to investigate angles in the classroom (e.g., on chairs, tables, books). Comparison: Given two drawn angles, students estimate and then use their checker to see	Square paper for folding, worksheets with drawn angles	Pupils should be given exercises that help to use a right-angle template to check if an angle is right, acute, or obtuse, and compare two angles and decide which is larger.	Mathematics Primary Learner's Book P3 (Ed.) p.222-225	

				which is larger.				
	End of Unit Assessment (1 period)	- Assess the ability to identify, draw, and compare lines and angles.	Assessment, Identify, Draw, Compare	Practical & Written: Short test with: - Drawing a pair of parallel and perpendicular lines. - Identifying angles in pictures as right, acute, or obtuse. - Using a right-angle checker on a drawn angle. - Comparing two angles.	Test paper, pencil, right-angle checker	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.226	

UNIT 11: Square, rectangle, triangle and circle.

Periods:10

Key unit competence: Pupils will be able to draw and describe a square, rectangle, triangle and circle, and find the perimeter of a square, rectangle, and triangle.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 5: 18-22/5/26	Lesson 1: Square: Characteristics & Perimeter (1 Period)	Identify and describe the properties of a square. Calculate the perimeter of a square.	Square, Side, Equal, Right Angle, Perimeter, Distance Around	Shape Hunt: Find square objects in the classroom (e.g., sticky note, tile). Properties: Guide students to see that a square has 4 equal sides and 4 right angles. Perimeter: Introduce perimeter as the distance around a shape. For a square, $P = \text{side} + \text{side} + \text{side} + \text{side}$ or $4 \times \text{side}$.	Square objects, rulers, worksheets with squares	Pupils should be given the exercises involving identifying and describing the properties of a square, and calculate the perimeter of a square.	Mathematics Primary Learner's Book P3 (Ed.) p.227-230	

				Practice: Calculate the perimeter of drawn squares.				
	Lesson 2: Rectangle: Characteristics & Perimeter (1 Period)	Identify and describe the properties of a rectangle.- Calculate the perimeter of a rectangle.	Rectangle, Length, Width, Opposite sides equal, Right Angle, Perimeter	Shape Hunt: Find rectangular objects (e.g., book, door). Properties: Guide students to see that a rectangle has 4 sides, opposite sides are equal, and 4 right angles. Perimeter: For a rectangle, $P = \text{length} + \text{width} + \text{length} + \text{width}$ or $2 \times (\text{length} + \text{width})$. Practice: Calculate the perimeter of drawn rectangles.	Rectangular objects, rulers, worksheets with rectangles	Pupil should be given activities that help them to identify and describe the properties of a rectangle, and calculate the perimeter of a rectangle.	Mathematics Primary Learner's Book P3 (Ed.) p.230-233	
	Lesson 3:	Identify a triangle as a three-	Triangle, Sides, Vertices,	Variety Show: Show pictures of many different	Pictures of various triangles,	Pupils should be given problems of	Mathematics Primary Learner's	

	General characteristics of a triangle (1 Period)	sided shape. Understand that triangles can look different.	Corners, Angles	types of triangles (big, small, skinny, fat). Commonality: Help students see that they ALL have 3 sides and 3 corners (vertices). Drawing: Students practice drawing different triangles.	geoboards & rubber bands, paper	identifying a triangle as a three-sided shape, and Understanding that triangles can look different.	Book P3 (Ed.) p.233-234	
	Lesson 4: Equilateral Triangle (1 Period)	Identify an equilateral triangle based on its properties (all sides equal).	Equilateral Triangle, Equal Sides, Equal Angles	Demo: Use straws or strips of paper of equal length to build an equilateral triangle. Discovery: Students measure the sides of drawn equilateral triangles to confirm they are all equal.	Straws/card strips of equal length, rulers, triangle templates	Pupils should be given exercises to identify an equilateral triangle based on its properties (all sides equal).	Mathematics Primary Learner's Book P3 (Ed.) p.234-235	

				Art: Create patterns using equilateral triangle stamps or stencils.				
	Lesson 5: Isosceles Triangle (1 Period)	Identify an isosceles triangle based on its properties (two sides equal).	Isosceles Triangle, Two Equal Sides, Two Equal Angles	Demo: Use straws where two are the same length and one is different to build an isosceles triangle. Discovery: Students measure the sides of drawn isosceles triangles to find the two equal sides. Sorting: Sort triangle images into "isosceles" and "not isosceles" groups.	Straws/card strips (two equal, one different), rulers, sorting cards	Pupils should be assigned the exercises that involve identifying an isosceles triangle based on its properties (two sides equal).	Mathematics Primary Learner's Book P3 (Ed.) p.235	
Week6: 25-29/5/26	Lesson 6: Right-Angled Triangle (1 Period)	Identify a right-angled triangle based on its	Right-Angled Triangle, Right	Tool Use: Students use their right-angle checker (from previous unit) to	Right-angle checkers, pictures containing	Pupils should be given problems that help them to identify a	Mathematics Primary Learner's Book P3 (Ed.) p.236	

		properties (contains one right angle).	Angle, Hypotenuse	find triangles that have a right angle. Hunter: Students find right-angled triangles in composite shapes or pictures. Drawing: Practice drawing a right-angled triangle.	triangles, paper	right-angled triangle based on its properties (contains one right angle).		
	Lesson 7: Scalene Triangle (1 Period)	Identify a scalene triangle based on its properties (no sides equal).	Scalene Triangle, No Equal Sides, All sides different	Demo: Use three straws all of different lengths to build a scalene triangle. Discovery: Students measure the sides of drawn scalene triangles to confirm all sides are different. Review: Play a game: "Which triangle am I?" based on properties of all four types.	Straws/card strips (all different lengths), rulers, triangle flashcards	Pupil should be given problems involving identification of a scalene triangle based on its properties (no sides equal).	Mathematics Primary Learner's Book P3 (Ed.) p.236-237	

	Lesson 8: Perimeter of a Triangle (1 Period)	Calculate the perimeter of various types of triangles.	Perimeter, Add, Sides, Sum	Review: The perimeter of any shape is the sum of all its side lengths. Guided Practice: For a triangle, $P = \text{side1} + \text{side2} + \text{side3}$. Practice with different triangles. Practice: Worksheet calculating the perimeter of triangles with given side lengths.	Rulers, worksheets with triangles (all types)	Pupils should be given exercises to calculate the perimeter of various types of triangles.	Mathematics Primary Learner's Book P3 (Ed.) p.237-238	
	Lesson 9: Characteristics of a Circle (1 Period)	Identify and describe the properties of a circle. Draw a circle using a compass.	Circle, Round, Curve, No sides, Centre, Radius, Compass	Shape Hunt: Find circular objects in the classroom (e.g., clock, plate, wheel). Properties: Discuss that a circle is round, has a center point, and is a continuous curve with no sides.	Circular objects, compasses, paper, and string for large circles	Pupil should be given problems of identify and describe the properties of a circle, and draw a circle using a compass.	Mathematics Primary Learner's Book P3 (Ed.) p.238-240	

				Drawing: Introduce a compass. Let students experiment with drawing circles of different sizes.				
	Unit Assessment (1 Period)	- Assess the ability to identify shapes, describe properties, and calculate perimeter.	Assessment, Identify, Describe, Calculate, Perimeter	Written Test: Short test with: - Naming shapes (square, rectangle, triangle types, circle). - Stating one property of a given shape. - Calculating the perimeter of a square, rectangle, and triangle.	Test paper, pencil	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.241	

UNIT 12: Grids

Periods: 5

Key unit competence: Pupils will be able to draw grids, plot points or geometric figures on the grid according to its posts and crossing bars.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week7: 25-29/5/26	Lesson 1: Introduction of the unit (1 Period)	Understand that a grid is a pattern of horizontal and vertical lines that cross each other. Identify examples of grids in everyday life.	Grid, Pattern, Horizontal, Vertical, Cross, Map, Graph	Discovery: Look at window panes, wire mesh, or graph paper. Ask students what they notice about the pattern (crisscrossing lines). Discussion: "Where else do we see grids?" (e.g., maps, board games like Battleship, spreadsheets). Definition: Introduce the term "grid" as a network of lines that cross to form squares.	Graph paper, pictures of maps/board games, a window pane	Pupil should participate in discussion and identification of grid patterns.	Mathematics Primary Learner's Book P3 (Ed.) p.242	
	Lesson 2:	Identify the main	Post (Point/Vertex)	Demo: Draw a simple 2x2 grid	Whiteboard, pegboards/geob	Pupil should be given	Mathematics Primary	

	Characteristic s of a grid: Posts and crossing bars (1Period)	parts of a simple grid: the posts (points) and the crossing bars (lines).	, Crossing Bar (Line), Intersection, Horizontal Line, Vertical Line	on the board. Label the points where lines meet as "posts" and the lines between them as "crossing bars". Hands-on: Using pegboards or geoboards, students create small grids and identify the posts and bars. Worksheet: On a drawn grid, students circle the posts and color the crossing bars.	boards & bands, worksheets with grids	exercises to identify the main parts of a simple grid: the posts (points) and the crossing bars (lines).	Learner's Book P3 (Ed.) p.242- 243	
	Lesson 3: Locating a point on a grid (1 Period)	Use simple coordinate s (like A1, B3) to locate a specific post (point) on a small grid.	Locate, Point, Post, Coordinate, Row, Column	Labeling: Show a grid with rows labeled with numbers (1, 2, 3) and columns labeled with letters (A, B, C). Treasure Hunt: Call out a coordinate (e.g.,	Grids on paper, counters/ markers, coordinate cards	Pupil should be given problems of using simple coordinates (like A1, B3) to locate a specific post (point)	Mathematic s Primary Learner's Book P3 (Ed.) p.243- 244	

				"B2"). Students place a counter or mark an 'X' on that specific post. Game: In pairs, students take turns calling coordinates for their partner to find.		on a small grid.		
	Lesson 4: Drawing shapes in a grid (1 Period)	Draw simple shapes (square, rectangle, triangle) by connecting posts on a grid.	Draw, Connect, Posts, Square, Rectangle, Triangle	Demo: On a large grid, demonstrate how to draw a square by connecting four posts that are the same distance apart. Guided Practice: Give instructions: "Draw a rectangle from post A1 to A3 to C3 to C1 and back to A1." Create: Students draw their own simple shape on grid paper and	Large grid board, individual grid paper, rulers, pencils	Pupil should be given activities to draw simple shapes (square, rectangle, triangle) by connecting posts on a grid.	Mathematics Primary Learner's Book P3 (Ed.) p.244-248	

				describe it to a partner.				
	Unit Assessment (1 Period)	Assess the ability to identify grid parts, locate points, and draw shapes on a grid.	Assessment, Identify, Locate, Draw	Practical & Written: Short test with: - Labeling the parts of a grid (post, crossing bar). - Locating points given coordinates. - Drawing a specified shape on a grid.	Test paper, pencil, grid paper	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.248	

UNIT 13: Missing numbers in addition, subtraction, multiplication, and division.

Periods: 5

Key unit competence: Pupils will be able to find the missing number using the rules of counting.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 8: 1-5/1/2026	Lesson 1: Finding missing numbers in expressions with addition or subtraction (1 Period)	Find an unknown number in an addition or subtraction equation (e.g., $\square + 5 = 9$ or $12 - \square = 7$).	Missing Number, Equation, Addition, Subtraction, Inverse Operation	Number Bonds Review: Quick drill on number bonds to 10 and 20. Inverse Operation: Teach that subtraction is the inverse of addition (to find $\square + 5 = 9$, think $9 - 5 = \square$). Guided Practice: Solve equations together on whiteboards using the inverse operation strategy.	Whiteboard, markers, number bond flashcards, worksheets	Pupils should be given exercises of finding an unknown number in an addition or subtraction equation.	Mathematics Primary Learner's Book P3 (Ed.) p.249-251	

				Practice: Worksheet with missing number addition and subtraction problems.				
	Lesson 2: Finding missing numbers in expressions with multiplication or division (1 Period)	Find an unknown number in a multiplication or division equation (e.g., $3 \times \square = 12$ or $\square \div 4 = 5$).	Missing Number, Multiplication, Division, Inverse Operation, Groups, Shares	Array Review: Use arrays to visualize multiplication (e.g., 3 rows of 4 makes 12). Inverse Operation: Teach that division is the inverse of multiplication (to find $3 \times \square = 12$, think $12 \div 3 = \square$). Guided Practice: Solve equations together on whiteboards. Practice: Worksheet with missing number multiplication and division problems.	Counters for arrays, whiteboards, markers, worksheets	Pupil should be given problem involving finding an unknown number in a multiplication or division equation	Mathematics Primary Learner's Book P3 (Ed.) p.251-253	
	Lesson 3: Finding the common	- Identify the rule (common	Pattern, Sequence, Increasing,	Pattern Discovery: Show a simple pattern (2, 4, 6, 8, ?).	Number lines, pattern	Pupil should be given problems of	Mathematics Primary Learner's	

	difference in an increasing number pattern (1 Period)	difference) in a growing number pattern. - Extend an increasing pattern.	Ascending, Common Difference, Rule, Add	Ask "What is the rule?" (Add 2 each time). Number Line: Use a number line to jump forward to show the pattern growing. Extend: Given the first few numbers and the rule, students extend the pattern. Find Missing: Find missing numbers within an increasing pattern.	blocks, worksheets with number patterns.	identifying the rule (common difference) in a growing number pattern, and extend an increasing pattern.	Book P3 (Ed.) p.257-258	
	Lesson 4: Finding the common difference in a decreasing number pattern (1 Period)	- Identify the rule (common difference) in a shrinking number pattern.	Pattern, Sequence, Decreasing, Descending, Common Difference, Rule, Subtract	Pattern Discovery: Show a simple pattern (20, 17, 14, 11, ?). Ask "What is the rule?" (Subtract 3 each time). Number Line: Use a number line to jump	Number lines, worksheets with number patterns	Pupil should be given exercises of identify the rule (common difference) in a shrinking number	Mathematics Primary Learner's Book P3 (Ed.) p.258-260	

		-Extend a decreasing pattern.		backward to show the pattern shrinking. Extend: Given the first few numbers and the rule, students extend the pattern. Find Missing: Find missing numbers within a decreasing pattern.		pattern, and extend a decreasing pattern.		
	End Unit Assessment (1 Period)	Assess the ability to find missing numbers in equations and number patterns.	Assessment, Missing Number, Equation, Pattern, Rule	Written Test: Short test with: - Missing number in addition/subtraction equations. - Missing number in multiplication/division equations. - Identifying the rule and extending an increasing pattern. - Identifying the rule and extending a decreasing pattern.	Test paper, pencil	Summative assessment score based on a marking scheme.	Mathematics Primary Learner's Book P3 (Ed.) p.261	

UNIT 14: Pictographs

Periods: 5

Key unit competence: Pupils will be able to describe the information read on a pictograph.

Dates/weeks	Lesson title/periods	Learning objectives	Content summary	Teaching and learning activities and approaches	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 9: 8-12/6/25	Lesson 1: Introduction of the unit (1 period)	Define a pictograph. Identify a pictograph among other types of graphs.	Pictograph, Symbol, Represent, Data, Key	Teacher: Shows different examples of pictographs (e.g., favorite fruits, sports). Explains that a symbol represents a number of objects. Introduces the concept of a "key". Pupils: Observe and discuss the examples. Point out the symbols and what they represent.	Real-life pictographs, Chart paper, Markers	Pupil should be given oral questions involving what is a pictograph and identify a pictograph among other types of graphs.	Mathematics Primary learner's Book P3, p. 262	

	Lesson 2: Number of objects on a pictograph (1 Period)	Count the number of objects represented on a given pictograph. Find the total number of a specific item.	Count, Total, Tally	Teacher: Guides pupils to count symbols one by one. Models how to use multiplication if one symbol represents more than one object. Pupils: Work in pairs to count and find totals for different items on the same pictograph.	Prepared pictograph charts, Counters	Pupil should be given exercises of counting the number of objects represented on a given pictograph, and finding the total number of a specific item.	Mathematics Primary learner's Book P3, p. 262-264	
	Lesson 3: Finding the number of objects on a pictograph (1 Period)	Compare the number of objects between different items. Use "more than" and "less than" to describe data.	More than, Less than, Most, Least, Compare	Teacher: Poses comparison questions (e.g., "Which fruit is most liked? How many more liked apples than bananas?"). Guides pupils to subtract to find the difference. Pupils: Work in small groups to write simple	Pictograph charts from Lesson 2, Number cards	Pupil should be given the questions of compare the number of objects between different items and use "more than" and "less than" to describe data	Mathematics Primary learner's Book P3, p. 264-265	

				sentences describing the comparisons.				
	Lesson 4: Representing the number of objects on a pictograph (1 Period)	Create a simple class pictograph using collected data. Draw symbols to represent data accurately.	Title, Labels, Draw, Survey	Teacher: Leads the class to choose a simple survey topic (e.g., favourite colour). Collects data with a tally chart. Guides pupils to draw the pictograph. Pupils: Participate in the survey. Take turns drawing or sticking symbols onto the class pictograph.	Stickers or cut-out symbols, Large chart paper, Markers	Pupil should be given problems of creating a simple class pictograph using collected data, and draw symbols to represent data accurately.	Mathematics Primary learner's Book P3, p. 265	

	Unit assessment (1 Period)	Demonstrate the ability to read, interpret, and describe information from an unfamiliar pictograph.	(All keywords from the unit)	Teacher: Distributes an assessment worksheet with a new pictograph and questions. Pupils: Work individually to answer questions (e.g., finding totals, comparing items).	Assessment worksheets, Pencils	Summative written assessment.	Mathematics Primary learner's Book P3, p. 211-214	
WEEKS 10 and 11: EXAMS OF THE THIRD TERM END OF 2025-2026 SCHOOL YEAR
