

SCHEME OF WORK

Teachers 'Name:
School Name:
Class: P5
Subject: Mathematics

Academic year: 2025-2026
Terms: One
No of weeks per term:15
Number of periods per week:9

UNIT 1: Reading, writing, comparing and calculating whole numbers up to 1,000,000

Number of periods: 32

Key unit competence: Pupils will be able to read, write, compare and make calculations on whole numbers up to 1 000 000.

Dates/weeks	Lesson title/periods	Learning objectives	Content Summary	Teaching and learning activities	Teaching and learning aids	Assessment	References	Weekly observation/Remarks
Week 1: 8-13 Sept 2025	Lesson 1: Introduction on the content of the unit (1 period)	To arouse the curiosity of students on the content of unit 1	Place value Forming Reading Writing Comparing Addition Subtraction Multiplication	Teacher will introduce the unit. Pupils will define key words; Pupils will ask question.	Manila Flash cards Chalkboard illustrations	Pupils should be given Oral questions about the whole numbers up to 1000,000	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages1 to 2)	
	Lesson 2: Place Values of whole	Identify the place values	Place value Digits Numbers	Group learners into small groups	Manila Flash cards	Pupils should be given oral and written	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

	Numbers up to 6 digits (2 period)	in written numerals.		and assign them to identify the Hundred thousand Ask groups to work on the activity 1.2.	Chalkboard illustrations Pens Pencils Abacus Different counters	questions about writing the place value of each digit, Matching digits to their place value	version edited in 2025(Pages4 to 5)	
	Lesson 3: Reading and writing numbers in words up to 1,000,000 (1 period)	Form a number on the abacus, write it in figure and read the number. Read correctly the number written in figure	Reading Writing Words	Invite learners to work in pairs. on the activity 1.4; Invite the groups to present their findings	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils will work on activity 1.2 and Application Activity 1.2	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages7to 8)	
	Lesson 4: Forming, reading and writing numbers in figures and in	Write the formed number	Reading Writing Figures	Form groups, Give them 6 number cards	Manila Flash cards Chalkboard illustrations Pens Pencils	Learners should be given written questions about forming biggest and	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages5 to 7)	

	words up to 1,000,000 (1 period)			Ask each team to form numbers. Write and read them		smallest numbers and reading them		
	Lesson 5: Comparing Numbers using $<$, $>$ or $=$ (1 period)	Compare numbers of any size using place values.	Comparing Numbers	Form groups and ask them to work on the activity 1.5; Move to groups to guide them Invite groups to present their findings.	Manila Flash cards Chalkboard illustrations Pens Pencils	Pupils should be given written activities about Comparing numbers (ascending and descending order) up to 1000000.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages9 to 10)	
	Lesson 6: Arranging numbers in ascending or descending order (1 period)	Arrange numbers from the smallest to Biggest and vice versa	Ascending Descending	Provide written activities on arranging numbers up to 1,000,000 - Group activities to arrange	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus	Pupils should be given written activities about Arranging numbers (ascending and	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages9 to 10)	

				numbers using counters - Class discussions on strategies for ordering numbers	Different counters	descending order) up to 1000000.		
	Lesson 7: Using a local abacus to add whole numbers of 6 digits (1 period)	Carry out addition of 3 or more whole numbers.	Abacus Whole numbers Digits	Provide the abacus to pupils assign them to work on the activity 1.6. Move to each group and guide them on how to add numbers using the abacus.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Through groups, pupils should be given written activities about addition of whole numbers using abacus	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages12 to 13)	
	Lesson 8: Remedial session	To reduce learning gaps and enhance	Place value Forming Reading Writing	Form groups and assign them Remedial	Manila Flash cards Chalkboard illustrations	Pupils should be:	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

	(1 period)	child's study habit	Comparing Addition Subtraction Multiplication	Activity 1.6.1, Consolidation Activity1.6.2, Extension Activity1.6.4	Pens Pencils Abacus Different counters	Given written quiz on the unit Asked to solve sample problems Invited to peer-teaching Given quick oral reading questions	version edited in 2025	
Week 2: 15- 19Sept2025	Lesson 9: Addition of 3 or more whole numbers of 6 digits without carrying (1 period)	Carry out addition of 3 or more whole numbers.	Addition Digits Numbers	Provide the abacus to pupils Assign them to work on the activity 1.7. Facilitate and guide groups on how to add whole numbers using abacus and without using the abacus.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about Addition of 3 or more whole numbers of 6 digits without carrying in peer.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages12 to 14)	

				verify if the answer is the same				
	Lesson 10: Addition of 3 or more whole numbers of 6 digits with carrying (1 period)	Add numbers with carrying,	Vertical addition Digits Numbers Carrying Place value Sum	Form groups of learners. Assign them to draw a table of place values, Provide numbers to the groups, from activity 1.8. Mark their book	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about Addition of 3 or more whole numbers of 6 digits with carrying in Groups	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages13 to 14)	
	Lesson 11: Solve real life problems involving addition of numbers (1 period)	Apply addition numbers up to 1,000,000 in solving real life word problems	Sum Total Altogether	Pupils work in groups the activity 1.19 to Explore the Solve real life problems involving addition of numbers. They will	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about Addition numbers up to 1,000,000 through groups	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages23 to 24)	

				also work on application activity 1.19 for practice or assessment.				
	Lesson 12: Subtraction of 2 numbers of 6 digits without borrowing (1 period)	Carry out subtraction of 2 whole numbers.	Subtract different	Group pupils. and assign them to work on the activity 1.9. Supervise the groups and provide some probing questions.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about subtract of 2 whole numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages14to 15)	
	Lesson 13: Subtraction of 2 numbers of 6 digits with borrowing (1 period)	Carry out subtraction of 2 whole numbers.	Subtract different	Group learners into small groups. Invite groups to work on the activity 1.10. Guide the groups	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about subtract of 2 whole numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages15to 16)	

	Lesson 14: Solve real life problems involving subtraction (1 period)	Apply subtraction, numbers up to 1,000,000 in solving real life word problems.	Subtract different	Pupils work in groups the activity 1.19 to Explore the Solve real life problems involving subtraction. They will also work on application activity 1.19 for practice or assessment.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about subtraction numbers through groups	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages22)	
	Lesson 15: Multiplying whole numbers by a 3 digits number (1 period)	Multiply a 3-digit number by a 3-digit number.	Multiply times product	Help learners to form groups. Pupils will do activity 1.16 Move to each group to provide guidance where necessary.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about multiplication of a 3-digit number by a 3-digit numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages20)	

	Lesson 16: Remedial session: (1 period)	To reduce learning gaps and enhance child's study habit	Sum Addition Subtract Divide Ratio	Form groups and assign them Remedial Activity 1.6.1, Consolidation Activity 1.6.2, Extension Activity 1.6.4.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be; Given written quiz on the unit. Asked to solve sample problems. Invited to peer-teaching Given quick oral reading questions.		
Week3: 22- 26Sept2025	Lesson 17: Product of a 3-digit number by 5 and quick multiplication by 5 (2 period)	Multiply 3-digit numbers by 5.	Multiply by 10 Divide by 2	Organize groups and assign them to work on activity 1.11. Let groups present answers Harmonize findings	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about multiplication of 3-digit numbers by 5 in peers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages 16 to 17)	
	Lesson 18: Product of a 3-digit	Multiply a 3-digit number	Multiply by 10	Organize groups and assign them	Manila Flash cards	Pupils should be given written	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

	number by 9 and quick multiplication by 9 (1 period)	by 9 in a quick way.	Subtract the original number from the result	to work on activity 1.12. Let groups present answers. Harmonize findings	Chalkboard illustrations Pens Pencils Abacus Different counters	activities about multiplication 3 digit numbers by 9 in peers	version edited in 2025(Pages16 to 17)	
	Lesson 19: Product of a 3-digit number by 11 and quick multiplication by 11 (1 period)	Multiply a 3-digit number by 11 in a quick way.	Multiply by 10 Add the original number to the Result	Organize groups and assign them to work on activity 1.12. Let groups present answers. Harmonize findings	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about multiplication of 3 digit numbers by 11 in groups	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages16 to 17)	
	Lesson 20: Product of a 3-digit number by 19 and quick	Multiply a 3-digit number by 19 in a quick way.	Multiply by 20 Subtract the original number from the Result	Form groups Guide groups to work on the activity 1.14.	Manila Flash cards Chalkboard illustrations Pens Pencils	Pupils should be given written activities about multiplication	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages17 to 18)	

	multiplication by 19 (1 period)				Abacus Different counters	of a 3-digit numbers by a 19.		
	Lesson 21: Product of a 3-digit number by 25 and quick multiplication by 25 (1 period)	Multiply a 3-digit number by 25 in a quick way.	Multiply by 100 Divide by 4	Form groups Guide groups to work on the activity 1.13.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about multiplication of a 3-digit numbers by a 25	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages 18)	
	Lesson 22: Product of a 3-digit number by 49 and quick multiplication by 49 (1 period)	Multiply a 3-digit number by 49 in a quick way.	Multiply by 100 Divide by 2 Subtract the original number from the Result	Form groups Guide groups to work on the activity 1.13.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about multiplication of a 3-digit numbers by a 49	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages 17 to 18)	
	Lesson 23: Product of a 3-digit number by 99 and quick multiplication by 99	Multiply 3-digit number by 99. In a quick way	Multiply by 100 Subtract the original number from the Result	Form groups Guide groups to work on the activity 1.15.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus	Pupils should be given written activities about multiplication of a 3 digit	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages 18)	

	(1 period)				Different counters	numbers by a 99		
	Lesson 24: Remedial activities (1 period)	To provide targeted support to pupils struggling with adding and subtracting integers.	Review, Practice, Support, Clarify	Teacher works with a small group of pupils who need extra help. Re-teach key concepts using counters and number lines. Provide simpler practice problems to build confidence. The rest of the class engages in reinforcement games (e.g., integer card games, online math games on tablets) or	Two-colour counters, Number lines, Simplified worksheets, Tablets/cards for games	Observation of progress in the small group. Completion of simplified tasks.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025	

				challenge problems.				
Week4: 29Sept- 3Oct2025	Lesson 25: Solve real life problems involving multiplication (1 period)	Apply multiplication of numbers up to 1,000,000 in solving real life word problems.	Product Times	Group learners Invite them to carry out the activity 1.19 in the Learner's Book	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given a variety activities about multiplication of numbers up to 1,000,000	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages22)	
	Lesson 26: Division without a remainder of a 3 digits number by a 2-digit number (2 periods)	Divide a 3-digit number by a 2-digit number	Divide Ratio quotient	Guide groups to work on the activity 1.17.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about division of 3-digit numbers by 2-digit numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages20)	
	Lesson 27: Division by a 2-digit number with a Remainder (1 period)	Divide a number by a 2-digit number and identify the remainder.	Divide Ratio quotient	Organize learners to work in small groups and refer to Activity 1.18	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus	Pupils should be given written activities about division of a number by a	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages21)	

				Invite learners to discuss the group's findings.	Different counters	2-digit number and identify the remainder		
	Lesson 28: Solve real life problems involving addition, subtraction, multiplication or division of whole numbers (1 period)	Apply addition, subtraction, multiplication and division of numbers up to 1,000,000 in solving real life word problems.	Sum Addition Subtract Divide Ratio	Group learners Invite them to carry out the activity 1.19 in the Learner's Book. Guide them as they carry out the activity.	Manila Flash cards Chalkboard illustrations Pens Pencils Abacus Different counters	Pupils should be given written activities about addition, subtraction and division up to 1000000	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages22)	
	Lesson 29: Remedial activities (1 period)	To provide targeted support to pupils struggling with adding and	Review, Practice, Support, Clarify	Teacher works with a small group of pupils who need extra help. Re-teach key	Two-colour counters, Number lines, Simplified worksheets, Tablets/cards for games	Observation of progress in the small group. Completion of simplified tasks.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025	

		subtracting integers.		concepts using counters and number lines. Provide simpler practice problems to build confidence. The rest of the class engages in reinforcement games (e.g., integer card games, online math games on tablets) or challenge problems.				
	Lesson 30: End unit assessment (1 period)	To assess pupils' understanding and mastery of the unit on integers.	Assessment, Test, Evaluate	Teacher explains the format of the test and expectation. Pupils complete a	Unit Assessment Test Paper	Formal summative assessment through test score. Analysis of results to identify areas	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025(Pages23)	

				written test covering all topics: identification, addition & subtraction (with rules), additive inverses, and word problems.		for future review.		
--	--	--	--	--	--	--------------------	--	--

UNIT 2: Addition and subtraction of integers

Number of period: 8

Key unit competence: Pupils will be able to solve problems related to addition and subtraction of negative and positive integers.

Weeks/Dates	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities / Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observation/Remarks
Week 5: 6-10 Oct 2025	Lesson 1: Introduction on the content of the unit (1 period)	pupils should be able to: 1. Identify what an integer is. 2. Recognise positive and negative	Integer, Positive numbers, Negative numbers, Whole numbers,	Class discussion on the importance of integers.	Thermometer diagram, Pictures of lifts/ elevators, Depth chart, Whiteboard/Blackboard	Pupils should be given Oral questions during discussion. Observe	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (2025 Ed.) pg. 24-25	

		integers in real-life contexts.	Zero, Temperature, Sea level			group brainstorming.		
	Lesson 2: Addition of integers: Using counters and a number line (1 period)	pupils should be able to add two integers using physical representations (counters/number line).	Number line, Counters, Positive, Negative, Add, Sum, Direction	Quick recap of positive and negative numbers. Pupils work in groups the activity 2.1 to Explore the Addition of integers using a number line. They will also work on application activity 2.1 for practice or assessment.	Large classroom number line, Two-colour counters (red/blue), Student number lines, Whiteboard	Pupils should be given Circulate and observe pupils using counters and number lines correctly. Check answers from pair work.	MATHEMATICS PRIMARY5 PUPIL'S BOOK (2025 Ed.) pg. 25-26	
	Lesson 3:	pupils should be able to add integers	Rules, Same signs, Different	Solve a problem from	Whiteboard/Blackboard, Worksheet with	Pupils should be given	MATHEMATICS PRIMARY5 PUPIL'S	

	Addition of integers by calculations (1 period)	without aids by applying the rules of addition.	signs, Subtract, Absolute value	previous lesson using counters, then ask if we can find a faster way. Pupils work in groups the activity 2.2 to Explore the Addition of integers by calculation. They will also work on application activity 2.2 for practice or assessment.	practice problems, Flashcards	Marking of independent worksheet. Exit ticket: solve 2 problems on a slip of paper	BOOK (2025 Ed.) pg. 27	
	Lesson 4: Subtraction of integers: using counters and a number line	pupils should be able to subtract integers using counters and a number line.	Subtract, Take away, Number line, Counters, Difference	Review addition rules. Pupils work in groups the activity	Two-colour counters, Student number lines, Subtraction worksheet (with aids)	Pupils should be given Observation of group work. Checking	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (2025 Ed.) pg. 27-28	

	(1 period)			2.3 to Explore the subtraction of integers using a number line. They will also work on application activity 2.3 for practice or assessment		worksheet answers for understanding of the visual concept.		
	Lesson 5: Subtraction of integers: by calculations (1 period)	By the end of the lesson, pupils should be able to subtract integers fluently by applying the rule: <i>"Add the opposite."</i>	Rule: "Add the opposite", Rewrite, Transform	Solve a subtraction problem using counters from previous lesson. Pupils work in groups the activity 2.4 to Explore the subtraction of integers	Whiteboard/Blackboard, Practice problem cards	Pupils should be given to Review the answers from the pair quiz Short timed quiz of 5 problems.	MATHEMATICS PRIMARY5 PUPIL'S BOOK (2025 Ed.) pg. 29-30	

				by calculation. They will also work on application activity 2.4 for practice or assessment.				
	Lesson 6: Additive inverses (opposite) of numbers (1 period)	pupils should be able to find the additive inverse of any integer and understand that their sum is zero.	Additive Inverse, Opposite, Zero pair, Sum, Zero	Pose the question: "What number can you add to 5 to get zero?" Pupils work in groups the activity 2.5 to Explore the additive inverse of a numbers. They will also work on application activity 2.5	Number cards (positive and negative integers), Whiteboard	Pupils should be asked to Participation in the "find your opposite" game. Accuracy in practice exercise.	MATHEMATICS PRIMARY5 PUPIL'S BOOK (2025 Ed.) pg. 30-31	

				for practice or assessment.				
	Lesson 7: Solve problems involving addition and subtraction of integers (1 period)	pupils should be able to apply knowledge of integers to solve simple word problems.	Word problems, Real-life, Apply, Solve, Equation	Review rules for adding and subtracting integers. Pupils work in groups the activity 2.6 to Explore the solve problems involving addition and subtraction of integers. They will also work on application activity 2.6 for practice or assessment.	Whiteboard/Blackboard, Worksheet with word problems	Pupils should be assessed on their ability to choose the correct operation when marking word problem worksheets.	MATHEMATICS PRIMARY5 PUPIL'S BOOK (2025 Ed.) pg. 31-32	

	Lesson 8: Remedial activities (1 period)	To provide targeted support to pupils struggling with adding and subtracting integers.	Review, Practice, Support, Clarify	Teacher works with a small group of pupils who need extra help. Re-teach key concepts using counters and number lines. Provide simpler practice problems to build confidence. The rest of the class engages in reinforcement games (e.g., integer card games, online math	Two-colour counters, Number lines, Simplified worksheets, Tablets/cards for games	Pupils should be observed for progress in the small group. They should also complete simplified tasks.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK version edited in 2025	
--	--	---	---	--	--	---	--	--

				games on tablets) or challenge problems.				
	Lesson 9: End unit assessment (1 period)	To assess pupils' understanding and mastery of the unit on integers.	Assessment , Test, Evaluate	Teacher explains the format of the test and expectation. Pupils complete a written test covering all topics: identification, addition & subtraction (with rules), additive inverses, and word problems.	Unit Assessment Test Paper	Formal summative assessment through test score. Analysis of results to identify areas for future review.	MATHEMATICS PRIMARY5 PUPIL'S BOOK (2025 Ed.) pg. 33	

UNIT3: Prime factorization and divisibility tests

Number of period: 16

Key unit competence: Pupils will be able to prime factorize, exploit the rule of divisibility tests for numbers less than 10, find the Lowest Common Multiple (LCM) and the Greatest Common Factor (GCF) of whole numbers

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observation/Remarks
Week 6: 13-17 Oct 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the objectives of the unit on factors and divisibility.	Factors, Divisibility, Prime Factorization	Class discussion on the importance of factors.	Pupil's Book, whiteboard	Pupils should be to participation and feedback	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 35-36)	
	Lesson 2: Prime factorization of numbers and its uniqueness (1 period)	Understand prime factorization and its uniqueness.	Prime factors, uniqueness, factorization	Identify prime factors of given numbers. Pupils work in groups the activity 3.1 to Explore the Prime factorization and its uniqueness. They will also work on	Pupil's Book, factor trees	Pupils should complete a worksheet on prime factorization .	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 36)	

				application activity 3.1 for practice or assessment.				
	Lesson 3: Prime factorization of numbers using indices as short form for repeated factors (1 period)	Use indices to represent repeated factors.	Indices, prime factorization, repeated factors	Practice expressing numbers using prime factorization. Pupils work in groups the activity 3.2 to Explore the Prime factorization of numbers using indices. They will also work on application activity 3.2 for practice or assessment.	Pupil's Book, index cards	Pupils should be able to work exercises about factorization of numbers using indices	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 37-38)	
	Lesson 4: Calculation of the Lowest Common Multiple (LCM) (1 period)	Calculate the LCM of given numbers.	LCM, multiples	Pupils work in groups the activity 3.3 to Find the lowest Common Multiple. They will also work on application activity 3.3 for practice or assessment.	Pupil's Book, charts	Pupils should be able to perform finding LCM	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 38-40)	

	Lesson 5: Calculation of Greatest Common Factors (GCF) (1 period)	Calculate the GCF of given numbers.	GCF, common factors	Hands-on practice finding GCF using different methods. Pupils work in groups the activity 3.4 to Find the Greatest Common Factors. They will also work on application activity 3.4 for practice or assessment.	Pupil's Book, visuals	Pupils should be able to calculating GCF	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 40-41)	
	Lesson 6: Divisibility test for 2 (1 period)	Understand the divisibility rule for 2.	Divisibility, even numbers	Demonstration of the divisibility rule for 2. Pupils work in groups the activity 3.5 to Explore the Divisibility test for 2. They will also work on application activity 3.5 for practice or assessment.	Pupil's Book, examples	Through group work activity should be to identifying divisible numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 41-42)	
	Lesson 7: Divisibility test for 3	Understand the	Divisibility, sum of digits	Group work to apply the	Pupil's Book, worksheets	Through on Group perform	MATHEMATICS PRIMARY 5	

	(1 period)	divisibility rule for 3.		divisibility rule for 3. Pupils work in groups the activity 3.5 to Explore the Divisibility test for 3. They will also work on application activity 3.5 for practice or assessment.		divisibility rule for three.	PUPIL'S BOOK (Pages 42-43)	
	Lesson 8: Divisibility test for 4 (1 period)	Understand the divisibility rule for 4.	Divisibility, last two digits	Demonstration using examples of numbers. Pupils work in groups the activity 3.7 to Explore the Divisibility test for 4. They will also work on application activity 3.7 for practice or assessment.	Pupil's Book, number lines	Worksheet on divisibility tests	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 43-44)	
	Remedial activities	Reinforce concepts	Review, reinforcement	Review games and activities to reinforce learning.	Pupil's Book,	Pupils Informal assessments	MATHEMATICS PRIMARY 5	

	(1 period)	learned in the unit.			review materials	through games	PUPIL'S BOOK	
Week 7: 20-24 Oct 2025	Lesson 9: Divisibility test for 5 (1 period)	Understand the divisibility rule for 5.	Divisibility, last digit	Pupils work in groups they activity 3.8 to Explore the Divisibility test for 5. They will also work on application activity 3.8 for practice or assessment.	Pupil's Book, examples	Pupils should be to do activity on identifying divisible numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 44)	
	Lesson 10: Divisibility test for 6 (1 period)	Understand the divisibility rule for 6.	Divisibility, even numbers, divisible by 3	Pupils work in groups the activity 3.9 to Explore the Divisibility test for 6. They will also work on application activity 3.9 for practice or assessment.	Pupil's Book, visuals	Through on Group assessment on divisibility	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 45)	
	Lesson 11: Divisibility test for 8 (1 period)	Understand the divisibility rule for 8.	Divisibility, last three digits	Demonstration and practice identifying divisible numbers. Pupils work in groups the activity 3.10 to Explore the	Pupil's Book, number lines	Pupils should be able to answer about divisibility tests	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 45-46)	

				Divisibility test for 8. They will also work on application activity 3.10 for practice or assessment.				
	Lesson 12: Divisibility Test for 9 (2 periods)	Understand the divisibility rule for 9.	Divisibility, sum of digits	Work in pairs to solve problems using the divisibility rule for 9 on activity 3.11 and application activity 3.11 for practice or assessment.	Pupil's Book, worksheets	Pupils should be able to understand the divisibility rule for nine	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 46-47)	
	Lesson 13: Divisibility Test for 10 (1 period)	Understand the divisibility rule for 10.	Divisibility, last digit	Pupils work in groups the activity 3.12 to Explore the Divisibility test for 10. They will also work on application activity 3.12 for practice or assessment.	Pupil's Book, examples	Pupils should be able to identifying divisible numbers through in group activity	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 47-48)	
	Remedial activities (1 period)	Reinforce concepts learned throughout the unit.	Review, reinforcement	Review games and activities to reinforce learning.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

	End unit assessment (1 period)	Assess overall understanding of factors and divisibility.	Assessment, understanding	Administer end-of-unit test.	Pupil's Book, assessment sheets	Pupils should be able to do Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 48-49)	
--	--	---	---------------------------	------------------------------	---------------------------------	--	--	--

UNIT 4: Equivalent fractions and operations

number of periods:24

Key unit competence: Pupils will be able to add, subtract and find equivalent fractions and apply this knowledge to solve related problems.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 8: 27-31 Oct 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the objectives and relevance of the unit	Fractions, equivalent fractions	Class discussion on the importance of fractions.	Pupil's Book, whiteboard	Pupils should be encouraged to participate	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 50-51)	

		on fractions.				and give feedback.		
	Lesson 2: Exploring and comparing fractions using models (1 period)	Understand how to compare fractions using visual models.	Comparing fractions, models	Hands-on activities with fraction models. Pupils work in groups the activity 4.1 to Exploring and comparing fractions using models. They will also work on application activity 4.1 for practice or assessment.	Pupil's Book, fraction models	Pupils should be to Observation through on group activities to comparing fraction using models	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 51-52)	
	Lesson 3: Meaning of equivalent fractions (1 period)	Define and explain equivalent fractions.	Equivalent fractions, representation	Pupils work in groups the activity 4.2 to Explore the meaning of equivalent fractions. They will also work on application activity 4.2 for practice or assessment.	Pupil's Book, visual aids	Pupils should be to identifying equivalent fractions	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 53-54)	
	Lesson 4: Determination of equivalent fractions	Determine equivalent fractions using	Determination, fractions	Practice finding equivalent fractions through activity 4.3 in	Pupil's Book, worksheets	Pupils should be able to determine	MATHEMATICS PRIMARY 5 PUPIL'S	

	(2 periods)	models and calculation s.		groups and work on application activity 4.3 for assessment		equivalent fractions	BOOK (Pages 54-56)	
	Lesson 5: Shading equivalent fractions (1 period)	Visualize equivalent fractions through shading.	Shading, visualization	Hands-on activity to shade equivalent fractions. Pupils work in groups the activity 4.4 to Explore in shading equivalent fractions. They will also work on application activity 4.4 for practice or assessment.	Pupil's Book, colouring materials	Through on group, pupils should be able to completed shading activities	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 57-59)	
	Lesson 6: Addition of fractions with different denominators using models or circle set fractions (2 periods)	Add fractions with different denominators using models.	Addition, different denominators	Through groups Pupils will work activities 4.5 to Explore the addition of fraction with different denominators using modules. They will also work on application activity 4.5 for practice or assessment.	Pupil's Book, circle set fractions	Teacher asked the assessment on addition and pupils should be able to do work given by teacher and feedback	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 59-61)	

	Remedial activities (1 period)	Reinforce concepts learned throughout the unit.	Review, reinforcement	Review games and activities to reinforce learning.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
Week 9: 3-7 Nov 2025	Lesson 7: Addition of fractions when one denominator is a multiple of the other denominator (1 period)	Apply addition of fractions with multiples.	Multiple denominators, addition	Pupils work in groups the activity 4.6.1 to Explore the addition of fractions when denominator is a multiple. They will also work on application activity 4.6.1 for practice or assessment.	Pupil's Book, examples	Pupils should be able to perform the fraction about on addition problems	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 61-62)	
	Lesson 8: Addition of fractions when denominators are different (2 periods)	Add fractions with different denominators.	Different denominators, addition	Pupils will work in groups the activity 4.6.2 to Explore the addition of fractions with different denominators. They will also work on application activity	Pupil's Book, manipulatives	Pupils should be able to add fractions	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 63-65)	

				4.6.2 for practice or assessment.				
	Lesson 9: Addition of more than two fractions with different denominators (1 period)	Add multiple fractions with varying denominators.	Multiple fractions, addition	Pupils work in Groups the activity 4.6 to solve problems involving multiple fractions. They will also work on application activity 4.6 for practice or assessment	Pupil's Book, visuals	Pupils should be able to add fraction with different denominators	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 63-64)	
	Lesson 10: Solving word problems involving addition of fractions (2 periods)	Apply knowledge to solve word problems with fractions.	Problem-solving, word problems	Pupils work in groups the activity 4.11 to solve word problems involving addition of fraction. They will also work on application activity 4.11 for practice or assessment.	Pupil's Book, problem sets	Pupils should be able to solving word problems involving fraction with addition	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 73-74)	
	Lesson 11: Subtraction of fractions with different denominators using models	Subtract fractions using visual models.	Subtraction, different denominators	Pupils work in groups the activity 4.8 to Explore the subtraction of fractions with different denominators	Pupil's Book, circle set fractions	Pupils should be able to subtraction problems using visual models	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 67-68)	

	or circle set fractions (1 period)			using modules. They will also work on application activity 4.8 for practice or assessment.				
	Lesson 12: Subtraction of fractions with different denominators using equivalent fractions (1 period)	Use equivalent fractions for subtraction.	Equivalent fractions, subtraction	Pupils work in groups the activity 4.9 to Explore the subtraction of fractions with different denominators using equivalent fraction. They will also work on application activity 4.9 for practice or assessment.	Pupil's Book, visuals	Pupils should be able to subtraction with equivalents fraction	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 69-71)	
	Remedial activities (1 period)	Reinforce concepts learned throughout the unit.	Review, reinforcement	Review games and recap activities.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

Week 10: 10-14 Nov 2025	Lesson 13: Subtraction of fractions with different denominators using LCM (2 periods)	Use LCM to subtract fractions.	LCM, subtraction	Pupils work in groups the activity 4.10 to Explore the subtraction of fractions with different denominators using LCM. They will also work on application activity 4.10 for practice or assessment.	Pupil's Book, worksheets	Pupils should be able to subtraction using LCM	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 69-71)	
	Lesson 14: Subtraction of more than two fractions with different denominators (1 period)	Subtract multiple fractions with different denominators.	Multiple fractions, subtraction	Pupils work in groups the activity 4.10 to Explore the subtraction of fractions with different denominators using modules. They will also work on application activity 4.10 for practice or assessment.	Pupil's Book, visuals	Pupils should be able to subtraction of more than two fraction with different denominators	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 71-73)	
	Lesson 15: Subtraction of mixed numbers and	Subtract mixed numbers	Mixed numbers, subtraction	Pupils work in groups the activity 4.10 to Explore the subtraction of	Pupil's Book, manipulatives	Pupils should be able to mixed	MATHEMATICS PRIMARY 5 PUPIL'S	

	fractions with different denominators (2 periods)	and fractions.		mixed numbers and fractions with different denominators. They will also work on application activity 4.10 for practice or assessment.		numbers and fractions	BOOK (Pages 71-73)	
	Lesson 16: Solving word problems involving subtraction of fractions (2 periods)	Apply knowledge to solve word problems with subtraction.	Problem-solving, word problems	Pupils work in groups the activity 4.11 to solve word problems involving subtraction of fractions. They will also work on application activity 4.11 for practice or assessment.	Pupil's Book, problem sets	Pupils should be able to solving word problems about subtraction of fraction	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 74-75)	
	Remedial activities (1 period)	Reinforce concepts learned throughout the unit.	Review, reinforcement	Review games and recap activities.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (1 period)	Assess overall understanding	Assessment, understanding	Administer end-of-unit test.	Pupil's Book, assessment sheets	Pupils should be able to do	MATHEMATICS PRIMARY 5 PUPIL'S	

		ng of fractions.				Formal test evaluation	BOOK (Pages 75-76)	
--	--	------------------	--	--	--	------------------------	--------------------	--

UNIT 5: Multiplication and division of decimals
Number of Period:(8/16)

Key Unit Competence: Pupils will be able to multiply, divide and compare decimal numbers up to 3 decimal places and apply this knowledge to solve related problems.

Dates/W eeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approa ch	Teaching and Learning Aids	Assessment	References	Weekly Observ ations/R emarks
Week 11: 17-21 Nov 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the objectives and content of the unit on decimal fractions.	Decimal fractions, introduction	Class discussion on the relevance of decimal fractions.	Pupil's Book, whiteboard	Pupils should be able to participation and give feedback	MATHEMA TICS PRIMARY 5 PUPIL'S BOOK (Pages 77- 78)	
	Lesson 2: Illustration of the concept of decimal fractions through examples (1 period)	Understand decimal fractions through practical examples.	Decimal fractions, examples	Pupils work in groups the activity 5.1 to Explore the concept of decimal fraction. They will also work on application activity	Pupil's Book, visual aids	Pupils should be able to understand the decimal fraction	MATHEMA TICS PRIMARY 5 PUPIL'S BOOK (Pages 79- 81)	

				5.1 for practice or assessment.				
	Lesson 3: Place value of decimals (1 period)	Explain the place value system for decimal numbers.	Place value, decimals	Pupils will work activity 5.2 in groups to explore place value of decimals. They will also work on application activity 5.2 for practice or assessment.	Pupil's Book, place value charts	Pupils should be able to identifying place values	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 81-82)	
	Lesson 4: Comparing and ordering decimal numbers using number cards (1 period)	Compare and order decimal numbers effectively.	Comparing, ordering, decimals	Pupils will work activity 5.3 in pairs to explore Comparing and ordering decimal numbers. They will also work on application activity 5.3 for practice or assessment.	Pupil's Book, number cards	Pupils should be able to comparing and ordering numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 83-84)	
	Lesson 5: Conversion of fractions to decimals (2 periods)	Convert fractions into decimal form.	Conversion, fractions, decimals	Pupils will work activity 5.4 in groups to explore conversion of fraction to decimals. They will also work on application activity	Pupil's Book, visuals	Pupils should be able to converting fractions to decimals	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 85-87)	

				5.4 for practice or assessment.				
	Lesson 6: Conversion of decimals to fractions (2 periods)	Convert decimals into fraction form.	Conversion, decimals, fractions	Pupils will work activity 5.5 in pairs to explore conversion of decimals to fraction. They will also work on application activity 5.5 for practice or assessment.	Pupil's Book, manipulatives	Pupils should be able to converting decimals to fractions	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 87-88)	
	Remedial activities (1 period)	Reinforce concepts learned throughout the unit.	Review, reinforcement	Review games and recap activities.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
Week 12: 24-28 Nov 2025	Lesson 7: Multiplication of decimal numbers (1 period)	Understand how to multiply decimal numbers.	Multiplication, decimals	Demonstration of multiplying decimal numbers. Pupils work in groups the activity 5.6 to Explore multiplication of decimal numbers. They will also work on application activity	Pupil's Book, examples	Pupils should be able to understand how to multiplication of decimals	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 89)	

				5.6 for practice or assessment.				
	Lesson 8: Problems involving multiplication of decimals (1 period)	Apply multiplication skills to solve decimal problems.	Problem-solving, multiplication	Pupils work in groups the activity 5.9 to solve the problems involving multiplication. They will also work on application activity 5.9 for practice or assessment.	Pupil's Book, problem sets	Pupils should be able to solving multiplication on problems	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 92-93)	
	Lesson 9: Division of decimal numbers (1 period)	Understand how to divide decimal numbers.	Division, decimals	Pupils work in groups the activity 5.7 to Explore the division of decimal number. They will also work on application activity 5.7 for practice or assessment.	Pupil's Book, manipulatives	Pupils should be able to dividing decimal numbers	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 90-91)	
	Lesson 10: Problems involving division of decimals (1 period)	Apply division skills to solve decimal problems.	Problem-solving, division	Pupils will work activity 5.9 in groups to solve the problems involving division of decimals. They will also work on	Pupil's Book, visuals	Through group, learners discuss on division problems	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 92-93)	

				application activity 5.9 for practice or assessment.				
	Lesson 11: Mixed operations for multiplication and division (2 periods)	Perform mixed operations involving decimals.	Mixed operations, decimals	Pupils will work activity 5.8 in group to explore the mixed operations for multiplication and division. They will also work on application activity 5.8 for practice or assessment.	Pupil's Book, worksheets	Pupils should be able to perform mixed operations involving decimal	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 91-92)	
	Lesson 12: Problems involving multiplication and division of decimals (1 period)	Solve problems involving both operations.	Problem-solving, mixed operations	Pupils work in groups the activity 5.9 to solve problems involving multiplication and division. They will also work on application activity 5.9 for practice or assessment.	Pupil's Book, problem sets	Pupils should be able to solve problems involving both operations	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 92-93)	
	Remedial activities (1 period)	Reinforce concepts learned	Review, reinforcement	Review games and recap activities.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5	

		throughout the unit.					PUPIL'S BOOK	
	End unit assessment (1 period)	Assess overall understanding of decimals and operations.	Assessment, understanding	Administer end-of-unit test.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 93-94)	

UNIT 6: Application of direct proportions

Number of periods: (8/16)

Key Unit Competence: Pupils will be able to apply direct proportions in a practical context

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approach	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 13: 1-5 Nov 2025	Lesson 1: Introduction on the	Introduce the objectives and content	Proportion, direct proportion	Class discussion on the importance of	Pupil's Book, whiteboard	Pupils should be able to participation	MATHEMATICS PRIMARY 5 PUPIL'S	

	content of the unit (1 period)	of the unit on proportion.		proportion in mathematics.		and give feedback	BOOK (Pages 95-96)	
	Lesson 2: Concept of direct proportion (2 periods)	Understand the concept of direct proportion.	Direct proportion, relationship	Hands-on activities demonstrating direct proportion using examples.	Pupil's Book, visuals	Pupils should be able to understand the concept of direct proportion	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 96-97)	
	Lesson 3: Ratios and direct proportion (2 periods)	Relate ratios to the concept of direct proportion.	Ratios, direct proportion	Pupils work in groups the activity 6.1 to Explore the ratios and direct. They will also work on application activity 6.1 for practice or assessment.	Pupil's Book, ratio cards	Pupils should be able to identify the concept of direct proportion	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 98-99)	
	Lesson 4: Constant of proportionality and the application of direct proportion in real life (2 periods)	Explore the constant of proportionality and its applications.	Constant of proportionality, applications	Pupils work in groups the activity 6.3 to Explore the constant of proportionality and its application. They will also work on application activity 6.3 for practice or assessment.	Pupil's Book, manipulatives	Pupils should be able to understanding constant of proportionality	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 99-100)	

	Lesson 5: Describe the scale drawing (1 period)	Understand and create scale drawings.	Scale drawing, representation	Pupils work in groups the activity 6.4 to describe the scale drawing. They will also work on application activity 6.4 for practice or assessment.	Pupil's Book, drawing materials	Pupils should be able to understand and create scale drawings.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 101)	
	Remedial activities (1 period)	Reinforce concepts learned throughout the unit.	Review, reinforcement	Review games and recap activities.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

Teachers 'Name:
School Name:
Class: P5
Subject: Mathematics

Academic year: 2025-2026
Terms: Two
No of weeks per term:13
Number of periods per week:9

UNIT 6: Application of direct proportions

Number of periods: (8/16)

Key Unit Competence: Pupils will be able to apply direct proportions in a practical context.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 1: 5-9 Jan 2025	Lesson 6: Apply the direct proportion to scale drawing (2 periods)	Apply direct proportion concepts to create scale drawings.	Direct proportion, scale drawing	Pupils work in groups the activity 6.4 to apply the direct proportion to scale drawing. They will also work on application activity 6.4 for practice or assessment.	Pupil's Book, graph paper, rulers	Pupils should be able to Apply direct proportion concepts to create scale drawings.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 101)	

	Lesson 7: Problems involving ratios (2 periods)	Solve problems that involve calculating ratios.	Ratios, problem-solving	Pupils work in groups the activity 6.5 to Explore the problems involving ratios. They will also work on application activity 6.5 for practice or assessment.	Pupil's Book, ratio cards	Pupils should be able to solving ratio problems	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 102)	
	Lesson 8: Problems involving direct proportion (2 periods)	Solve problems related to direct proportion.	Direct proportion, application	Pupils work in groups the activity 6.6 to Explore the problems involving direct proportion. They will also work on application activity 6.6 for practice or assessment.	Pupil's Book, manipulatives	Pupils should be able to Solve problems related to direct proportion.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 103-104)	
	Remedial activities (1 period)	Reinforce understanding of direct proportion and ratios.	Review, reinforcement	Review games and recap activities focusing on key concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (2 periods)	Evaluate understanding of ratios and direct proportion.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 105)	

UNIT 7: Solving problems involving measurements of length, capacity and mass Number of periods: 8

Key unit competence: Pupils will be able to solve problems involving measurements of length, capacity, mass and calculating number of intervals.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 2: 12-16 Jan 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the objectives and content of the unit on measurement.	Measurement, length, capacity, mass	Class discussion on the importance of measurement in everyday life.	Pupil's Book, whiteboard	Pupils should be able to participate and give feedback	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 106-107)	
	Lesson 2: Revision on problems on length, capacity, and mass (2 periods)	Review and reinforce concepts of length, capacity, and mass.	Length, capacity, mass, problem-solving	Pupils will work activity 7.1 into groups to solve revision problems on length, capacity, and mass. They will also work on application activity 7.1 for practice or assessment	Pupil's Book, problem sets	Pupils should be able to solve length, capacity, and mass problems	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 107-109)	

	Lesson 3: Number of intervals (fixed distance) between objects on an open line (2 periods)	Understand how to determine the number of intervals on an open line.	Intervals, open line	Hands-on activities using string or tape to mark intervals on an open line. Pupils work in groups the activity 7.2 to Explore the number of intervals on open line. They will also work on application activity 7.2 for practice or assessment.	Pupil's Book, measuring tools	Pupils should be able to identifying intervals	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 109-111)	
	Lesson 4: Finding the number of intervals on a closed line (2 periods)	Calculate the number of intervals on a closed line.	Intervals, closed line	Pupils work in groups the activity 7.3 to Explore the calculation of intervals on a closed line. They will also work on application activity 7.3 for practice or assessment.	Pupil's Book, manipulatives	Pupils should be able to calculating intervals on closed lines	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 112-113)	
	Remedial activities (1 period)	Reinforce understanding of intervals and measurement concepts.	Review, reinforcement	Review games and recap activities focusing on key concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK	

	End unit assessment (1 period)	Evaluate understanding of measurement concepts covered in the unit.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 113-114)	
--	--------------------------------	---	---------------------------	---	---------------------------------	------------------------	--	--

UNIT 8: Solving problems involving time intervals

Number of periods: 16

Key unit competence: Pupils will be able to solve real life problems that involve finding time intervals and conversion of units.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 3: 19-23 Jan 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the objectives and content of the unit on time.	Time, units, conversion	Class discussion on the importance of understanding time.	Pupil's Book, whiteboard	Pupils should be able to participate and feedback	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 114-115)	
	Lesson 2: Converting	Convert hours to	Hours, minutes, conversion	Pupils work in groups the activity 8.1 to Explore the	Pupil's Book,	Pupils should be able to	MATHEMATICS PRIMARY 5	

	hours into minutes (2 periods)	minutes accurately.		converting hours into minutes. They will also work on application activity 8.1 for practice or assessment.	conversion charts	convert hour-to-minute accurately	PUPIL'S BOOK (Pages 115-116)	
	Lesson 3: Converting minutes into hours (2 periods)	Convert minutes to hours accurately.	Minutes, hours, conversion	Pupils work in groups the activity 8.2 to Explore the converting minutes into Hours. They will also work on application activity 8.2 for practice or assessment.	Pupil's Book, manipulatives	Pupils should be able to converting minute-to-hour through ingroup.	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 116-117)	
	Lesson 4: Converting hours into seconds (2 periods)	Convert hours to seconds accurately.	Hours, seconds, conversion	Pupils work in groups the activity 8.3 to Explore the converting hours into seconds. They will also work on application activity 8.3 for practice or assessment.	Pupil's Book, calculators	Pupils should be able to hour-to-second conversions	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 117-118)	
	Lesson 5: Changing days into hours (1 period)	Convert days to hours accurately.	Days, hours, conversion	Pupils work in groups the activity 8.4 to Explore the changing days into hours. They will also work on	Pupil's Book, visual aids	Pupils should be able to convert days to	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 118-119)	

				application activity 8.4 for practice or assessment.		hour accurately.		
	Remedial activities (1 period)	Reinforce understanding of time conversions.	Review, reinforcement	Review games focusing on time conversion concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
Week 4: 26-30 Jan 2025	Lesson 6: Changing hours into days (2 periods)	Convert hours back into days accurately.	Hours, days, conversion	Pupils work in groups the activity 8.5 to Explore the changing hours into days. They will also work on application activity 8.5 for practice or assessment.	Pupil's Book, manipulatives	Pupils should be able to Convert hours back into days accurately.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 119-120)	
	Lesson 7: Finding time intervals or time taken by an event: Using clock face, watch, and calendar (2 periods)	Calculate time intervals using various time-telling methods.	Time intervals, clock, calendar	Pupils work in groups the activity 8.6 to Explore the finding time intervals taken by an event. They will also work on application activity 8.6 for practice or assessment.	Pupil's Book, clocks, calendars	Pupils should be able to finding time intervals	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 120-121)	
	Lesson 8: Real-life problems that involve addition and	Solve real-life problems related to adding and	Addition, subtraction, time problems	Pupils work in groups the activity 8.7 to solve problems that involve addition and subtraction. They will	Pupil's Book, problem sets	Pupils should be able to Solve real-life	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 121-122)	

	subtraction of time (2 periods)	subtracting time.		also work on application activity 8.7 for practice or assessment.		problems related to adding and subtracting time		
	Remedial activities (1 period)	Reinforce understanding of time addition and subtraction.	Review, reinforcement	Review games focusing on time addition and subtraction concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (2 periods)	Evaluate understanding of time concepts covered in the unit.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 123)	

UNIT 9: Money and its financial applications (24 Periods).

Number of periods: 24

Key unit competence: Pupils will be able to explain money and its financial applications

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 5: 2-6 Feb 2025	Lesson 1: Introduction on the content of the unit (2 periods)	Introduce the objectives and content of the unit on currency.	Currency, coins, notes	Class discussion on the importance of currency in daily transactions.	Pupil's Book, whiteboard	Pupils should be able to participate and give feedback	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 124-125)	
	Lesson 2: Changing Rwandan currency: coins and notes (2 periods)	Understand the denominations and usage of Rwandan currency.	Rwandan francs, coins, notes	Pupils work in groups the activity 9.1 to Explore the changing Rwandan currency: coins and notes. They will also work on application activity 9.1 for practice or assessment.	Pupil's Book, real currency samples	Pupils should be able to Understand the denominations and usage of Rwandan currency.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 125-126)	

	Lesson 3: Finding Cost/Buying Price (C.P) (2 periods)	Calculate the cost/buying price of items.	Cost price, calculations	Guided practice on finding the cost of various items through examples. Pupils work in groups the activity 9.2.1 to Explore the finding cost/buying price. They will also work on application activity 9.2.1 for practice or assessment	Pupil's Book, price lists	Pupils should be able to calculating cost price of items	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 127)	
	Lesson 4: Finding Selling Price (S.P) (2 periods)	Calculate the selling price of items.	Selling price, calculations	Pupils work in groups the activity 9.2.2 to Explore the finding selling price. They will also work on application activity 9.2.2 for practice or assessment	Pupil's Book, price lists	Pupils should be able to the calculating selling price of items	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 128)	
	Remedial activities (1 period)	Reinforce understanding of cost and selling prices.	Review, reinforcement	Review games focusing on cost and selling price concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

Week 6: 9-13 Feb 2025	Lesson 5: Profit or loss (2 periods)	Understand the concepts of profit and loss.	Profit, loss, calculation	Pupils work in groups the activity 9.2.3 to Explore the profit or loss. They will also work on application activity 9.2.3 for practice or assessment	Pupil's Book, examples	Pupils should be able to understand and calculating profit and loss	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 128-129)	
	Lesson 6: Operation on Rwandan francs (2 periods)	Perform arithmetic operations with Rwandan francs.	Addition, subtraction, multiplication, division	Pupils work in groups the activity 9.2.3 to Explore the operation on Rwandan francs. They will also work on application activity 9.2.3 for practice or assessment	Pupil's Book, manipulatives	Pupils should be able to perform arithmetic operations with Rwandan francs	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 128-129)	
	Lesson 7: Practice the simple budgeting (2 periods)	Create and manage a simple budget.	Budgeting, income, expenses	Pupils work in groups the activity 9.3 to Explore the practice the simple budgeting. They will also work on application activity 9.3 for practice or assessment	Pupil's Book, budgeting templates	Pupils should be able to creating and managing budgets	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 129-130)	

	Lesson 8: Role plays the buying and selling (2 periods)	Simulate buying and selling situations to reinforce learning.	Buying, selling, transactions	Pupils work in groups the activity 9.4 to Explore the role play the buying and selling. They will also work on application activity 9.4 for practice or assessment	Pupil's Book, mock currency	Pupils should be able to understand Simulate buying and selling situations to reinforce learning.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 131-132)	
	Remedial activities (1 period)	Reinforce understanding of budgeting and transactions.	Review, reinforcement	Review games focusing on budgeting and transactional skills.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
Week 7: 16-20 Feb 2025	Lesson 9: Converting currencies (from foreign currencies to Rwandan francs) (2 periods)	Learn to convert foreign currencies to Rwandan francs.	Currency conversion, exchange rates	Pupils work in groups the activity 9.5 to Explore the Converting currencies (from foreign currencies to Rwandan francs) They will also work on application activity 9.5 for practice or assessment	Pupil's Book, exchange rate charts	Pupils should be able to convert foreign currencies to Rwandan francs.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 132-133)	
	Lesson 10: Converting	Reverse the conversion	Currency conversion,	Pupils work in groups the activity	Pupil's Book,	Assessment on	MATHEMATICS PRIMARY	

	currencies (from Rwandan francs to foreign currencies) (2 periods)	process for Rwandan francs.	exchange rates	9.5 to Explore the Converting currencies. They will also work on application activity 9.5 for practice or assessment	exchange rate charts	converting currencies	5 PUPIL'S BOOK (Pages 132-133)	
	Lesson 11: Problems involving the conversion of currencies (2 periods)	Solve real-world problems involving currency conversion.	Problem-solving, currency conversion	Pupils work in groups the activity 9.5 to Explore the Problems involving the conversion of currencies They will also work on application activity 9.5 for practice or assessment	Pupil's Book, problem sets	Pupils should be able to solve currency conversion problems	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 132-133)	
	Remedial activities (1 period)	Reinforce understanding of currency conversions.	Review, reinforcement	Review games focusing on currency conversion problems.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (2 periods)	Evaluate understanding of currency concepts covered in the unit.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 134-135)	

Unit title: UNIT 10: Sequences that include whole numbers, fractions and decimals

Number of periods: 16/24

Key unit competence: Pupils will be able to write sequences of whole numbers, fractions and decimals.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approach	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 8: 23-27 Feb 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the unit's objectives and content focused on sequences.	Sequences, whole numbers, ordering	Discuss the importance of sequences in mathematics and everyday life.	Pupil's Book, whiteboard	Pupils should be able to participate and discussion about sequences	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 136-137)	
	Lesson 2: Ordering whole numbers according to their size in increasing order (1 period)	Learn to order whole numbers from smallest to largest.	Increasing order, whole numbers	Pupils work in groups the activity 10.1 to Explore the ordering whole numbers according to their size in ascending order. They will also work on application activity 10.1 for practice or assessment	Pupil's Book, number cards	Pupils should be able to order numbers from smallest to largest.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 137-138)	

	Lesson 3: Ordering whole numbers according to their size in decreasing order (2 periods)	Learn to order whole numbers from largest to smallest.	Decreasing order, whole numbers	Pupils work in groups the activity 10.2 to Explore the Ordering whole numbers according to their size in decreasing order. They will also work on application activity 10.2 for practice or assessment	Pupil's Book, number cards	Pupils should be able to given ordering whole numbers	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 138-139)	
	Lesson 4: Introduction to simple sequences (2 periods)	Understand the concept of simple sequences and identify patterns.	Sequences, patterns	Pupils work in groups the activity 10.3 to Explore the introduction to simple sequences. They will also work on application activity 10.3 for practice or assessment	Pupil's Book, sequence charts	Pupils should be able to identifying and creating sequences	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 139-140)	
	Lesson 5: Simple sequences that include fractions (2 periods)	Create and analyze simple sequences that include fractions.	Fractions, sequences	Pupils work in groups the activity 10.4 to Explore the simple sequences that include fractions. They will also work on	Pupil's Book, fraction cards	Pupils should be able to create and analyze simple sequences	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 140-141)	

				application activity 10.4 for practice or assessment		involving fractions		
	Remedial activities (1 period)	Reinforce understanding of ordering and sequences.	Review, reinforcement	Review games focusing on ordering and sequences.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
Week 9: 2-6 Mar 2025	Lesson 6: Meaning of simple sequences that include decimals (2 periods)	Learn about simple sequences involving decimals.	Decimals, sequences	Pupils work in groups the activity 10.5 to Explore the Meaning of simple sequences that include decimals. They will also work on application activity 10.5 for practice or assessment	Pupil's Book, decimal charts	Pupils should be able to discuss simple sequences involving decimals.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 142)	
	Lesson 7: Finding the missing number in a simple sequence that includes decimals (2 periods)	Solve problems to find missing numbers in decimal sequences.	Missing number, problem-solving	Pupils work in groups the activity 10.5 to Explore the Finding the missing number in a simple sequence that includes decimals. They will also work on application activity 10.5 for	Pupil's Book, problem sets	Pupils should be able to solve and finding missing numbers in decimal sequences	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Page 142)	

				practice or assessment				
	Lesson 8: Meaning of sequence with constant difference (2 periods)	Understand sequences that have a constant difference.	Constant difference, sequences	Pupils work in groups the activity 10.6 to Explore the Meaning of sequence with constant difference. They will also work on application activity 10.6 for practice or assessment	Pupil's Book, sequence charts	Pupils should be able to identifying constant difference sequences	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Page 143)	
	Lesson 9: Finding the missing number in a sequence with constant difference (2 periods)	Solve missing number problems in constant difference sequences.	Problem-solving, constant difference	Pupils work in groups the activity 10.6 to Explore the Finding the missing number in a sequence with constant difference. They will also work on application activity 10.6 for practice or assessment	Pupil's Book, problem sets	Pupils should be able solving missing number problem in constant difference sequences	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Page 143)	
	Remedial activities (1 period)	Reinforce understanding of constant	Review, reinforcement	Review games focusing on constant difference concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK	

		difference sequences.						
Week 10: 9-13 Mar 2025	Lesson 10: Meaning of a sequence with constant ratio (2 periods)	Understand sequences that have a constant ratio.	Constant ratio, sequences	Pupils work in groups the activity 10.7 to Explore the Meaning of a sequence with constant ratio. They will also work on application activity 10.7 for practice or assessment	Pupil's Book, sequence charts	Pupils should be able to understand and identifying constant ratio sequences	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 145-146)	
	Lesson 11: Finding the missing term in a sequence with constant ratios (2 periods)	Solve missing term problems in constant ratio sequences.	Problem-solving, constant ratio	Pupils work in groups the activity 10.7 to Explore the Finding the missing term in a sequence with constant ratios. They will also work on application activity 10.7 for practice or assessment	Pupil's Book, problem sets	Pupils should be able to solving constant ratio problems	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 145-146)	
	Lesson 12: Meaning of a sequence with geometric	Understand sequences with geometric changing differences.	Geometric changing difference, sequences	Pupils work in groups the activity 10.8 to Explore the Meaning of a sequence with geometric changing	Pupil's Book, sequence charts	Pupils should be able to understand sequences with	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 146-147)	

	changing difference (1 period)			difference. They will also work on application activity 10.8 for practice or assessment		geometric changing difference concepts		
	Lesson 13: Finding a missing term in a sequence with geometric changing difference (2 periods)	Solve problems involving missing terms in geometric sequences.	Problem-solving, geometric sequences	Pupils work in groups the activity 10.8 to Explore the Finding a missing term in a sequence with geometric changing difference. They will also work on application activity 10.8 for practice or assessment	Pupil's Book, problem sets	Pupils should be able to Solve problems involving missing terms in geometric sequences	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 146-147)	
	Remedial activities (1 period)	Reinforce understanding of geometric sequences.	Review, reinforcement	Review games focusing on geometric sequences concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (1 period)	Evaluate understanding of sequences covered in the unit.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 147-148)	

UNIT 11: Constructing angles and describing angles formed by intersecting lines

Number of periods: 8/24

Key unit competence: Pupils will be able to construct different angles and describe properties of angles formed by intersecting lines.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 11: 16-20 Mar 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the objectives and content of the unit on angles.	Angles, construction, protractor	Class discussion on the importance of angles in geometry and real life.	Pupil's Book, whiteboard	Pupils should be able to participate and give feedback	MATHEMATICS PRIMARY 6 PUPIL'S BOOK (Pages 149-150)	
	Lesson 2: Construction of different angles with a protractor (1 period)	Learn to construct various angles using a protractor.	Protractor, angle construction	Pupils work in groups the activity 11.1 to Explore the Construction of different angles with a protractor. They will also work on application activity	Pupil's Book, protractors	Pupils should be able to construct various angles using a protractor.	MATHEMATICS PRIMARY 6 PUPIL'S BOOK (Pages 150-151)	

				11.1 for practice or assessment				
	Lesson 3: Bisection of angles (Using folding) (1 period)	Understand how to bisect angles using folding techniques.	Bisection, folding, angles	Pupils work in groups the activity 11.2to Explore the Bisection of angles (Using folding). They will also work on application activity 11.2 for practice or assessment	Pupil's Book, paper	Pupils should be able to Understand and discuss how to bisect angles using folding techniques.	MATHEMATIC S PRIMARY 6 PUPIL'S BOOK (Pages 151-152)	
	Lesson 4: Bisecting angles using a pair of compasses and a ruler (1 period)	Learn to bisect angles using a compass and ruler.	Compass, ruler, bisection	Pupils work in groups the activity 11.3to Explore the Bisecting angles using a pair of compasses and a ruler. They will also work on application activity 11.3 for practice or assessment	Pupil's Book, compasses , rulers	Pupils should be able to bisecting angles with tools	MATHEMATIC S PRIMARY 6 PUPIL'S BOOK (Pages 152-153)	
	Lesson 5: Constructing 90°, 45°, and 22.5° angles (1 period)	Construct specific angles using a compass and protractor.	90°, 45°, 22.5° angles	Pupils work in groups the activity 11.4 to Explore the Constructing 90°, 45°, and 22.5° angles. They will also work on application activity	Pupil's Book, protractors , rulers	Pupils should be able to constructin g specified angles	MATHEMATIC S PRIMARY 6 PUPIL'S BOOK (Pages 153-156)	

				11.4 for practice or assessment				
	Lesson 6: Constructing 60°, 30°, and 15° angles (1 period)	Learn to construct additional angles accurately.	60°, 30°, 15° angles	Pupils work in groups the activity 11.5 to Explore the Constructing 60°, 30°, and 15° angles. They will also work on application activity 11.5 for practice or assessment	Pupil's Book, protractors , rulers	Pupils should be able to construct additional angles accurately.	MATHEMATIC S PRIMARY 6 PUPIL'S BOOK (Pages 156-158)	
	Lesson 7: Constructing angles 120° and 150° angles (2 periods)	Understand how to construct larger angles accurately.	120°, 150° angles	Pupils work in groups the activity 11.6 to Explore the Constructing angles 120° and 150° angles. They will also work on application activity 11.6 for practice or assessment	Pupil's Book, protractors , rulers	Pupils should be able to Understand how to construct larger angles accurately.	MATHEMATIC S PRIMARY 6 PUPIL'S BOOK (Pages 159-160)	
	Remedial activities (1 period)	Reinforce understanding of angle constructions .	Review, reinforcement	Review games and activities focusing on angle construction techniques.	Pupil's Book, review materials	Informal assessments through games	MATHEMATIC S PRIMARY 6 PUPIL'S BOOK	

Teachers 'Name:
School Name:
Class: P5
Subject: Mathematics

Academic year: 2025-2026
Terms: Three
No of weeks per term:11
Number of periods per week:9

UNIT 11: Constructing angles and describing angles formed by intersecting lines

Number of periods: 8/24

Key unit competence: Pupils will be able to construct different angles and describe properties of angles formed by intersecting lines.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessments	References	Weekly Observations/Remarks
Week 1: 20-24 Apr 2025	Lesson 8: Identifying different lines and angles formed on real objects	Identify and classify different lines and angles in real-world contexts.	Lines, angles, real objects	Pupils work in groups the activity 11.7 to Explore the Identifying different lines and angles formed on real objects. They will	Pupil's Book, rulers, protractors	Pupils should be able to participate identify different	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 161-163)	

	(1 period)			also work on application activity 11.7 for practice or assessment		lines and angles		
	Lesson 9: Perpendicular lines (1 period)	Understand and identify perpendicular lines.	Perpendicular lines, right angles	Pupils work in groups the activity 11.8 to Explore the Perpendicular lines. They will also work on application activity 11.8 for practice or assessment	Pupil's Book, visual aids	Pupils should be able to identifying perpendicular lines	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 163-165)	
	Lesson 10: Parallel lines, intersecting lines, and transversals (2 periods)	Learn the definitions and properties of parallel lines, intersecting lines, and transversals.	Parallel lines, intersecting lines, transversals	Pupils work in groups the activity 11.9 to Explore the Parallel lines, intersecting lines, and transversals. They will also work on application activity 11.9 for practice or assessment	Pupil's Book, graph paper	Pupils should be able to identifying and drawing parallel and intersect lines	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 165-167)	
	Lesson 11: Properties related to angles formed by	Explore the properties of angles formed	Vertically opposite angles, adjacent angles	Pupils work in groups the activity 11.9 to Explore the Properties related to angles formed by	Pupil's Book, protractor, angle charts	Pupils should be able to understand the	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 165-167)	

	intersecting lines (2 periods)	when lines intersect.		intersecting lines. They will also work on application activity 11.9 for practice or assessment		properties of angles formed when lines intersect.		
	Lesson 12: Angle properties of parallel lines: Corresponding angles (1 period)	Understand corresponding angles and their properties.	Corresponding angles, parallel lines	Pupils work in groups the activity 11.10 to Explore the Angle properties of parallel lines: Corresponding angles. They will also work on application activity 11.10 for practice or assessment	Pupil's Book, worksheets	Pupils should be able to understand corresponding angles and their properties	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 167-168)	
	Remedial activities (1 period)	Reinforce understanding of lines and angles.	Review, reinforcement	Review games focusing on lines and angles concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
Week 2: 27 Apr - 1 May 2025	Lesson 13: Angle properties of parallel lines: Alternate angles (2 periods)	Learn about alternate angles and their properties.	Alternate angles	Pupils work in groups the activity 11.11 to Explore the Angle properties of parallel lines: Alternate angles. They will also work on application	Pupil's Book, angle charts	Pupils should be able to alternate angles	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 168-169)	

				activity 11.11 for practice or assessment				
	Lesson 14: Angle properties of parallel lines: Co-interior angles (2 periods)	Understand co-interior angles and their properties.	Co-interior angles	Pupils work in groups the activity 11.12 to Explore the Angle properties of parallel lines: Co-interior angles. They will also work on application activity 11.12 for practice or assessment	Pupil's Book, visual aids	Pupils should be able to identifying co-interior angles	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 170-171)	
	Lesson 15: Sum of angles of a triangle (2 periods)	Learn the sum of interior angles in triangles.	Triangle, sum of angles, 180 degrees	Pupils work in groups the activity 11.13 to Explore the Sum of angles of a triangle They will also work on application activity 11.13 for practice or assessment	Pupil's Book, protractor, triangle models	Pupils should be able to understand sum of angles and triangle	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 171-172)	
	Lesson 16: Solving problems related to angles of a triangle (1 period)	Apply knowledge to solve problems involving angles in triangles.	Problem-solving, triangle angles	Pupils work in groups the activity 11.13 to Explore the Solving problems related to angles of a triangle They will also work on	Pupil's Book, problem sets	Pupils should be able to solving triangle angle problems	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 171-172)	

				application activity 11.13 for practice or assessment				
	Remedial activities (1 period)	Reinforce knowledge of triangle angles and properties.	Review, reinforcemen t	Review games focusing on triangle angle concepts.	Pupil's Book, review materials	Informal assessments through games	MATHEMATI CS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (1 period)	Evaluate understandin g of angles and lines covered in the unit.	Assessment, understandin g	Administer end-of- unit test and review results.	Pupil's Book, assessmen t sheets	Formal test evaluation	MATHEMATI CS PRIMARY 5 PUPIL'S BOOK (Pages 173-174)	

UNIT 12: Interpreting and constructing scale drawings

Number of periods: 8

Key unit competence: Pupils will be able to interpret and construct scale drawings.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 3: 4-8 May 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the unit's objectives and content about scale drawings.	Scale drawing, map, distance, size	Class discussion on the importance of scale drawings in real life and map interpretation.	Pupil's Book, whiteboard	Pupils should be able to participate and give feedback on the question asked by teacher	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 175-176)	

	Lesson 2: Concept of scale drawing through examples of actual distances/sizes and the distance/size on a map (1 period)	Understand the concept of scale drawing using real-life examples.	Scale, distance, map, actual size	Pupils work in groups the activity 12.1 to Explore the Concept of scale drawing They will also work on application activity 12.1 for practice or assessment	Pupil's Book, maps, rulers	Pupils should be able to identifying scales in maps using in real-life	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 176-177)	
	Lesson 3: Finding scale: Establishing the scale of a real object to be drawn on a sheet of paper (1 period)	Learn how to establish the scale of an object for drawing.	Scale, proportionality, drawing	Pupils work in groups the activity 12.2 to Explore the Finding scale: Establishing the scale of a real object to be drawn on a sheet of paper They will also work on application activity 12.2 for practice or assessment	Pupil's Book, measuring tapes, rulers	Pupils should be able to finding and establishing scales	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 178-179)	
	Lesson 4: Construction of scale	Construct scale drawings based on	Construction, scale drawing	Pupils work in groups the activity 12.3 to Explore the Construction of scale	Pupil's Book, graph	Pupils should be able to constructin	MATHEMATICS PRIMARY 5 PUPIL'S	

	drawings (1 period)	established scales.		drawings They will also work on application activity 12.3 for practice or assessment	paper, rulers	g scale drawings	BOOK (Pages 180-181)	
	Lesson 5: Finding actual distance (1 period)	Calculate actual distances based on scale drawings.	Actual distance, scale, calculation	Pupils work in groups the activity 12.4 to Explore the Finding actual distance They will also work on application activity 12.4 for practice or assessment	Pupil's Book, examples, calculators	Pupils should be able to calculating actual distances	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 182-183)	
	Lesson 6: Finding the drawing length (1 period)	Determine drawing lengths from actual distances.	Drawing length, scale, measurement	Pupils work in groups the activity 12.5 to Explore the Finding the drawing length. They will also work on application activity 12.5 for practice or assessment	Pupil's Book, rulers, measuring tools	Pupils should be able to finding drawing lengths	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 183-184)	
	Lesson 7: Real-life problems involving	Apply knowledge of scale drawings to solve real-	Problem-solving, real-life applications	Pupils work in groups the activity 12.5 to Explore the Real-life problems involving scale drawings. They will	Pupil's Book, problem sets	Pupils should be able to Apply knowledge of scale	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 183-184)	

	scale drawings (1 period)	life problems.		also work on application activity 12.5 for practice or assessment		drawings to solve real-life problems.		
	Remedial activities (1 period)	Reinforce understanding of scale drawings and measurement.	Review, reinforcement	Review games and exercises focused on scale drawings.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (1 period)	Evaluate understanding of scale drawings covered in the unit.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 185-186)	

UNIT 13: Calculating circumference of a circle, surface area and volume of cubes and cuboids
Number of periods: 16

Key unit competence: Pupils will be able to calculate circumference of a circle, surface area and volume of cubes and cuboids.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment Strategies	References	Weekly Observations/Remarks
Week 4: 11-15 May 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the unit's objectives and content about circles and solids.	Circumference, surface area, volume	Class discussion on the importance of understanding circles and solids.	Pupil's Book, whiteboard	Pupils should be able to participate and feedback	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 187-188)	
	Lesson 2: Circumference of circular	Calculate the circumference	Circumference, diameter, radius	Pupils work in groups the activity 13.1 to Explore the	Pupil's Book, measuring	Pupils should be able to	MATHEMATICS PRIMARY 5	

	objects (1 period)	e of circular objects.		Circumference of circular objects. They will also work on application activity 13.1 for practice or assessment	tapes, circular objects	calculating circumference	PUPIL'S BOOK (Pages 188-190)	
	Lesson 3: Finding the number pi (1 period)	Understand the concept of π (pi) and its significance.	Pi, ratio, circle	Pupils work in groups the activity 13.2 to Explore the Finding the number pi. They will also work on application activity 13.2 for practice or assessment	Pupil's Book, visual aids	Pupils should be able to understanding the concept of pi	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 190-194)	
	Lesson 4: Properties of cubes and cuboids (2 periods)	Explore the properties of cubes and cuboids.	Cube, cuboid, properties, edges, vertices	Pupils work in groups the activity 13.3 to Explore the Properties of cubes and cuboids. They will also work on application activity 13.3 for practice or assessment	Pupil's Book, 3D models	Pupils should be able to identifying properties of cubes and cuboids.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 194-196)	
	Lesson 5: Use of nets to calculate the surface area	Calculate the surface area of cubes using nets.	Surface area, nets, cube	Pupils work in groups the activity 13.4 to Explore the Use of nets to	Pupil's Book, nets, scissors	Pupils should be able to calculating	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 196-199)	

	of cubes (1 period)			calculate the surface area of cubes. They will also work on application activity 13.4 for practice or assessment		surface area of cube using nets.		
	Lesson 6: Use of nets to calculate the surface area of cuboids (2 periods)	Calculate the surface area of cuboids using nets.	Surface area, nets, cuboid	Pupils work in groups the activity 13.5 to Explore the Use of nets to calculate the surface area of cuboids. They will also work on application activity 13.5 for practice or assessment	Pupil's Book, nets, graph paper	Pupils should be able to calculating surface area of cuboids using nets.	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 199-203)	
	Remedial activities (1 period)	Reinforce understanding of surface area concepts.	Review, reinforcement	Review games focused on surface area calculations.	Pupil's Book, review materials	Informal assessments through games	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK	
Week 5: 18-22 May 2025	Lesson 7: Calculating the volume of a cube and cuboids (2 periods)	Calculate the volume of cubes and cuboids.	Volume, cube, cuboid, calculation	Pupils work in groups the activity 13.6 to Explore the Calculating the volume of a cube and cuboids. They will also work on	Pupil's Book, measuring tools	Pupils should be able to calculating volume of cube and cuboids	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 203-205)	

				application activity 13.6 for practice or assessment				
	Lesson 8: Finding one dimension of a cuboid (1 period)	Solve for one dimension of a cuboid given volume and other dimensions.	Dimension, volume, cuboid	Pupils work in groups the activity 13.7 to Explore the Finding one dimension of a cuboid. They will also work on application activity 13.7 for practice or assessment	Pupil's Book, calculators	Pupils should be able to solving for dimensions of a cuboid given volume and other dimensions.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 206-207)	
	Lesson 9: Finding the area of a face of cuboids (2 periods)	Calculate the area of different faces of cuboids.	Area, face, cuboid	Pupils work in groups the activity 13.9 to Explore the Finding the area of a face of cuboids. They will also work on application activity 13.9 for practice or assessment	Pupil's Book, graph paper	Pupils should be able to calculating face areas	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 210-212)	
	End unit assessment (1 period)	Evaluate understanding of the unit's content.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	

	Presentation of projects: Building real-life objects using nets of solids (2 periods)	Apply knowledge of nets to create real-life objects.	Project, nets, solids	Group project to construct real-life objects from nets.	Pupil's Book, materials for building	Pupils should be able to Presentation and peer assessment	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 213-215)	
	Remedial activities (1 period)	Reinforce understanding of solids and nets.	Review, reinforcement	Review activities focused on solid shapes and their properties.	Pupil's Book, review materials	Informal assessments through activities	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK	

UNIT 14: Data handling

Number of periods: 24

Key unit competence: Pupils will be able to collect data, represent and interpret it in order to answer a question or problem.

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 6: 25-29 May 2025	Lesson 1: Introduction on the content of the unit	Introduce the unit's objectives and content	Quantitative data, discrete data, continuous data	Class discussion on the importance of data in mathematics.	Pupil's Book, whiteboard	Pupils should be able to participation and feedback	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 216-217)	

	(1 period)	about data types.						
	Lesson 2: Definition and examples of quantitative data (2 periods)	Understand and identify quantitative data with examples.	Quantitative data, examples	Pupils work in groups the activity 14.1 to Explore the Definition and examples of quantitative data. They will also work on application activity 14.1 for practice or assessment	Pupil's Book, examples	Pupils should be able to identifying quantitative data	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 217-218)	
	Lesson 3: Definition and examples of discrete data (2 periods)	Define discrete data and provide examples.	Discrete data, examples	Pupils work in groups the activity 14.2.1 to Explore the Definition and examples of discrete data. They will also work on application activity 14.2.1 for practice or assessment	Pupil's Book, data collection tools	Pupils should be able to identifying discrete data	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Page 219)	
	Lesson 4: Definition and examples of continuous data	Define continuous data and give appropriate examples.	Continuous data, examples	Pupils work in groups the activity 14.2.2 to Explore the Definition and examples of continuous data.	Pupil's Book, visual aids	Pupils should be able to identifying continuous data	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 220-221)	

	(2 periods)			They will also work on application activity 14.2.2 for practice or assessment				
	Lesson 5: Record data using tally and tables (1 period)	Learn to record data using tally marks and tables.	Tally, tables, data recording	Pupils work in groups the activity 14.3 to Explore the Record data using tally and tables. They will also work on application activity 14.3 for practice or assessment	Pupil's Book, tally sheets	Pupils should be able to record data using tally marks and tables.	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 221-224)	
	Remedial activities (1 period)	Reinforce understanding of data recording techniques.	Review, reinforcement	Review games focused on tally and data tables.	Pupil's Book, review materials	Informal assessments through activities	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK	
Week 7: 1-5 June 2025	Lesson 6: Exploring tally and tables (2 periods)	Explore the use of tally marks and tables for data representation.	Tally, tables, data representation	Pupils work in groups the activity 14.3 to Explore the Exploring tally and tables. They will also work on application activity 14.3 for practice or assessment	Pupil's Book, data examples	Pupils should be able to Explore the use of tally marks and tables for data representation	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 221-224)	

	Lesson 7: Representing data using bar charts (2 periods)	Create and interpret bar charts from collected data.	Bar chart, data representation	Pupils work in groups the activity 14.4 to Explore the Representing data using bar charts. They will also work on application activity 14.4 for practice or assessment	Pupil's Book, graph paper	Pupils should be able to creating and interpreting bar charts	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 224-226)	
	Lesson 8: Representing data using bar charts in an Excel sheet (2 periods)	Learn to create bar charts using Excel.	Excel, bar chart	Pupils work in groups the activity 14.5 to Explore the Representing data using bar charts in an Excel sheet. They will also work on application activity 14.5 for practice or assessment	Pupil's Book, computers	Pupils should be able to create bar charts using Excel.	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 224-226)	
	Lesson 9: Interpreting bar charts to draw a conclusion (2 periods)	Analyze bar charts to derive conclusions from data.	Interpretation, conclusion	Pupils work in groups the activity 14.5 to Explore the Interpreting bar charts to draw a conclusion. They will also work on application activity	Pupil's Book, bar chart examples	Pupils should be able to interpreting data from bar charts	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 227-229)	

				14.5 for practice or assessment				
	Remedial activities (1 period)	Reinforce understanding of bar charts and data interpretation.	Review, reinforcement	Review activities focused on bar charts and data analysis.	Pupil's Book, review materials	Informal assessments through activities	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
Week 8: 8-12 June 2025	Lesson 10: Representing data using line graphs (2 periods)	Create and interpret line graphs from data.	Line graph, data representation	Pupils work in groups the activity 14.6 to Explore the Representing data using line graphs. They will also work on application activity 14.6 for practice or assessment	Pupil's Book, graph paper	Pupils should be able to creating and interpreting line graphs	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 229-231)	
	Lesson 11: Representing data using line graphs in an Excel sheet (2 periods)	Learn to create line graphs using Excel.	Excel, line graph	Pupils work in groups the activity 14.6 to Explore the Representing data using line graphs in an excel sheet. They will also work on application activity 14.6 for practice or assessment	Pupil's Book, computers	Pupils should be able to create line graphs using Excel	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 229-231)	

	Lesson 12: Interpreting line graphs to draw a conclusion (1 period)	Analyze line graphs and derive conclusions from the data.	Interpretation, conclusion	Pupils work in groups the activity 14.7 to Explore the Interpreting line graphs to draw a conclusion. They will also work on application activity 14.7 for practice or assessment	Pupil's Book, line graph examples	Pupils should be able to interpreting data from line graphs	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 232-234)	
	Lesson 13: Presentation of projects: Collecting and graphing data for real-life events (2 periods)	Apply knowledge of data representation in real-life contexts.	Project, data collection, graphing	Group project to collect data and represent it graphically	Pupil's Book, materials for projects	Through a whole class discussion; pupils should be able to: Present the work done by explaining orally and by writing essential points of the work done. Answer to questions from the classmates and teacher. Representatio	MATHEMATIC S PRIMARY 5 PUPIL'S BOOK (Pages 234-235)	

						n in real-life contexts.		
	Remedial activities (1 period)	Reinforce understanding of line graphs and data interpretation .	Review, reinforcement	Review activities focusing on line graphs and data analysis.	Pupil's Book, review materials	Informal assessments through activities	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (1 period)	Evaluate understanding of data representation and interpretation	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 235-236)	

UNIT 15: Introduction to likelihoods of events

Number of periods: 8

Key unit competence: Pupils will be able to conduct experiments to decide how likely something is to happen

Dates/Weeks	Lesson Title/Periods	Learning Objectives	Content Summary	Teaching and Learning Activities/Approaches	Teaching and Learning Aids	Assessment	References	Weekly Observations/Remarks
Week 9: 15-19 June 2025	Lesson 1: Introduction on the content of the unit (1 period)	Introduce the unit's objectives and content about chance.	Chance, probability, outcomes	Class discussion on the importance of understanding chance and probability in daily life.	Pupil's Book, whiteboard	Pupils should be able to participate and get feedback from teacher	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 237-238)	
	Lesson 2: Representing the outcomes of a die tossed many times (1 period)	Understand how to represent outcomes from experiments.	Outcomes, die, frequency	Pupils work in groups the activity 15.1 to Explore the Representing the outcomes of a die tossed many times. They will also work on application activity 15.1 for practice or assessment	Pupil's Book, dice, recording sheets	Pupils should be able to recording and interpreting outcomes	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 238-241)	
	Lesson 3: Vocabulary	Learn key vocabulary	Experiment, outcomes,	Pupils work in groups the activity	Pupil's Book,	Pupils should be	MATHEMATICS PRIMARY	

	of chance: experiment, outcomes, certain, impossible, equally likely, less likely, more likely (2 periods)	related to chance and probability.	certain, impossible, likely	15.2 to Explore the vocabulary related to chance and probability. They will also work on application activity 15.2 for practice or assessment	vocabulary charts	able to using vocabulary in context	5 PUPIL'S BOOK (Pages 241-242)	
	Lesson 4: Event and related concepts: certain event, impossible event (2 periods)	Understand different types of events in probability.	Certain event, impossible event	Pupils work in groups the activity 15.3 to Explore the Event and related concepts: certain event, impossible event. They will also work on application activity 15.3 for practice or assessment	Pupil's Book, scenario cards	Pupils should be able to identifying certain and impossible events	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 242-243)	
	Lesson 5: Conducting experiments, predicting outcomes, and deciding	Conduct experiments to predict outcomes and assess likelihood.	Predict, likelihood, less likely, more likely	Pupils work in groups the activity 15.4 to Explore the Conducting experiments, predicting outcomes, and deciding how likely	Pupil's Book, experiment materials	Pupils should be able to Conduct experiments to predict outcomes	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 243-244)	

	how likely something is to happen (1 period)			something is to happen. They will also work on application activity 15.4 for practice or assessment		and assess likelihood		
	Remedial activities (1 period)	Reinforce understanding of concepts related to chance and probability.	Review, reinforcement	Review games focused on vocabulary and concepts of chance.	Pupil's Book, review materials	Informal assessments through games	MATHEMATICS PRIMARY 5 PUPIL'S BOOK	
	End unit assessment (1 period)	Evaluate understanding of the unit's content on probability.	Assessment, understanding	Administer end-of-unit test and review results.	Pupil's Book, assessment sheets	Formal test evaluation	MATHEMATICS PRIMARY 5 PUPIL'S BOOK (Pages 245-247)
